

Working Together to Develop a Shédiac Bay Watershed Management Plan

A **watershed management plan** is a document that characterizes a watershed and designs and structures a working plan to establish a set of goals and objectives that protect and improve water quality and natural resources within its boundaries. A watershed management plan describes the actions and process of implementing sustainable land-use practices and water management programs that allows us to accomplish and achieve these goals.

QUESTIONNAIRE- WE WANT YOUR IDEAS

From what perspective will you be answering these questions (Please check one)?

- As an individual
- As a business (please specify the type of business)
