

Your pension will keep growing

Not only will the pension amount PSSA retirees receive today NEVER be reduced under a shared-risk model, the plan has actually been designed to make it increase. The plan will still provide cost of living increases among the best plans in Canada. Better than Alberta. Better than Nova Scotia. What's most important is that it will be more secure for you, for taxpayers and for the next generation.

Your pension in 20 years would be:

\$27,486

\$41,229

\$68,715

\$123,687

**Percentage of inflation (CPI)*
added to your pension:**

75%

75%

75%

75%

If your pension today is:

\$20,000

\$30,000

\$50,000

\$90,000

** Assumed Consumer Price Index (CPI) = 2.25 % (based on 10 year average)*

The plan is designed to provide PSSA retirees with a cost of living increase IN EXCESS of 75% of the inflation rate (CPI) over a 20 year period. It has the ability to pay indexing at 100 % of inflation.
