Reading and Viewing Achievement Standards

The following outlines text study over the Grade 12 semester in English Language Arts (at least 30% should be Canadian content and include representation from New Brunswick). Additional reading and reading support are expected in all subject areas. These guidelines are for instructional texts.

**Shorter Text**  Minimum of five from each category

- Poetic texts (e.g., lyrics, odes, ballad, dramatic monologue)
- Visuals and multimedia (e.g., graphs, political cartoons, video games, webpages)
- Essays and popular non-fiction (e.g., obituaries, rants, reports, blogs)

**Multi-genre Study**  Minimum of one multi-genre study

- Explore a theme or a question through a variety of texts, including:
  - One student-selected book study extended text (i.e., book-length narrative or modern or classic script or play)
  - A variety of shorter texts (see list above)
  - Optional: short story

Students are required to explore a variety of genres in their independent reading. Independent reading choices should include those of interest or enjoyment and those that stretch understanding and build capacity to handle more challenging themes, information, genres and structures. Quantity and quality of texts should be balanced and suit the individual. Recommendations for time committed to deep reading are as follows:

During ELA: 15-20% of class time (includes conferring, but not book club discussions)

**Outside Instructional Time:**
- Appropriate: 2 hours per week (15-20 minutes per day)
- Strong: at least 3 ½ hours per week (30 minutes per day)
Reading Strategies and Behaviours

By the end of Grade 12, students performing at appropriate achievement will demonstrate stamina when reading challenging grade-level instructional texts; independently employ and discuss strategies and behaviours; and set goals for improvement. Performance at strong achievement will include interest in the personal, social and aesthetic value of literature, including some evidence of academic choices in personal reading time.

**Make meaning:** set a purpose; examine and use text structure and format; skim, scan and reread; generate questions; make connections; analyze, synthesize and evaluate text; use close reading; identify evidence that supports main idea or thesis; organize information in notes, graphics or graphic organizers

**Solve words:** use a wide range of strategies and cues (e.g., root words and origins, background knowledge, and context cues); use reference and assistive technology tools to develop understanding of unknown or technical words; and examine word choice and language for author’s voice and purpose

**Read with automaticity:** automatically read and understand most words in a range of contexts (vocabulary from grade-level texts, subject terminology, popular or cultural references, and connotative and figurative word meanings)

**Read with fluency:** read with expression and confidence; adjust rates to match form and purpose; use appropriate phrasing, pausing and intonation; attend to accuracy in complex sentences; and read aloud or rehearse difficult chunks of text

**Predict:** context clues, prior knowledge and experience, knowledge of literary devices, and knowledge of text forms and features to verify and adjust predictions about content

**Use text features:** use text features to preview, locate and interpret information, and verify understanding

**Use technology:** employ assistive tools, when required
Comprehension Responses
Indicators pertain to responses given to text at an independent reading level.

In responses to all levels of questioning, students are expected to support their ideas and content with relevant examples or information from the text. Responses considered strong show sophistication and depth in justifications and rationales, and may be described as original or creative. Products required to assess each of the following must reflect the principles of differentiated instruction.

Sample Prompts

• What new information did you learn from reading and viewing this selection?
• Summarize what you have found so far. What key words did you note to help you remember?
• Where would you begin to construct a timeline to plot the events in this autobiography?
• Why is _____ (event or action of character) significant or insignificant to the story?
• _____ is known as ____ (imagery, centrifugal force, the Renaissance)?
• What were the key ideas in the information? Why did you identify them as important?
• Provide the gist of this article in twenty words or less.
Sample Prompts

- Describe relationships between ____ (characters) at the beginning and end of the story. What caused these changes?
- What does format, layout or structure tell you about the author’s purpose?
- In what ways did the weaknesses or strengths of the characters affect the chain of events in the story? How would the story be different if the characters had acted differently, or if different events had occurred?
- What is the theme or thesis of this selection? What helps justify your assumptions or conclusions? What influences your assumptions or conclusions?
- What does this phrase mean? Why was it chosen?
- Give an example of how the author, poet, photographer, illustrator or creator used ____ (a specific device, such as foreshadowing, irony, imagery, archetypes, camera angles, lighting, line, volume, timing, pace). Explain.
- How does this text feature (e.g., table of contents) help you understand the text? What information do you learn that adds to the text? What meaning or story can you infer?
- What message does the ____ (an aspect of the text: e.g., title, design, font, diction) convey?
### Appropriate Achievement

- compare and contrast characters, events, ideas and themes with personal experiences, prior knowledge and emergent understandings; make text-to-text, text-to-world comparisons; connect characters, themes and plots within and across texts and genres; consider texts in terms of worldview; make connections between texts, historical events, and social, moral and political issues

- express and support personal reactions, preferences for, and opinions about particular texts, authors, illustrators and genres; express changes in personal viewpoint and ideas

- analyze how different elements of craft (e.g., dialect, imagery, irony, flashbacks, foreshadowing, symbolism, tone) create meaning and engage audience; evaluate the author’s effectiveness; cite evidence

- analyze how texts manipulate, persuade or control; comment about how discourses beliefs, values, identity and power—shape and are shaped by the text; propose alternative perspectives; demonstrate understanding that texts reveal and produce ideologies, identities, positions and propaganda; assess the veracity of claims and reliability of information; analyze multiple interpretations

- evaluate how purpose, structure, and characteristics of a variety of text forms contribute to understanding; analyze relationships between language, topic, genre, purpose, context and audience

### Strong Achievement

Along with the indicators outlined in Appropriate Achievement, readers performing at Strong:

- research independently to extend interest and understanding of worldviews and gather information to support opinions

- choose precise citations from other sources to support assertions about texts

- synthesize experiences with other texts and prior knowledge to make sophisticated connections and offer unique perspectives

### Sample Prompts

- Does ____ (character) remind you of other characters? Who and why? How does knowledge of these characters help you understand ____ (character)?

- What would you have done in this situation?

- How does the structure or layout of the text achieve or detract from the author’s purpose?

- How does the _____ (e.g., publishing decision, such as inclusion of a table of contents, acknowledgements, epilogue) influence the reader?

- How are beliefs, values, identities or power relationships influenced by this passage? How does this contribute to or shape understanding of the text as a cultural artefact?

- The problem is described by _____. What do you think ____ would say about it?

- Whose viewpoint is presented? What, if any, opposing viewpoints are presented?

- Whose viewpoint is missing? Describe the biases and assumptions presented in this selection. Whose interests are served? Who is the target audience for this selection?

- What are some examples of how the author used exaggeration or subtle misinformation?

- What are some similarities and differences between _____ (form or genre) and another (form for genre)?

- What presumptions are made of the reader?
Students select and read independently a range of literary and information texts. Students may employ assistive technology to support reading. Texts include:

**Knowledge demands:** ever-growing array of genres, many themes beyond personal experiences; requires knowledge of specific subject matter and other texts (intertextuality); awareness of world views (including author's perspective); ability to take a critical stance and justify positions

**Themes:** complex and sophisticated themes and ideas (e.g., relevant and robust themes, exploring social or moral issues, justice, war, discrimination) that cultivate social awareness, evoke emotional responses, challenge personal points of view and provide insights into the struggles of humanity; characters and information requiring the reader to interpret and connect information and ideas with other texts and subject areas; multiple levels of meaning

**Sentences:** many complex sentence structures (including sentences greater than 30 words); multiple descriptive sentences containing information vital to understanding of the text; complicated use of dialogue

**Language:** challenging language requires moderate level of content knowledge; some implicit or inferred meaning; wide range of literary devices (e.g., figurative, symbolic, ironic language); some lengthier descriptions, dialects (regional or historical), colloquialisms, other languages, domain-specific, archaic, or academic (not requiring extensive knowledge)

**Word complexity:** many long multi-syllable words, some difficult nouns and technical vocabulary; requires additional reading and research

**Graphics:** variety of challenging illustrations, photographs and sophisticated graphics; interpretation of these is essential to understanding

**Layout:** many lines of print on a page; variation in layout, print styles and font within the same text (many examples of dense print); complex range of punctuation; may feature a wide range of reader's tools and text features (e.g., glossary, pronunciation guide index, italics, scales, legends)

In addition, text complexity of **literary fiction** (e.g., realistic and historical fiction, mysteries, myths, science fiction, allegories, parodies, satire, graphic novels, drama) includes:

**Text structure:** some complex, implicit and unconventional narrative structures; shifts in points of view; flashbacks and major time shifts

**Plot:** complex plots; requires awareness of linguistic, structural and presentation devices

**Character development:** main character displays complexity and unpredictability; factors that relate to character development require reader to gather information through inferences including knowledge of archetypes and conflict; multiple characters revealed through dialogue, actions, thoughts and/or perceptions of others

**Textual details:** captions, graphics, and/or unassigned dialogue from which story action and character development must be inferred; description, imagery, symbolism, figurative language all vital to understanding settings, characters and themes

In addition, text complexity of **literary non-fiction and information texts** (e.g., essays, speeches, journalistic text, historical accounts, textbooks, reports, directions, biography and autobiography, memoir, documentary, ads, charts, maps, tables, pamphlets, graphs, infographics) includes:

**Depth of content:** large amounts of content, sometimes beyond subject-matter instruction, requiring readers to synthesize information from within and beyond the text (i.e., use primary and secondary sources, follow current events, research theories and historical events)

**Presentation:** topics, ideas and information, often implicit, presented in multiple layers requiring readers employ understanding of structure

**Textual details:** information presented in a variety of ways (e.g., paragraphs, columns, links, cutaways, graphics) and in combination, requiring readers preview text layout, skim and scan, and read with a purpose
