

Backgrounder

Federal and provincial governments reach agreement under new federal infrastructure funding programs

The federal and provincial governments have approved 51 community infrastructure projects to date under two new federal infrastructure programs introduced as part of Phase 1 of the 10-year *Investing in Canada* plan. The Clean Water and Wastewater Fund and the Public Transit Infrastructure Fund will address key infrastructure priorities with a focus on repairing and upgrading existing facilities and assets.

Additional projects will be prioritized by the province for funding under these programs in the coming months.

Clean Water and Wastewater Fund

The federal government is providing \$39,717,426 and the provincial government is providing \$19,858,713 for 47 projects to rehabilitate and improve community water and wastewater systems across the province. Combined with municipal contributions, \$79,434,852 will be going towards providing New Brunswick families with clean reliable water and wastewater services.
