Acknowledgments

It is with appreciation that the following individuals are recognized for their contributions to this document:

Tiffany Bastin
Learning Specialist for Literacy, Health and Physical Education, Department of Education and Early Childhood Development

Robin Buchanan
Physical Education Mentor, School District 17

Cindy Dickie
Wellness Consultant, Department of Wellness, Culture & Sport

Steve Hachey
Physical Education Teacher, District 17

Sandra Leland
Physical Education Teacher, District 8

Dr. Bill Morrison
Health and Education Research Group, University of New Brunswick

John MacDonald
Physical Education Teacher, District 18

Marlien MacKay
Wellness Consultant, Department of Wellness, Culture & Sport

Mary-Jo MacRae
Learning Specialist, Department of Education and Early Childhood Development

Keith McAlpine
Former Learning Specialist, Health and Physical Education, Department of Education and Early Childhood Development

Darren Oakes
Learning Specialist, Physical Education, School District 15

Isabel Savoie
Wellness Consultant, Department of Wellness, Culture & Sport

Judy Vautour
Physical Education Teacher, District 2
Further Acknowledgments

It is with appreciation that the following individuals are recognized for their contributions as pilot teachers for this curriculum:

Stacey Boudreau  
Athletic Director, Bernice MacNaughton High School  
School District 2

Andy Clark  
Athletic Director  
Hartland Community School, School District 14

Daneen Dymond  
Physical Education/Health Teacher, Leo Hayes High School  
School District 18

Jennifer Heelis  
Athletic Director, Physical Education Teacher  
Fundy High School, School District 10

Jeff Kirkbride  
Physical Education Teacher  
Oromocto High School, School District 17

Kris Jordan  
Physical Education Specialist, B.PE, B.Ed  
Rothesay High School, School District 6

Alice Mann  
Physical Education Teacher  
Bathurst High School, School District 15

Carrie Shea  
Athletic Director  
St. Malachy’s Memorial High School, School District 8

Tammy Stewart  
Physical Education and Science Teacher  
Miramichi Valley High School, School District 16
**Introduction**

The goal of the *Wellness Through Physical Education* curriculum is to promote healthy active living for life. The course is intended to encourage a broad-based exploration of a variety of activities, highlighting non-traditional approaches to fitness and wellness (e.g., yoga, hiking, ultimate frisbee, personal training, Tai Chi). As a result, the course offers a range of learning experiences for students that encourage healthy active living, but are not sport specific.

The course will be for students who have successfully completed Grade 9/10 Physical Education and Health and wish to personalize their learning by researching, self-assessing and determining personal preferences for engaging in lifelong physical activity. Students will apply knowledge of fitness and wellness concepts to the creation of a personal healthy active living plan.

The need for this curriculum has grown from the fact that almost half of the fifty high schools in the province of New Brunswick have successfully implemented local option programs in Physical Education/Wellness. This curriculum draws on the work of many teachers who developed the various local options. It is intended to be a grade 11 elective, but will also be open to Grade 12 students as appropriate.

**Rationale**

In New Brunswick, it has proven a challenge to engage students in healthy, active living. Canada's Physical Activity Guidelines recommend that children and youth should spend less than 2 hours per day in sedentary activities (e.g. watching TV, computer time). Based on responses from 33,000 students from New Brunswick middle and high schools, 57% of students reported that they did not meet this standard (HERG, 2008). This provides a strong rationale to encourage active living for students, perhaps through more innovative or alternative ways than have been attempted in the past.

“Fit for the Future,” a physical education curriculum focused on non-traditional physical activities, has proven a positive learning experience for students in Spokane, Washington. The evaluation team for this project (Chase, Ballard, Repovich & Morley, 2003) report that this approach to physical education “...shows potential for motivating young people to seek a lifetime of wellness (p.11).”

Corbin (2002) suggests engaging students in physical activity similar to what active adults pursue. This has shown promise in achieving positive, long-lasting benefits. By participating in more active living
lifestyle choices, students see the “link between physical education and the real world” (p. 29). Similar findings supporting non-traditional approaches to physical education are readily available in the research (Beedle, 2000; Boyes, 2000; Cogstaff 2000; Wigmore & Stirling 1997).

**Approaches to Teaching**

In recent years, significant research has indicated the effectiveness of a student-centred approach to learning that is often referred to as constructivist or inquiry-based. Simply stated, this approach refers to the concept that learners construct knowledge for themselves. “Each learner individually (and socially) constructs meaning as he or she learns” (Hein 1991). The result is that teachers then focus on the needs of the learner more than the subject or lesson being taught. As a result, the curriculum outcomes focus primarily on what the students are expected to learn rather than what the teacher is expected to teach. The research that builds from the constructivist approach indicates significant success when “problem-based learning, group work, peer and cooperative learning, constructive listening, problem solving, and role plays …” are used (Donovan, 2002). These approaches foster essential learning and lifelong skills.

A fundamental principle of this course is that students assume responsibility for their own learning through a sense of inquiry. Since this concept may be new to many students, teachers should take time at the beginning of each unit to discuss methods of organizing and brainstorming the big questions for inquiry and directing students toward resources that support their pursuit of knowledge.

Traditional approaches to physical education have been questioned in the educational literature and also by teachers in New Brunswick during the formulation of this curriculum. The use of other student-centered approaches such as Teaching Games for Understanding (TGfU), have been shown to make learning more meaningful and improve motivation for participating in physical activity (Donovan 2002).

The three essential influences on motivation for physical activity are perception of confidence, enjoyment, and social support. The structuring of activities and environments to facilitate these factors can “impact significantly on the difference between lifelong physical activity and high levels of inactivity. The notion of allowing students choices about physical activity has proven to be effective in maintaining their interest and improving their participation in physical activity” (Donovan 2002).

Students should be encouraged to find strategies to link their learning in this course to their studies in other courses, especially in English language arts, social studies, science, technology, fine arts, business and life skills.
Universal Design for Learning

The New Brunswick Department of Education and Early Childhood Development’s definition of inclusion states that every child has the right to expect that … his or her learning outcomes, instruction, assessment, interventions, accommodations, modifications, supports, adaptations, additional resources and learning environment will be designed to respect his or her learning style, needs and strengths.

Universal Design for Learning is a “framework for guiding educational practice that provides flexibility in the ways information is presented, in the ways students respond or demonstrate knowledge and skills, and in the ways students are engaged. It also “…reduces barriers in instruction, provides appropriate accommodations, supports, and challenges, and maintains high achievement expectations for all students, including students with disabilities and students who are limited English proficient.” (CAST, 2011).

In an effort to build on the established practice of differentiation in education, the Department of Education and Early Childhood Development supports Universal Design for Learning for all students. New Brunswick curricula are created with universal design for learning principles in mind. Outcomes are written so that students may access and represent their learning in a variety of ways, through a variety of modes. Three tenets of universal design inform the design of this curriculum. Teachers are encouraged to follow these principles as they plan and evaluate learning experiences for their students:

- **Multiple means of representation**: provide diverse learners options for acquiring information and knowledge
- **Multiple means of action and expression**: provide learners options for demonstrating what they know
- **Multiple means of engagement**: tap into learners’ interests, offer appropriate challenges, and increase motivation

For further information on Universal Design for Learning, view online information at [http://www.cast.org/](http://www.cast.org/) and in the appendices section of this document.

Assistive Technology

Assistive technology for learning (ATL) refers to the devices, media and services used by students with physical, cognitive, sensory, speech, learning or behavioural disabilities that allow them to actively engage in improving or maintaining their ability to meet learning outcomes. ATL assists students in performing functions that would otherwise be difficult or impossible to accomplish independently. ATL requires ongoing collaboration in planning, implementing and monitoring. It does not replace instruction in academic or social skills and is specific to task rather than exceptionality.
There are many tools available to educators to support the diverse learning needs of students. Included in the appendix section of this document are suggested tools that may assist learning for a variety of needs. Educators are encouraged to collaborate with the Student Support Services team in their school to determine suitable supports, in addition to assistive technology, for promoting optimal learning experiences for their students. For suggested assistive technology, refer to the appendices section.

**Time Allocation and Scheduling**
This curriculum document assumes a minimum 90 hours of classroom and activity time. It is therefore seen as a semester-long program. With anticipated interruptions to this time, it is essential that teachers consider equal distribution of time for the specific outcomes. An integrated approach through the suggested units will allow for flexible attention to a number of outcomes within individual learning experiences. It is recommended that when possible, the class be scheduled before or after lunch to allow for additional flexibility for a variety of learning experiences.

**Practical and Classroom Time**
The curriculum is intended to take place primarily in gyms, outdoors, on playing fields, and in other community settings. Some direct instructional time will be required for the health and theory related outcomes that are required. It is recommended that a maximum of 40% of the program be theory-based (e.g., readings, learning labs, research/presentations) and a minimum of 60% be activity-based. This could be 2 days per week a theory/instruction focus, with 3 days in an activity area. It may also be block scheduled for each day with combined theory and part activity, as long as the minimum 60% activity time is maintained.

**Assessment and Evaluation**
Assessment is the systematic gathering of information about what students know and are able to do. Student performance is assessed using the information collected during the evaluation process. Teachers use their professional skills, insight, knowledge, and specific criteria that they establish to make judgments about student performance in relation to learning outcomes. Students are also encouraged to monitor their own progress through self assessment strategies such as goal setting and rubrics.

Research indicates that students benefit most when assessment is regular and ongoing and is used in the promotion of learning (Stiggins, 2008). This is often referred to as formative assessment. Evaluation is less effective if it is simply used at the end of a period of learning to determine a mark (summative evaluation).
It is recognized that summative evaluation is usually required in the form of an overall mark for a course of study and rubrics are recommended for this task. Sample rubrics are included in this document as a suggested guideline, acknowledging teachers may have alternative measures they will apply to evaluate student progress.

It is not recommended that marks be offered based on criterion referenced testing, particularly in the area of fitness (for example – Do 50 push-ups and get an A) but rather should be based on individual improvement toward personal goals.

Some examples of current assessment practices include:
- Questioning
- Observation
- Projects and Investigations
- Conferences
- Demonstrations
- Checklists
- Presentations
- Self and peer assessment
- Rubrics
- Simulations
- Learning Logs
- Reflective Journals
- Responses to texts/activities
- Technology Applications - (e.g., wikis, blogs, discussion forums)
- Demonstrations
- Checklists
- Projects and Investigations
- Conferences
- Demonstrations
- Learning Logs
- Reflective Journals
- Responses to texts/activities
- Technology Applications - (e.g., wikis, blogs, discussion forums)
- Performance-based assessment/Portfolios

For further elaboration on these forms of assessment, see the appendices section. For further reading in the area of assessment and evaluation, visit the Department of Education and Early Childhood Development’s Assessment and Evaluation site at

**Essential Graduation Learnings**

Graduates from the public schools of Atlantic Canada will be able to demonstrate knowledge, skills, and attitudes in the following essential graduation learnings. These learnings are supported through the outcomes described in this curriculum document.

**Aesthetic Expression**
Graduates will be able to respond with critical awareness to various forms of the arts and be able to express themselves through the arts.

**Citizenship**
Graduates will be able to assess social, cultural, economic, and environmental interdependence in a local and global context.

**Communication**
Graduates will be able to use the listening, viewing, speaking, reading, and writing modes of
language(s) as well as mathematical and scientific concepts and symbols to think, learn, and communicate effectively.

**Personal Development**
Graduates will be able to continue to learn and to pursue an active, healthy lifestyle.

**Problem Solving**
Graduates will be able to use the strategies and processes needed to solve a wide variety of problems, including those requiring language, mathematical, and scientific concepts.

**Technological Competence**
Graduates will be able to use a variety of technologies, demonstrate an understanding of technological applications, and apply appropriate technologies for solving problems.

**Layout of the Document**
Expected learning is presented in a framework that includes the general and specific curriculum outcomes, including what students are expected to know and do as a result of this course. An overview of the suggested units is provided and within each unit, the following outline is followed:

*Essential Questions* which drive the learning required for the course, but are open to discussion, debate and ongoing reflection.

*Guiding Questions* which tie more specifically to the suggested teaching and learning strategies.

*Specific Outcomes* addressed in the unit are indicated.

*Teaching and Learning Strategies* are suggested to reach the specific outcomes of the unit. These suggestions include resources recommended to teach and assess the learning outcomes.
Works Cited

The following works have been referenced throughout this document.

Department of Wellness, Culture and Sport & Health and Education Research Group, UNB (2008). New Brunswick Student Wellness Survey Grades 6 to 12.

Department of Wellness, Culture and Sport & Health and Education Research Group, UNB (2011). New Brunswick Student Wellness Survey Grades 6 to 12.

Curriculum Outcomes

The goals for student learning in *Wellness Through Physical Education 110* are organized in an outcome framework. The “big ideas” of the course are stated in three general curriculum outcomes, and each of these is further articulated in specific curriculum outcomes. The outcome statements identify what students will know and be able to do as a result of the teaching and learning in the course. Know and Do statements, directly following each specific outcome, will assist the teacher to assess the knowledge and skill level of students in order to target instruction and intervene appropriately to support achievement.

Following the outcome framework are suggested units of study which include more detailed teaching and learning strategy suggestions. The tables below are intended to provide a broad overview of the scope of the learning.

### G.C.O. 1.0 Students demonstrate an understanding of the concept of wellness.

#### Navigate to Units of Study: Choosing Wellness, *Wellness in the World Around Us*, Opening Doors to Living Well, Taking Action on Wellness

<table>
<thead>
<tr>
<th>S.C.O.</th>
<th>Know (Students will know…)</th>
<th>Do (students will)</th>
</tr>
</thead>
</table>
| 1.1 Students investigate what it means to be well. | • there are varied definitions and dimensions to wellness (e.g., physical, intellectual, emotional, social, *spiritual, environmental and occupational*)  
• many aspects affect wellness, including, but not limited to, the health care system and lifestyle choices  
• a well society contributes to personal wellness  
*This is not intended as a religion-specific reference. Spirituality is an all-encompassing term that promotes the principles of harmony, respect, interdependence, and balance.* | • research how wellness is defined in multiple sources (e.g., print, online, media) and evaluate the credibility of sources for purpose, bias or intent  
• compare personal definitions of wellness with credible sources  
• investigate the interdependence of personal and societal wellness  
• present findings to classmates |
| 1.2 Students evaluate and address personal wellness needs. | • a variety of tools assist in assessing personal wellness (e.g., learning labs, wellness wheel)  
• personal wellness is attained in different ways  
• specific goal-setting and monitoring assists in improved wellness  
• wellness standards vary among individuals  
• risk-taking behaviours impact personal wellness  
• examples of risk-taking behaviours (e.g., substance abuse, addictive behaviours, sexual decision making, vehicle safety)  
• proactive decision making strategies protect personal health and wellness  
• decision making strategies include SWOT, Pros, Cons and Questions, W.W.I.N Problem-solving Process (see appendices) | • collect data on personal wellness and summarize findings  
• identify how to address personal wellness while respecting individual preferences/differences  
• monitor progress and refine SMART goals when necessary  
• examine impact on others  
• take inventory of personal risk-taking behaviours (public disclosure is not necessary)  
• discuss appropriate actions to... |
### G.C.O. 2.0 Students engage in a healthy, active lifestyle.

| 2.1 Students access community wellness resources | • every community has assets to support active living.  
• active living does not need to be costly; alternatives are available.  
• physical activities lead to enhanced wellness. | • participate in a wide variety of new activities and evaluate enjoyment levels  
• create a database of local contacts and wellness activities  
• make contact with an individual or organization to discuss wellness supports  
• schedule a visit (by distance or face to face) to the facility/person |
| 2.2 Students design wellness activities for varying audiences | • different target groups have different needs.  
• flexibility in planning will result in more participation and increased impact  
• traditional activities can be adapted to fit varying audiences and circumstances  
• wellness activities may continue in the event of injury or other life circumstances | • select an accessible target group to design physical activities: (e.g., elementary-aged students, peer groups, pregnant women, seniors)  
• conduct a needs-assessment to determine the wellness focus for the group  
• provide a plan to the group and develop data collection tools (e.g., questionnaires, interview questions) to evaluate success. |
| G.C.O. 3.0   Students synthesize information to create personal wellness plans. |
| Navigate to Units of Study: **Choosing Wellness, Wellness in the World Around Us, Opening Doors to Living Well, Taking Action on Wellness** |
|---|---|
| **S.C.O.** | **Know** | **Do** |
| 3.1 Students examine health and skill related fitness components. | • basic anatomy/physiology (e.g., various systems such as skeletal, cardiovascular, muscular- see [http://www.innerbody.com/htm/body.html](http://www.innerbody.com/htm/body.html) | • review/ pre-test of the health and skill related fitness components (from Gr. 9-10 program). |
|  | • health related fitness (e.g., cardiovascular, muscular strength, muscular endurance, flexibility and body composition). | • analyze personal data (fitness results) in comparison to National Standards (see [http://www.csep.ca/english/View.asp?x=460](http://www.csep.ca/english/View.asp?x=460)) according to one's age and gender. |
|  | • fitness testing (may include beep test, Illinois agility run, push-ups, crunches, down-ups, step-ups, shuttle run, vertical jump, sit and reach, resting heart rate/recovery rate) | • fitness testing (may include beep test, Illinois agility run, push-ups, crunches, down-ups, step-ups, shuttle run, vertical jump, sit and reach, resting heart rate/recovery rate) |
| 3.2 Students evaluate nutritional suggestions for healthy eating | • there are suggested guidelines for optimal eating | • research and debate the validity of traditional nutritional guidelines (see [http://evolvingwellness.com/posts/790/eating-food-guide-harm-good/](http://evolvingwellness.com/posts/790/eating-food-guide-harm-good/)) |
|  | • varying diets can be healthy | • examine recommended diets and consider the pros and cons of each |
|  | • food sensitivities affect choices. | • complete a 5-day food journal analysis (Pre and Post self-reflection) and evaluate using one of the nutritional guides researched |
|  | • portion size and caloric intake affect health and wellness. | • critically review portion sizes, reading of food labels, salt/sugar content, daily caloric requirements, hydration, sport drinks, energy drinks, food trends, food technologies and consider the influence of marketing strategies |
|  | • all food is required to label contents for nutritional values. | |
|  | • marketing of products may be misleading to the public (e.g., labels such as “all natural”, “light,” “low fat”, “organic,” “locally grown) see [Real food connection](http://realfoodsfredericton.ca/2010/) | |
| 3.3 Students investigate the impact of mental fitness on healthy living | • there are three psychological need areas: competence, autonomy and relatedness | • identify existing strategies within the school environment that currently contribute to meeting the needs of competence, autonomy and relatedness |
|  | • these needs are key to being motivated and making changes in health lifestyle behaviours | • brainstorm, with their peers, ways in which the needs for competence, autonomy, and relatedness can be met in their classroom, school and community |
|  | • these needs are affected by their own thoughts, feelings and experiences | • identify personal stories or interview others re: how meeting or not meeting the need of competence, autonomy and/or relatedness either increased or reduced motivation to make healthy choices (e.g. my friend invited me to go bowling on the weekend. I had never tried it but it was fun being with my friend, and they helped me learn the skill) |
|  | • these needs are met in environments that provide recognition, choices and inclusion | • evaluate personal levels of competence, autonomy or relatedness and discuss |
|  | • personal attitudes and behaviours impact the mental fitness of others | |
3.4 Students create a healthy active living plan applying fitness principles, nutritional guidelines and mental fitness.

- fitness principles (specificity, overload, progression, reversibility, adaptation, FITT (frequency, intensity, type and time), and maintenance)
- common fitness standards
- personal wellness planning needs to adapt to life's circumstances (e.g., young adult, career years, pregnancy and beyond)

- deconstruct a variety of fitness tests as they relate to physical well-being
- record the implementation of the plan
- evaluate and re-evaluate one's plan
- personally reflect regarding success and challenges with implementation and consistency.
Suggested Units of Study in Wellness Through Physical Education 110

The following four units are suggested frameworks to organize learning and to provide a variety of opportunities for students and teachers to explore, research, and experience a healthy, active lifestyle. The New Brunswick portal offers many research tools that link students to reputable sources for content. This link is available under teacher learning resources, research tools @ https://portal.nbed.nb.ca/tr/rt/Pages/default.aspx

Each unit provides inquiry questions to guide the development of the knowledge and skills outlined in the curriculum outcomes. Inquiry questions will help situate each unit in a real-world context. They are intended as suggestions only as teachers and students may develop units and accompanying questions that are interesting and relevant in their own contexts. It is important to note that although outcome links are provided, they are not discrete, one-time learning experiences. As the student delves deeper into their learning, revisiting of concepts and prior learning will influence further understanding of all outcomes.

NOTE: Information gathered within each of these units will be utilized throughout the course to inform goal setting and provide ongoing documentation for the Healthy Active Living Plan.

Choosing Wellness *recommended as a starting point
In this unit, students examine resources that define wellness. Students will revisit health and skill-related components, learn about mental fitness and investigate nutritional guidelines for a healthy lifestyle. A comparison of findings with personal status will inform students in beginning to monitor and address their wellness needs. (Outcomes 1.1, 1.2, 3.1, 3.2, 3.3) **Suggested Timeline: 5-6 weeks or approximately 40% of the course**

Wellness in the World Around Us
Students will examine influences to wellness such as culture, media and societal views. An examination of risk-taking behaviours that may result from these influences will engage students in determining decision-making strategies for healthy choices. The concept of mental fitness and its impact on decision making will be a critical element to be addressed. (Outcomes 1.2, 1.3, 2.1, 3.3) **Suggested Timeline: 3-4 weeks or approximately 20% of the course**

Opening Doors to Living Well
In this unit, students will explore community resources for healthy active living and participate in a variety of physical and wellness activities. Creating their own wellness activities will challenge students to find ways to stay active with limited resources or choices. This exploration will culminate in the creation of a personal healthy active living plan (Outcomes 2.1, 2.2, 3.1, 3.2, 3.3, 3.4) **Suggested Timeline: 3-4 weeks or approximately 20% of the course**

Taking Action On Wellness
Students will synthesize all they have learned to help another group to address health and wellness issues. This whole class enrichment opportunity will involve investigating local needs and planning to lead as well-informed supporters. Students will work in teams to select a target group, gather data on current status and collaboratively create an action plan to lead the participants to enhanced wellness. (1.1, 1.3, 2.1, 2.2, 3.1, 3.2, 3.3, 3.4) **Suggested Timeline: 3-4 weeks or approximately 20% of the course**
Approach to Teaching: Inquiry-based Learning
The Inquiry Approach and Essential Questions

Using inquiry to guide learning will support development of critical thinking, problem solving, collaboration, and communication competencies. These are included within the competencies that have been identified as core learning that is expected of all New Brunswick graduates (see appendices). Students will act as researchers, community activists, and agents of change. The students will gain a deeper understanding of the material and where it fits into their world by guiding their learning through essential questions.

Essential questions are considered to be:

- important questions that recur throughout one’s life – they are broad, timeless, and they have no definitive answer. For example, “What does it mean to be well?”
- key questions within a discipline – they point to the big ideas of a subject. For example, “What drives people to pursue healthy, active lifestyles?”
- questions required for learning core content – they make sense of important but complicated ideas, knowledge and skills. For example, “What elements are most effective in developing personal wellness plans?”

Grant Wiggins, in the Authentic Education e-journal, articulates a question is essential when it:

1. causes genuine and relevant inquiry into the big ideas and core content;
2. provokes deep thought, lively discussion, sustained inquiry, and new understanding as well as more questions;
3. requires students to consider alternatives, weigh evidence, support their ideas, and justify their answers;
4. stimulates vital, ongoing rethinking of big ideas, assumptions, and prior lessons;
5. sparks meaningful connections with prior learning and personal experiences;
6. naturally recurs, creating opportunities for transfer to other situations and subjects;

(Source: http://www.authenticeducation.org/bigideas/article.lasso?artId=53)

The essential questions, related course work, and the units of study that comprise Wellness Through Physical Education 110 will build a learning community, motivate students, and encourage pursuit of independent interests. Students should be encouraged and supported to develop and research essential questions and performance products will showcase the skills and knowledge the students are acquiring.

Units of Study Guide Inquiry

As described above, four big units of study guide the inquiry in Wellness Through Physical Education 110.

Each unit features suggested essential questions and sample questions for guiding research and discussions. Instructional suggestions are provided to assist teachers in planning learning opportunities to develop the knowledge and skills articulated in the curriculum outcomes.

## Choosing Wellness

- What is healthy teen living?
- What do we need to know and do in order to be well?

## Wellness in the World Around Us

- What influences our view of wellness?
- What risks can harm us? How do our decisions affect others?

## Opening Doors to Living Well

- What is needed in a community to support wellness?
- What makes the best personal wellness plan?

## Taking Action On Wellness

- How can our knowledge influence others?
- What does it mean to lead? What does it mean to engage others?
## Unit of Study: Choosing Wellness

**Choosing Wellness:** In this unit, students examine resources that define wellness. Students will revisit health and skill-related components, learn about mental fitness and investigate nutritional guidelines for a healthy lifestyle. A comparison of findings with personal status will inform students in beginning to monitor and address their wellness needs. **Note:** This unit will require the most instructional time as it establishes fundamental knowledge required to complete other units of study. More theoretical time (as compared to activity time) may need to be blocked in order to build this background knowledge.

<thead>
<tr>
<th>Planning Ahead: There are two required assignments for the course</th>
</tr>
</thead>
</table>

1) Healthy Active Living Plan (Individual) and 2) Community Action Wellness Plan (Group)

It is important that the teacher introduces the culminating learning expectations for the course. Students will be expected to apply their knowledge and synthesize information by developing a personal healthy active living plan (individual) and developing a community action wellness plan (group). Students should develop and refine the plans throughout the semester and be provided with ongoing feedback from teachers, peers and community resources. Rubrics provided in Appendix E should be shared/created at the beginning of the course to clarify expectations for student work.

Teachers are encouraged to select strategies that motivate and build on student interest and establish purpose for each activity. The before-during –after learning framework (see Appendix A) will guide learning experiences to ensure comprehension is supported.

### INTRODUCING THE CONCEPT OF WELLNESS

#### Before reading or learning

Teachers should assess students’ understanding of the topic of wellness by using an Activating Prior Knowledge strategy which could include:

- Brainstorming-Think, Pair, Square, Share
- Mind Maps
- KWL (Know-Wonder-Learned) Charts
- T Chart – Wellness Is, Wellness Is Not

**Note:** these graphic organizers are all available in Appendix A of this document.

This can act as both a self-assessment for personal student learning plans and group assessment to guide instruction.

Three excellent resources for mental fitness include:

1) Gladsi @ [http://www.gladsi.com/](http://www.gladsi.com/) which includes student made videos that students can view and discuss

2) the Joint Consortium for School Health ([http://eng.jcsh-cces.ca/](http://eng.jcsh-cces.ca/)) (a healthy school planner is available at this link: [http://www.healthyschoolplanner.uwaterloo.ca/jcshsite_app/controller/index.cfm](http://www.healthyschoolplanner.uwaterloo.ca/jcshsite_app/controller/index.cfm)

The selection of wellness related reference material should be readily available to all students and should be collaboratively added to during the course by both teacher and students. Students should be encouraged to critique and validate sources.

The teacher is encouraged to use strategies intended for previewing and reading a variety of sources including:

- Previewing a Textbook (see Appendix A)
- Scavenger Hunt (see Appendix A)
- Diagramming (see *Stepping Out* Teacher Resource book p. 110)
- Web Site Critique (see *Stepping Out* Teacher Resource book p. 110)

**During Reading and Learning**

Students Investigate the meaning of wellness: use a variety of sources and assure students have a broad understanding of the dimensions of wellness. To assist students in making meaning of material, a variety of strategies can be used which could include:

- Self Directed Focus Questions (for an example, see Appendix A)
- Note-making Frameworks (see Appendix A)
- Rotating Groups or Papers (see *Stepping Out* Teacher Resource book p. 94-95)

Note: When a strategy is first introduced it will require active teacher direction and modeling. In subsequent uses teacher mentoring and guidance will be the goal, leading to student independent use. See the video *Gradual Release of Responsibility* ([http://www.youtube.com/watch?v=T2kthBiYHF4](http://www.youtube.com/watch?v=T2kthBiYHF4)) which models this process.

Once students have been introduced to resources, guide them to investigate: What are the dimensions of wellness? Do different groups define wellness differently?

**After Reading and Learning**

Students assess their personal wellness including risk taking behaviors and reflect on the results. Lab 1-2 pg 23-26 in A Wellness Way of Life is a possible wellness inventory, as well as the Wellness Wheel included in the appendices. Of the varied ways to assess wellness, which approach do students find more meaningful? For what reason(s)?
NUTRITIONAL GUIDELINES

Students compare and contrast strengths and weaknesses in a variety of recommended diets and nutritional plans.

- SWOT Analysis (see Appendix A)
- Three Level of Questioning (see Appendix A)
- Debate

Based on their findings, students will select a healthy nutritional guideline to follow. Students predict their nutritional consumption for a five day period and then maintain a five day food journal. See the sample journal outline provided in the appendices. Students analyze the results of their choices.

- Guiding Questions (see start of unit)
- Pros, Cons and Questions (see Appendix A)

Suggested guiding questions could be brainstormed with class or in small groups and may include: Was there balanced intake of the food groups? Was there adequate hydration? What are the barriers to healthy eating? What strategies could be put in place to improve nutritional choices?

Students should review food labels, portion sizes, salt/sugar content, caloric requirements, etc. http://www.hc-sc.gc.ca/fn-an/food-guide-aliment/index-eng.php

Note: The powerpoint at this link includes speaker notes.

The teacher are encouraged to expose students to people who work in the area of wellness through reference material, community resources and guest speakers so they conduct their inquiry with authentic purpose and from the perspective of an audience.

HEALTH AND SKILL RELATED FITNESS COMPONENTS

Students will review health and skill related fitness components, including basic anatomy and health related fitness (see http://www.innerbody.com/htm/body.html) and take pre-tests to measure their current status.

See the article in the Globe & Mail regarding the recent reduction in the National Fitness Standards Guidelines http://www.theglobeandmail.com/life/health/canada-to-ease-physical-fitness-guidelines/article1857880/ Do students agree that these should have been changed?

Students participate in basic fitness testing to establish a baseline. Explain that this data will be measured toward the end of the course as they become more active in healthy active living. View http://topendsports.com/testing/tests.htm for testing examples. For an audio of
For many students, this will be an entirely new concept. Explain the three components of mental fitness: competence, autonomy, and relatedness. Invite students to review the information in the appendices titled: What is Mental Fitness?

Students will measure their own mental fitness and reflect on the findings. There is a mental fitness self assessment tool available in the appendices section of this document. Another method of measuring mental fitness is through http://www.psych.rochester.edu/SDT/measures/bpns_description.php

Another good resource for this area is Stressed Teens at http://www.stressedteens.com/ which encourages teens to be mindful and focus their energy into positive actions and thoughts.

The Gladsi site (http://www.gladsi.com/) is a site developed by youth that includes scenario videos and guiding questions to spur discussion on various topics.

Discuss with students that these needs are affected by their own thoughts, feelings and experiences. Further exploration of mental fitness will occur in the unit Wellness in the World Around Us.

CULMINATING THINKING AND LEARNING: Planning Ahead

Students apply their knowledge and synthesize information reviewed to generate a personal definition of wellness. This definition should be revisited, justified and revised as necessary throughout the course. A beginning healthy, active living plan should be started, reflecting on results from the nutritional, skill related and mental fitness assessments. What beginning steps may be taken to begin to address wellness?

It is important the teacher introduces the culminating learning expectations for the course: Developing a personal wellness plan (individual) and developing a community action wellness plan (group). Students should develop and refine the plans throughout the semester and be provided with ongoing feedback from teachers, peers and community resources.
Unit of Study: Wellness in the World Around Us

Students will examine influences to wellness such as culture, media and societal views. An examination of risk-taking behaviours that result from these influences will engage students in determining decision-making strategies for healthy choices. The concept of mental fitness and its impact on decision making will be a critical element to be addressed.

<table>
<thead>
<tr>
<th>Essential Questions</th>
<th>Guiding Questions</th>
</tr>
</thead>
<tbody>
<tr>
<td>What influences our view of wellness?</td>
<td>How does culture, media and society impact wellness?</td>
</tr>
<tr>
<td>What risks can harm us? What obstacles lead people to abandon wellness?</td>
<td>What can I identify in my own school community as an influence on wellness?</td>
</tr>
<tr>
<td></td>
<td>What role does mental fitness play in making decisions about healthy living?</td>
</tr>
<tr>
<td></td>
<td>How am I refining and building my personal wellness plan?</td>
</tr>
<tr>
<td></td>
<td>What data will help to inform my choice of a target group to develop a healthy active living plan?</td>
</tr>
</tbody>
</table>
### Unit of Study: Wellness in the World Around Us

<table>
<thead>
<tr>
<th>Curriculum Outcomes</th>
<th>Suggestions for Teaching and Learning</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.2 Students evaluate and address personal wellness needs.</strong></td>
<td><strong>Before</strong></td>
</tr>
</tbody>
</table>
| **1.3 Students analyze how society, media and culture influence wellness**           | **Addressing Wellness Needs**  
Review Personal Plans and Definitions developed in Unit 1.  
Based on their personal wellness assessment results, nutrition findings and mental fitness, students will develop SMART Goals (see [http://www.topachievement.com/smart.html](http://www.topachievement.com/smart.html)) that they can commence immediately and include in their personal healthy active living plan.  
Students can work in small groups to analyze and refine their SMART Goals. Classroom Physical arrangement can be adjusted to promote discussion. Consider trying:  
- Rotating Groups (see *Stepping Out* Teacher Resource p.94) |
| **2.1 Students access community wellness resources**                                 | **During**                                                                                                                                                           |
| **3.3 Students investigate the impact of mental fitness on healthy living**         | **Influences on Wellness**  
Students use a variety of sources and media to compare past and current societal trends in wellness (e.g., tanning, smoking, alcohol consumption, seat belt use, cell phone use) and plan a method of sharing their findings.  
Encourage use of strategies introduced in unit 1 when conducting research and gathering facts.  
- Modelling or Think Aloud  
- Provide Focus Questions  
- Have students draw mind map  
- Jointly devise a retrieval chart or note-making framework |
| **After**                                                                           | **After**                                                                                                                                                           |
| **Guide students to work together to apply their knowledge of negative societal trends to generate possible scenarios, such as those found at the following:** [http://www.hc-sc.gc.ca/hc-ps/pubs/tobac-tabac/second-guide/index-eng.php](http://www.hc-sc.gc.ca/hc-ps/pubs/tobac-tabac/second-guide/index-eng.php) and [http://www.nbatc.ca/home.shtml](http://www.nbatc.ca/home.shtml)  
Students can present their findings using the medium of their choice. Encourage or seek opportunities for students to have an authentic audience for their findings including:  
- Community Service Announcements  
- Brochures to share with school or identified target group  
- Presentations for town/city council, school or district administration |
• Videos for school announcements or community television, Wellness and Sport Facebook Page, You Tube

Students identify societal norms that may go unchallenged or questioned. Students can identify strategies to counteract negative choices. Possible source Lab 1-3 p.27 of A Wellness Way of Life.

Teachers check understanding, knowledge, confusion and contribution of students regularly. Consider using Entrance and Exit Slips with attention to a particular topic or skill or concept.

EXPLORING CONNECTIONS: MENTAL FITNESS

Review the concept of mental fitness with students (competence, autonomy and relatedness). What did they learn about this topic in Unit 1? Discuss how these three areas impact how we view ourselves and the decisions we make.

Identify initiatives within the school that contribute to meeting the needs of competence, autonomy and relatedness for students. Are these activities that all students can access? In what other ways may these needs be met?

Encourage students to reflect on some of the risk-taking behaviours they have experienced and how these may relate to the tenets of mental fitness. In relation to their own personal risky behaviour, students can complete a Risk Taking Questionnaire: http://testyourself.psychtests.com/testid/2122 How do competence, autonomy and relatedness affect motivation to make healthy choices?

ACCESSING COMMUNITY RESOURCES

Students are encouraged to use local data to analyze the New Brunswick Student Wellness Survey with a focus on Mental Fitness, Social Relationships and Influences, Environment and Tobacco and other Substance Use. Students can get data for the province, district and often their school by visiting http://www.gnb.ca/0131/StatsRea-e.asp.

In addition to the fact sheets released, classes may also request more detailed data based on particular survey questions. For a copy of the survey, go to the appendices section of the document.

Students can present their findings in the medium of their choice and strategize possible actions for their school community.

This would be a good time to revisit school or community action frameworks developed in Unit 1. Student may elect to modify or change focus. If a class project is to be selected consider creating a project wall or project wiki where ideas can be shared.

Students are encouraged to revisit and adjust their personal wellness plans based on the findings of the questionnaire or other self-assessment strategies.
In this unit, students will explore community resources for healthy active living and participate in a variety of physical and wellness activities. Creating their own wellness activities will challenge students to find ways to stay active with limited resources or choices. This exploration will culminate in the creation of a personal healthy active living plan.

<table>
<thead>
<tr>
<th>Essential Questions</th>
<th>Guiding Questions</th>
</tr>
</thead>
<tbody>
<tr>
<td>What is needed in a community to support wellness?</td>
<td>What is available in my community to support a healthy lifestyle?</td>
</tr>
<tr>
<td>What makes the best personal wellness plan?</td>
<td>How can I create opportunities for healthy living when resources are limited?</td>
</tr>
<tr>
<td></td>
<td>What are non-traditional activities that contribute to wellness? Which do I prefer?</td>
</tr>
<tr>
<td></td>
<td>As I am in the community, what groups do I notice may need support for living well?</td>
</tr>
<tr>
<td></td>
<td>What information can I retrieve from previous learning to create my healthy active living plan?</td>

## Unit of Study: Wellness in the World Around Us

<table>
<thead>
<tr>
<th>Curriculum Outcomes</th>
<th>Suggestions for Teaching and Learning</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>2.1 Students access community wellness resources</strong></td>
<td>Students explore/investigate community facilities for youth, adults and seniors. Schools, Community Centres, Recreation Parks, Sport Fields, Outdoor Facilities, Green Space, Indoor Facilities (Curling, Field House). Visit <a href="http://www.recreationnb.ca">Recreation NB</a> to view information on recreation facilities and initiatives.</td>
</tr>
<tr>
<td><strong>2.2 Student design wellness activities for varying audiences.</strong></td>
<td>Explore/investigate community programming for youth, adults and seniors. Locations, times, types of activities, level of activity (Light, Moderate, Heavy), certified vs. non certified instructors, coaching, officiating, Weekday / Weekend programs/access to facilities. Kids of Steel @ <a href="http://triathloncanada.com/page.ch2?uid=KidsofSteel">http://triathloncanada.com/page.ch2?uid=KidsofSteel</a> is one New Brunswick program that targets long-term athlete development (LTAD) and may be of interest. Triathlons and other activities are also featured under the “programs” section of this site. Also, for LTAD opportunities to work with athletes as part of Special Olympics, visit Specials Olympics New Brunswick @ <a href="http://www.specialolympicsnb.ca/contact/sonb.htm">http://www.specialolympicsnb.ca/contact/sonb.htm</a> and review the variety of age levels with free program guides and training available (under the “programs” link).</td>
</tr>
<tr>
<td><strong>3.1 Students will examine health and skill related fitness components.</strong></td>
<td>Consider creating a wall chart, google map, or wiki that documents resources and makes them available to a broader audience. Students should collectively determine the criterion for including a facility and determine what information would be of interest to their audience and should be included.</td>
</tr>
<tr>
<td><strong>3.2 Students will evaluate nutritional suggestions for healthy eating</strong></td>
<td>Students investigate international sports and games played in various countries. (skills, equipment, facilities, individual vs team). Review the World Games site @ <a href="http://www.theworldgames.org/">http://www.theworldgames.org/</a> site to view various sports from around the world.</td>
</tr>
<tr>
<td><strong>3.3 Students investigate the impact of mental fitness on healthy living</strong></td>
<td>Students lead others in unknown sports and games, to identify whether rules, equipment, facilities of these international sports and games be modified in order to be implemented in the local community.</td>
</tr>
<tr>
<td><strong>3.4 Students create a healthy active living plan applying fitness principles, nutritional guidelines, and mental fitness.</strong></td>
<td>To improve access to recreation and wellness activities, students can investigate possible access to volunteers, explore developing partnerships to use/borrow equipment, facilities, and develop an understanding of corporate and in-kind contributions. For a directory of volunteers in areas in New Brunswick, go to <a href="http://www.canadian-universities.net/Volunteer/New_Brunswick.html">http://www.canadian-universities.net/Volunteer/New_Brunswick.html</a>.</td>
</tr>
<tr>
<td></td>
<td>Students review their possible community action plans and update them based on their knowledge of partnerships, access to resources and modified games/sports.</td>
</tr>
<tr>
<td></td>
<td>Students explore personal fitness programs which can be implemented at home (cardio, aerobics, sports, technology (Nintendo Wii, Microsoft Kinect, DVD’s) Read the article <a href="http://abcnews.go.com/Technology/SmartHome/story?id=4880635&amp;page=1">http://abcnews.go.com/Technology/SmartHome/story?id=4880635&amp;page=1</a> and discuss: Will this help people begin a healthy, active lifestyle? Ensure students support their opinions with the knowledge they have learned so far in the course.</td>
</tr>
</tbody>
</table>
Students should engage in further fitness assessment and reflect on performance in comparison to national norms for their gender and age group. Teachers can determine what tools are available in their community or school.

Students should revise their personal wellness and healthy living to reflect their understanding of community resources and programs, personal fitness level and at-home programs. They should also review progress in healthy eating and mental fitness goals established in previous units.
**Unit of Study: Taking Action On Wellness**

Students will synthesize all they have learned to help another group to address health and wellness issues. This will involve investigating local needs and planning to lead as well-informed supporters. Students will work in teams to select a target group, gather data on current status and collaboratively create an action plan to lead the participants to enhanced wellness.

<table>
<thead>
<tr>
<th>Essential Questions</th>
<th>Guiding Questions</th>
</tr>
</thead>
<tbody>
<tr>
<td>How can our knowledge influence others?</td>
<td>What potential group do I want to work with to support wellness activities?</td>
</tr>
<tr>
<td>What does it mean to lead? What does it mean to engage others?</td>
<td>How can I conduct an assessment with this group to determine their needs?</td>
</tr>
<tr>
<td></td>
<td>How can I take what I know and put it into action to help others?</td>
</tr>
<tr>
<td></td>
<td>What interpersonal skills are necessary to engage and lead others?</td>
</tr>
</tbody>
</table>

![Diagram](Ask - Investigate - Reflect - Create - Discuss)
## Unit of Study: Taking Action On Wellness

<table>
<thead>
<tr>
<th>Curriculum Outcomes</th>
<th>Suggestions for Teaching and Learning</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.1 Students investigate what it means to be well.</strong></td>
<td>Students will be expected to produce a culminating project for this unit. Both options are intended to be completed in small, collaborative groups.</td>
</tr>
<tr>
<td><strong>1.3 Students analyze how society, media and culture influence wellness.</strong></td>
<td>offer a sharing forum to provide information for various groups regarding wellness</td>
</tr>
<tr>
<td><strong>2.1 Students access community wellness resources.</strong></td>
<td>target a particular group/facility and design a wellness plan to meet the participants’ needs (this may include the students’ own or neighboring school)</td>
</tr>
<tr>
<td><strong>2.2 Students design wellness activities for varying audiences.</strong></td>
<td><strong>SHARING FORUM</strong></td>
</tr>
<tr>
<td><strong>3.1 Students will examine health and skill related fitness components.</strong></td>
<td>Students use their knowledge of wellness and their community to create an awareness campaign for a particular target group or an open audience. Students are guided to reflect on information gathered to date in previous units to insure their plan reflects a multi-dimensional approach to wellness. Students must demonstrate how the plan was modified to meet the needs of varying audiences.</td>
</tr>
<tr>
<td><strong>3.2 Students will evaluate nutritional suggestions for healthy eating.</strong></td>
<td>Project/campaign should demonstrate an applied understanding of society, media and culture analyzed in Unit 2. Where appropriate, students will use community wellness resources. A critical component of this project is that students will gather data and evaluate the effectiveness of their project/campaign.</td>
</tr>
<tr>
<td><strong>3.3 Students investigate the impact of mental fitness on healthy living.</strong></td>
<td>Examples of Projects could include: Wellness Evening, Senior Centre Fitness Day, Nutrition Fair, Sharing Healthy Recipes at a local grocery store, 100 Mile Recipe Book, Healthy Learners or Anti-bullying day at a local elementary school.</td>
</tr>
<tr>
<td><strong>3.4 Students create a healthy active living plan applying fitness principles, nutritional guidelines, and mental fitness.</strong></td>
<td><strong>PLANNING WELLNESS ACTIVITIES</strong></td>
</tr>
<tr>
<td></td>
<td>Students consider groups in their community to assist with wellness. Potential groups may include: elementary-aged students, seniors, volunteers who wish to improve their wellness, young mothers at home, etc.</td>
</tr>
<tr>
<td></td>
<td>Students consider the best way to approach this group, How might this message be communicated with sensitivity? How do we ensure the group sees this as a positive activity they may engage in?</td>
</tr>
<tr>
<td></td>
<td>Once a group has agreed, students will design a needs assessment to gather data to inform their plan. For suggestions on how to conduct a needs assessment with this group, go to <a href="http://www.internetraining.com/ID_Consult/3need/3need.htm">http://www.internetraining.com/ID_Consult/3need/3need.htm</a></td>
</tr>
<tr>
<td></td>
<td>Once results have been tabulated and a decision has been made, students design a plan that is executed, monitored and evaluated as a group.</td>
</tr>
<tr>
<td></td>
<td>For a final activity, students consider how this information can be shared with other similar groups (community boards/events, school website/wiki, newsletter, etc.)</td>
</tr>
</tbody>
</table>
Appendix A: Graphic Organizers

NOTE: A sampling of graphic organizers referred to in the teaching and learning strategies section of this document are included for your reference. Teachers are encouraged to preview a larger collection on the portal and in resource links suggested below.

Framework from Stepping Out, Reading and Viewing: Teacher’s Resources, p. 66
Critical Thinking Questions

Questions that Promote Critical Thinking (From the Atlantic Canada English Language Arts Curriculum)

- As readers and viewers reflect critically on texts, they need to ask questions such as the following:
- Who constructed this text? (age/gender/race/nationality)
- What are the writer’s/producer’s views/beliefs?
- For whom is the text constructed? To whom is it addressed?
- Where did it appear?
- For what purpose could the text be used?
- What does the text tell us that we already know?
- What does the text tell us that we don’t already know?
- What is the topic?
- How is the topic presented? What themes and discourses are being used?
- What are other ways in which this topic could be presented?
- What has been included and what has been omitted?
- Whose voices and positions are being expressed?
- Whose voices and positions are not being expressed?
- What is the text trying to do to the reader/listener/viewer? How does it do it?
- What other ways are there to convey this message?
- Should the message be contested or resisted?
Scavenger Hunt Question Outline

Prediction

- Read the front cover and back blurb. Identify the clues about the textbook’s subject.
- Make a list of five question that you think the book will answer.
- What do you think are the author’s qualifications for writing a book like this? What does the author have to know?

Introduction

- Locate the publishing information and find out when the book was published.
- How many reprints have there been?
- Why do you think that a publisher would reprint a book? What does that tell you about the content? the author?
- In your opinion, does this make it a “recent” publication? Why?

Overview of the Book’s Structure

- How many chapters are there?
- Check out two or three chapters: How are the chapters laid out? Are all the chapters laid out the same way? Are there chapter summaries, study guides, questions, pictures, maps, charts?
- Is there a glossary or index?
- Is there a reference list?
- Are there notes at the back of the book? Briefly tell what they are about.

Sharing Predictions

With your partner, compare your observations on the textbook so far:

- What topic does the book cover?
- What do you think that you’ll be expected to learn from this text?
- How do you see yourself using this book?
- How easy or hard does it appear to be?
- Can you find specific information in this book easily?
- What predictions can you make about this book: How will you use it? How will the teacher use it? How would you like it to be used?
Scavenger Hunt Question Outline (page 2)

Individual Chapter Layout

- Select a chapter.
- Are there headings in the chapter?
- Are there subheadings? How do the subheadings add to you understanding of what the chapter is about?
- Select one paragraph. Read it. Are there unfamiliar works? Are the words explained? Are you going to have to use a dictionary to understand some of the terms? Is there a glossary in the book to explain the words?
- Are there illustrations in this chapter? Are there clear captions with the illustrations to explain the content?
- List three other characteristics of this chapter.

Terminology

- On a scale or 1 to 5 where 5 is the highest, rate the print in this book: Is it easy to read?.
- Using the same 1 to 5 scale, rate the words in the text: Are they easy to follow and understand?
- Are there many difficult words on the page?
- Try the “five-finger exercise”: Start reading at the top of a page. Each time that you read a word that you don’t understand, hold up one finger. If you hold up five fingers by the end of the page, then the book may be challenging for you. Give the results of your fine-finger exercise.
- Are new words introduced, highlighted, or explained?

Questions

- With a partner, make a list of five questions about the book that will be of interest to you and your classmates. Think about:
  - how the book might be used
  - where you will find information on a particular topic
  - what other resources you might have to use to supplement the textbook
  - what films, TV shows, books, or magazines you know that connect to the topics in this textbook
### Previewing a Text

<th>• With other pairs, share your questions and try to answer them.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• Share unanswered questions with the whole class for resolution.</td>
</tr>
</tbody>
</table>
THINK – PAIR – SQUARE – SHARE

THINKING…90 SECONDS (suggested times only)
The teacher poses the question to the entire class. The question is also written where all students can see. Students are asked to respond with “bullet” responses. The teacher ensures that students think through the question independently and prepare their individual responses.

PAIRING…90 SECONDS
The teacher asks students to look for one other person to share responses.

Students exchange their responses with that one other person. They are free to add ideas as they share their responses.

SQUARING…4 MINUTES
The teacher asks students to join two pairs (square) and to come up with 7 ideas that respond to the original question. During this process, students are to consult with all people in the group. They “pool” their ideas into seven responses and prepare them to be shared with the group.

SHARING…4 MINUTES
Each group shares what they have collated. Students are encouraged to find “what comments are in common” from all of the groups. The teacher or a willing student may summarize the key points.
Mind Map

Put your main topic here and brainstorm ideas and links that come to mind (can be done individually, in pairs, or groups). Additional lines/shapes may be added.

Sentence Starters for Developing Questions

These sentence starters can help you develop questions.

1. Knowledge
   • List the steps for . . .
   • Identify the characteristics of . . .
   • Define the term . . .
   • Restate the events that led to . . .

2. Understanding
   • In your own words, what happened to . . .
   • Put these concepts in order . . .
   • Give examples of . . .
   • Why did . . .

3. Application
   • Put the ideas on a chart or diagram.
   • Draw a map to show . . .
   • Calculate the . . .
   • Retell this story from the point of view of . . .

4. Analysis
   • If this happens, then . . .?
   • What is the relationship between . . . and . . .?
   • What is the difference between the concept . . . and the fact that . . .?
   • What are the most significant developments . . .?

5. Synthesis
   • Create a new plan that . . .
   • Write a new ending so that . . .
   • Put yourself in the situation. What would you have done?
   • What would have happened if . . .?

6. Evaluation
   • Tell why you think that . . .
   • To what extent did . . .
   • Rate the options that . . .
   • In your opinion . . .

Appendix C: Supplementary Resources
MENTAL FITNESS

WHAT IS MENTAL FITNESS?

Mental fitness is our personal sense of psychological wellness.

A picture is worth a thousand words...

This image shows that Mental Fitness drives positive lifestyle changes. It leads the way to choosing healthy eating, being physically active and living tobacco-free.

We are more likely to be mentally fit when our needs for recognition, choices and belonging are met.

<table>
<thead>
<tr>
<th>Competence (Recognition)</th>
<th>Autonomy (Choices)</th>
<th>Relatedness (Belonging)</th>
</tr>
</thead>
<tbody>
<tr>
<td>I have abilities, strengths and gifts that are recognized by myself and others. When I use them to meet goals and help others I feel a sense of accomplishment and worth.</td>
<td>I have a voice and I am able to make decisions about things that are important to me and others. Others support me in my choices.</td>
<td>I feel that I belong and am connected to important relationships that support and encourage me. I also support and encourage others in spirit and action.</td>
</tr>
</tbody>
</table>

MENTAL FITNESS

How to build mental fitness into a program or activity?

A mental fitness approach can be used as part of the planning, implementation and delivery of a program or activity which will enhance the participant engagement and increase the quality and success of the program.

Considering the following suggestions will support a mental fitness approach.

Planning and implementation

During the planning and implementation of the program or activity you can...

- Ask the following questions:
  - Does the program recognize the skills and strengths of participants? (C)
  - Does the program offer choice and a voice to participants? (A)
  - Does the program encourage positive relationships? (R)
- Consider the needs of the target audience (R)
- Demonstrate respect, acceptance and interest in the input of others (C,A,R)
- Invite the community, parents and participants to share their skills and talents to strengthen and sustain the program (C,A,R)

Program/activity delivery

During the program or activity, the facilitator can...

- Plan activities with participants (C,A,R)
- Promote the development of new skills and knowledge (C) and encourage the participants to practice and apply those skills outside the program
- Provide opportunities for input or feedback (A)
- Consider the interests of the participants (A,R)
- Promote the success of the participants (C,R)
- Offer choices and the opportunity to make decisions (A)
- Acknowledge and celebrate skills and strengths (C,R)
- Encourage respect, inclusiveness and acceptance (R)

Three fundamental needs of mental fitness

C= Competence  A=Autonomy  R= Relatedness

Maintaining a Food Journal

You have been researching nutritional guidelines for healthy eating. Please indicate which guidelines you will be following as you record your eating for five days.

________________________________________________________________________

Please provide a rationale for why your research has led you to believe these are the best guidelines for you. Please include references to your findings that support your rationale.

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

For 5 days, one of which will be a weekend day, you will record everything that you eat and drink.

You will record all of this data to present your findings. Upon completion of your journal you will answer the following 5 questions:

1) Do you feel that you have a balanced diet?
2) Are you happy with any specific area of your diet?
3) How can you improve your diet? Be specific
4) What are some of the reasons why you were not successful? Or why were you successful?
5) Did you reach any of the goals that you set? If you could make one small change and set that as a goal for the next month, 3 months, 6 months what would that be?
### Student Wellness Survey - Department of Wellness, Culture and Sport

1. **What grade are you in?**
   - 5
   - 6
   - 7
   - 8
   - 9
   - 10
   - 11
   - 12

2. **How old are you today?**
   - 11 years or younger
   - 12
   - 13
   - 14
   - 15
   - 16
   - 17
   - 18
   - 19 years or older

3. **Are you ...**
   - Female?
   - Male?

4. **People living in Canada come from many different cultural and racial backgrounds. Are you ...?**
   (Mark all that apply)
   - White
   - Black
   - First Nation
   - Métis
   - Inuit
   - Korean
   - Chinese
   - Japanese
   - Asian
   - Latin American
   - Filipino
   - Ara
   - Other

5. **What language do you speak most often at home?**
   - English
   - French
   - Other

6. **How many years have you lived in Canada?**
   - Born in Canada
   - 1 year
   - 2 years
   - 3 to 5 years
   - 6 to 10 years
   - 11 or more years

7. **Which of the following best describes your marks during the past year?**
   - Excellent (Mostly A's/ above 85%/ or level 4)
   - Above Average (Mostly A’s and B’s/ 75 - 84%/ or level 3 - 4)
   - Average (Mostly B’s and C’s/ 60 - 69%/ or level 3)
   - Below Average (Mostly C’s/ 50 - 59%/ or level 2)
   - Poor (Mostly letter grades below C’s/ below 50%/ or level 1)

8. **How are you doing in school compared to other students in your class?**
   - Better than most
   - About the same as most
   - Not as well as most

9. **In the last 7 days, how much total time did you spend doing homework?**
   - None
   - Less than 1 hour
   - From 1 to 6 hours
   - From 7 to 13 hours
   - 14 or more hours

10. **In the last 7 days, how much total time did you spend reading, not counting for homework, at school or at work?** (Include: reading books, magazines and newspapers)
    - None
    - Less than 1 hour
    - From 1 to 6 hours
    - From 7 to 13 hours
    - 14 or more hours

11. **Mark how much time you spent watching TV/movies, playing video/ computer games. Surfing the**
For example: If you spend 3 hours doing these activities on Monday, you would need to fill in the 3 hour circle, as shown below:

<table>
<thead>
<tr>
<th>Hours per day</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td>Monday</td>
</tr>
<tr>
<td>Monday</td>
</tr>
<tr>
<td>9</td>
</tr>
<tr>
<td>Tuesday</td>
</tr>
<tr>
<td>Wednesday</td>
</tr>
<tr>
<td>Thursday</td>
</tr>
<tr>
<td>Friday</td>
</tr>
<tr>
<td>Saturday</td>
</tr>
<tr>
<td>Sunday</td>
</tr>
</tbody>
</table>

12. How important are each of the following to you? (Very Important, Important, Not Very Important, Not at all important)
   a) Getting good grades
   b) Making friends
   c) Participating in school activities outside of class
   d) Getting to class on time
   e) Learning new things
   f) Expressing my opinion in class
   g) Getting involved in the student council or other similar groups
   h) Learning about my culture/heritage (e.g., Francophone, First Nations, Irish)

13. How strongly do you agree or disagree with each of the following? (Strongly agree, Agree, Disagree, and Strongly disagree)
   a) I feel close to people at my school.
   b) I feel I am part of my school.
   c) I am happy to be at my school.
   d) I feel the teachers at my school treat me fairly.
   e) I feel safe in my school.
   f) I feel my learning needs are met at my school.

14. For each item, fill in the circle that best describes what you are like as a person. (Definitely Not Like Me = 1, 2, 3, 4, 5, 6 = Definitely Like Me)
   a) I often do favours for people without being asked.
   b) I often lend things for people without being asked.
   c) I often help people without being asked.
   d) I often compliment people without being asked.
   e) I often share things with people without being asked.

15. We are interested in how you feel about yourself and how you think other people see you. For each item, fill in the circle that best describes your feelings and ideas in the past week. (Really false for me, Sort of false for me, Sort of true for me, Really true for me)
   a) I feel I do things well at school.
   b) My teachers like me and care about me.
   c) I feel free to express myself at home.
   d) I feel my teachers think I am good at things.
   e) I like to spend time with my parents.
   f) I feel free to express myself with my friends.
   g) I feel I do things well at home.
   h) My parents like me and care about me.
   i) I feel I have a choice about when and how to do my schoolwork.
   j) I feel my parents think that I am good at things.
   k) I like to be with my teachers.
   l) I feel I have a choice about which activities to do with my friends.
   m) I feel I do things well when I am with my friends.
   n) My friends like me and care about me.
   o) I feel free to express myself at school.
   p) I feel my friends think I am good at things.
   q) I like to spend time with my friends.
   r) I feel like I have a choice about when and how to do my household chores.
   s) I like to be with my friends.
   t) I feel I have a choice about which activities to do with my friends.
   u) My friends like me and care about me.
   v) I feel free to express myself at school.
   w) I feel my friends think I am good at things.
   x) I like to spend time with my friends.
   y) I feel like I have a choice about when and how to do my household chores.
   z) I like to be with my friends.

16. For each item, fill in the circle that best describes what you are like as a person. (Definitely Not Like Me = 1, 2, 3, 4, 5, 6 = Definitely Like Me)
   a) I cut classes or skip school.
   b) I get to class on time.
   c) I often do favours for people without being asked.
   d) I often lend things for people without being asked.
   e) I often help people without being asked.
   f) I feel I do things well at school.
   g) My teachers like me and care about me.
   h) I feel free to express myself at home.
   i) I feel my teachers think I am good at things.
   j) My parents like me and care about me.
   k) I feel I have a choice about when and how to do my schoolwork.
   l) I feel I do things well when I am with my friends.
   m) I feel my friends think I am good at things.
   n) I like to be with my teachers.
   o) I feel I have a choice about which activities to do with my friends.
   p) I feel like I have a choice about when and how to do my household chores.
   q) I like to spend time with my friends.

27. Mark how many minutes of HARD physical activity you did on each of the last 7 days. This includes physical activity during physical education class, lunch, recess, after school, evenings and spare time.

   Table (Hours: 0, 1, 2, 3, 4) (Minutes: 0, 15, 30, 45)

   Monday       Tuesday       Wednesday       Thursday

28. Were the last 7 days a typical week in terms of the amount of HARD physical activity that you usually do?

   Yes
   No, I was more active in the last 7 days
   No, I was less active in the last 7 days

29. Mark how many minutes of MODERATE physical activity you did on each of the last 7 days. This includes physical activity during physical education class, lunch, recess, after school, evenings and spare time.

   Table (Hours: 0, 1, 2, 3, 4) (Minutes: 0, 15, 30, 45)

   Monday       Tuesday       Wednesday       Thursday

30. Were the last 7 days a typical week in terms of the amount of MODERATE physical activity that you usually do?

   Yes
   No, I was more active in the last 7 days
   No, I was less active in the last 7 days

31. Do you participate in before school, noon hour, or after school physical activities organized by your school (e.g. intramurals, non-competitive clubs)?

   Yes
   None offered
   No

32. Do you participate in competitive school sports teams that compete against other schools (e.g. junior varsity or varsity sports)?

   Yes
   None offered
   No

33. 50% In your school, how much emphasis is placed on:
(None, A little, Some, A lot, I don’t know)

a) Student participation in competitive sports?
b) Student participation in non-competitive sports or physical activity clubs (e.g., intramurals)?
c) Developing positive attitudes about physical activity?
d) Offering a variety of competitive sports?
e) Offering a variety of non-competitive sports or physical activities?

50% In your school, how much importance is placed on:

a) Student participation in competitive sports?
b) Student participation in non-competitive sports or physical activity clubs (e.g., intramurals)?
c) Developing positive attitudes about physical activity?
d) Offering a variety of competitive sports?
e) Offering a variety of non-competitive sports or physical activities?

34. Do you participate in any of the following activities at school? (Mark all that apply)
   a) Dance (e.g., jazz, hip hop)
   b) Drama (e.g., plays, variety shows)
   c) Music (e.g., choirs, bands)
   d) Art (e.g., drawing, photography)
   e) Science or Technology (e.g., science fairs, school website)
   f) Student Clubs or Groups (e.g., peer helper, yearbook, TADD)
   g) Other

35. Are you a smoker?
   Yes
   No

36. Have you ever tried cigarette smoking, even just a few puffs?
   Yes
   No

37. Do you think in the future you might try smoking cigarettes?
   Definitely yes
   Probably yes
   Probably not
   Definitely not

38. If one of your best friends was to offer you a cigarette would you smoke it?
   Definitely yes
   Probably yes
   Probably not
   Definitely not

39. At any time during the next year do you think you will smoke a cigarette?
   Definitely yes
   Probably yes
   Probably not
   Definitely not

40. Have you ever smoked a whole cigarette?
   Yes
   No

41. Have you ever smoked 100 or more whole cigarettes in your life?
   Yes
   No

42. Have you ever smoked every day for at least 7 days in a row?
   Yes
   No

43. On how many of the last 30 days did you smoke one or more cigarettes?
   None
   1 day
   2 to 3 days
   4 to 5 days
   6 to 10 days
   11 to 20 days
   21 to 29 days
   30 days (every day)

44. In the last 12 months, how often did you smoke?
   I have never smoked
   I have smoked, but not in the last 12 months
   I have tried to quit once
   I have tried to quit 2 or 3 times
   I have tried to quit 4 or 5 times
   I have tried to quit 6 or more times
   I have had more than one cigarette in the last 12 months
   I have tried to quit once
   I have tried to quit 2 or 3 times
   I have tried to quit 4 or 5 times
   I have tried to quit 6 or more times

45. In the last 30 days, have you ever tried to quit smoking cigarettes?
   I have never smoked
   I have only smoked a few times
   I have tried to quit 2 or 3 times
   I have tried to quit 4 or 5 times
   I have tried to quit 6 or more times
   I have tried to quit once

</table>
58. In the last 7 days, how did you usually get to and from school?
   - Actively (e.g., walk, bike, skateboard)
   - Inactively (e.g., Car, bus, public transit)
   - Mixed (actively and inactively)

59. Your closest friends are the friends you like to spend the most time with. How many of your closest friends are physically active?
   - None
   - 1
   - 2
   - 3
   - 4
   - 5 or more friends

60. How much do your parents, step-parents, or guardians support you in being physically active?
   - Very supportive
   - Supportive
   - Unsupportive
   - Very unsupportive

61. In the last 7 days, how many Physical Education classes did you have at school?
   - 0 classes
   - 1 class
   - 2 classes
   - 3 classes
   - 4 classes
   - 5 or more classes

62. Do you have a chance to be physically active in other classes besides Physical Education at school?
   - No
   - Yes, some other classes
   - Yes, all other classes

63. Do you think students who are physically active do better at school?
   - Strongly agree
   - Agree
   - Disagree
   - Strongly disagree
   - I do not know

64. In general, compared to other people your age, how would you rate your athletic ability?
   - Excellent
   - Good
   - Fair
   - Poor

65. Do you usually partake in the following physical activities not organized by your school? (Yes, No)
   - a) Non-competitive sports or physical activities (e.g., jogging, biking, skateboarding, swimming, Ultimate Frisbee)
   - b) Competitive sports or physical activities (e.g., running, skiing, riding, hockey, baseball)

66. Does your school have awards (certificates, points, ribbons, trophies) for students participating in competitive or non-competitive sports or physical activity clubs? (Yes, No, I don’t know)
   - a) Competitive
   - b) Non-competitive

67. In the last 7 days, how many times were your parents, step-parents or guardians physically active (e.g. walking, running, biking, going to the gym, doing yard work) for at least 30-60 minutes?
   - 0 times
   - 1-2 times
   - 3-5 times
   - 6-7 times
   - I’m not sure
   - I have no parents, step-parents or guardians

68. In general, how many of the school staff (e.g., teachers, custodians) do you see...? (Insert Table: Most of the staff, Some of the staff, A few of the staff, None of the staff, I do not know)
   - a) being physically active?
   - b) eating healthy foods?

69. How often have you been bullied at school in the past couple of months in the ways listed below? (Mark one response for each item)
   - {I have not been bullied this way; Only once or twice; 2-3 times a month; About once a week; Several times a week}
   - a) I was called mean names, was made fun of, or teased in a hurtful way.
   - b) Other students left me out of things on purpose, excluded me from their group of friends, or completely ignored me.
   - c) I was hit, kicked, pushed, shoved around, or locked in or out.
   - d) Other students told lies or spread false rumours about me and tried to make others dislike me.
| e) | I was bullied with mean names and comments about my race/religion/personal features. |
| f) | Other students made sexual jokes, comments, or gestures to me. |
| g) | I was bullied using a computer or email messages or pictures. |
| h) | I was bullied using a cell phone. |

70. How often have you bullied another student/s at school in the past couple of months in the ways listed below? (Mark one response for each item)
(I have not bullied another student in this way; Only once or twice; 2-3 times a month; About once a week; Several times a week)

| a) | I called another student/s mean names, and made fun of, or teased him or her in a hurtful way. |
| b) | I kept another student/s out of things on purpose, excluded him or her from my group of friends, or completely ignored him or her. |
| c) | I hit, kicked, pushed, shoved around, or locked another student/s in or out. |
| d) | I told lies or spread false rumours about another student/s and tried to make others dislike him or her. |
| e) | I bullied another student/s with mean names and comments about his or her race/religion/personal features. |
| f) | I made sexual jokes, comments, or gestures to another student/s. |
| g) | I bullied another student/s using a computer or email messages or pictures. |
| h) | I bullied another student/s using a cell phone. |

71. Think of the last time you saw or heard another student being bullied. What did you do? (Mark all that apply)
I have not seen or heard another student being bullied.
I ignored it.
I told my parents about it.
I told my teacher about it.
I told my principal or vice-principal about it.
I told an adult at the school about it.
I told an adult outside of school about it.
I told another student about it.
At the time, I helped the person being bullied.
Later on, I helped the person being bullied.
I stood and watched.
I made a joke about it.
I joined in the bullying.
I got someone to help stop it.
I stood up to the person who was doing it.
I got back at the bully later.
Other

72. If a student complains to an adult at school about bullying, how often is something done about it?

| Never | Sometimes | Often | Always |

73. What language do you speak most often, when not at home or in school?

| English | Other |
| French | |

74. During the school year do you recall seeing, hearing or reading any information about physical activity or increasing physical activity?

| Yes | I'm not sure | No |

75. Do you recall seeing, hearing or reading anything about “in motion”?

| Yes | I'm not sure | No |

76. Do you recall where you saw/ received information about “in motion”? (Mark all that apply)

| School bulletin boards | On buses or billboards |
| School Announcements | Advertising or news (TV or radio) |
| School newspaper/newsletter/website | Physical education class |
| Posters in school | Internet |
| School in motion Physical Activity | Other |
| Challenges | No |
| School walking/jog club | I'm not sure |
| People (friends, family, teacher) | |

77. Do you participate in any of the following activities outside of school? (Mark all that apply)
a) Dance (e.g., hip hop, lyrical, tap, highland)  

b) Drama (e.g., plays, cultural)  
c) Music (e.g., piano, strings, voice)  
d) Art (e.g., drawing, crafting, photography)  
e) Science or Technology (e.g., computer clubs)  
f) Community or Youth Groups (e.g., Scouts/Guides, 4-H, church, charities)  
g) Other

78. In the last 12 months, have you helped with any of the following activities for healthy eating, physical activity or tobacco-free living, organized by your school? (Mark all that apply)

- School assembly
- Class activity
- School health fair
- Breakfast or lunch program
- Healthy living promotion (e.g., morning announcements, posters)
- I have not helped with any of these activities
- Community event outside of school

79. In the last 12 months, did you engage in any of the following volunteer activities (outside of school requirements and without being paid)? (Yes, No, Not applicable)

- Supporting a cause (e.g. food bank, UNICEF, Operation Christmas Child)
- Fund raising (e.g. charity, school trips)
- Helping in my community (e.g. coaching sports, helping at Sunday School, volunteering at hospital)
- Helping neighbours or relatives (e.g. cutting grass, babysitting, shovelling snow)
- Doing other organized volunteer activity

80. How often do you volunteer? Insert table (Never, Sometimes, Usually)

a) Daily  
b) Weekly  
c) Monthly  
d) Yearly

81. Do you have a part-time job outside of school?  

- Yes  
- No

82. When do you usually work at your part-time job? Insert table (Never, Sometimes, Often)

- I do not have a part-time job  
- Weekdays  
- Weekends  
- School Vacations

83. How long do you usually spend sleeping each night? (Do not include time spent resting)

- Under 2 hours  
- 2 hours to less than 3 hours  
- 3 hours to less than 4 hours  
- 4 hours to less than 5 hours  
- 5 hours to less than 6 hours

84. How old were you when you tried cigarette smoking, even just a few puffs?

- I have never done this  
- I do not know  
- 8 years or younger  
- 9 years  
- 10 years  
- 11 years  
- 12 years  
- 13 years  
- 14 years  
- 15 years  
- 16 years  
- 17 years  
- 18 years  
- 19 years or older

85. How old were you when you smoked your first whole cigarette?

- I have never done this  
- I do not know  
- 8 years or younger  
- 9 years  
- 10 years  
- 11 years  
- 12 years  
- 13 years  
- 14 years  
- 15 years  
- 16 years  
- 17 years  
- 18 years  
- 19 years or older

86. Thinking back over the last 30 days, on the days you smoked, how many cigarettes did you usually smoke?

- None  
- 6 to 10 cigarettes  
- A few puffs to one whole cigarette  
- 11 to 20 cigarettes  
- 21 to 30 cigarettes  
- More than 30 cigarettes
<table>
<thead>
<tr>
<th>2 to 3 cigarettes</th>
<th>21 to 29 cigarettes</th>
</tr>
</thead>
<tbody>
<tr>
<td>4 to 5 cigarettes</td>
<td>30 or more cigarettes</td>
</tr>
</tbody>
</table>

87. Where do you usually get your cigarettes?
- I do not smoke
- I buy them myself at a store
- I buy them from a friend or someone else
- I ask someone to buy them for me
- My brother or sister gives them to me
- My mother or father gives them to me
- A friend or someone else gives them to me
- I take them from my mother, father or siblings
- Other

88. Have your parents, step-parents, or guardians ever talked to you about not smoking?
- Yes
- No

89. What are the rules about smoking in your home?
- No one is allowed to smoke in my home
- Only special guests are allowed to smoke in my home
- People are allowed to smoke only in certain areas in my home
- People are allowed to smoke anywhere in my home

90. This school has a clear set of rules about smoking for students to follow?
- Yes
- I don’t know
- No

91. If students are caught breaking the smoking rules at this school, they get into trouble?
- Yes
- I don’t know
- No

92. Please answer the following questions based on your opinion. (Yes, No, I don’t know)
   a) Do people have to smoke for many years before it will hurt their health?
   b) Is there any danger to your health from an occasional cigarette?
   c) Can smoking help people when they are bored?
   d) Does smoking help people relax?
   e) Does quitting smoking reduce health damage even after many years of smoking?
   f) Does smoking help people stay slim?
   g) Can people become addicted to tobacco?
   h) Can tobacco smoke be harmful to the health of non-smokers?
   i) Do people who smoke become more popular?
   j) Can smokers quit anytime they want?
   k) Do you think smoking is cool?
   l) Should smoking be allowed around kids at home?
   m) Should smoking be allowed around kids in cars?
   n) Is it nicer to date people who do not smoke?

93. In the last 6 months, have you seen cigarettes displayed inside stores?
- Yes
- No
- I don’t know

94. Have you ever had a drink of alcohol that is more than just a sip? (e.g., a beer, wine cooler, glass of wine or shot of liquor)
- Yes
- No

95. How old were you when you first had a drink of alcohol that is more than a sip?
- I have never drank alcohol
- I have only had a sip of alcohol
- I do not know
- 8 years or younger
- 9 years
- 10 years
- 11 years
- 12 years
- 13 years
- 14 years
- 15 years
- 16 years
- 17 years
- 18 years
- 19 years or older

96. In the last 12 months, how often did you drink alcohol?
- Once a week
- 2 or 3 times a week
- 4 to 6 times a week
- Every day
- Less than once a month
- Once a month
- I do not know
<table>

The Dimensions of Wellness

The Dimensions of Wellness - The wellness lifestyle is a coordinated and integrated living pattern that involves seven dimensions: physical, intellectual, emotional, social, spiritual, environmental and occupational. There is a strong interconnection among these dimensions.

1. **Physical Dimension** – Involves the functional operation of the body. It involves the health-related components of physical fitness – muscular strength, muscular endurance, cardio-respiratory endurance, flexibility and body composition.

2. **Intellectual Dimension** – Addresses the use of the mind. Maintaining an active mind contributes to total well-being.

3. **Emotional Dimension** – Includes the abilities to laugh, enjoy life, adjust to change, cope with stress, and maintain intimate relationships are examples of the emotional dimension of wellness.

4. **Social Dimension** - Includes the ability to get along with others, appreciate the uniqueness of others, and feel connected to others.

5. **Spiritual Dimension** – Is the personal search for meaning and direction in life.

6. **Environmental Dimension** – Involves with the preservation of natural resources as well as the protection of plants and wildlife.

7. **Occupational Dimension** – Is the deriving of personal satisfaction from one’s vocation.

*Source: Text A Wellness Way of Life*
Wellness Wheel

The Wellness Wheel is a representation of a person’s overall health using spokes to convey a number of important aspects of wellness. Individuals may use these aspects and their extensions to help evaluate and improve their overall health and wellness. It serves as a visual reminder of the balance between many different aspects which make up a healthy lifestyle. Looking at the wellness wheel can assist in finding an area that may be targeted for improvement.

Objective: To have students assess their personal wellness.

To have student set goals for improving areas of their wellness which need enhancement.

Each student will complete a wellness wheel.

Directions: Answer the following questions and score at the end of each section. Colour the section of the wheel with the appropriate score.

1. Physical

I am active for at least 30-60 minutes a day. Yes ___ No___
I eat fresh fruits and vegetables, and include fibre in my daily diet. Yes ___ No___
I eat breakfast every morning. Yes ___ No___
I drink at least 4-6 glasses of water a day. Yes ___ No___
I get enough sleep so that I feel rested and alert. Yes ___ No___

Number of Yes responses _____ x 2 = _____
Number of No responses _____ x 0 = _____
Total _______

2. Social

I get along well with my family. Yes ___ No___
I develop and maintain strong friendships. Yes ___ No___
I help others in need. Yes ___ No___
I have friends who support a positive lifestyle. Yes ___ No___
My behaviour reflects a positive attitude. Yes ___ No___

Number of Yes responses _____ x 2 = _____
Number of No responses _____ x 0 = _____
Total _______
3. Emotional

I have a good sense of humour.  Yes ___ No___

My sleep is restful, I receive adequate sleep.  Yes ___ No___

I am able to express my feelings appropriately.  Yes ___ No___

I relax my body and mind without using drugs.  Yes ___ No___

I feel positive about myself.  Yes ___ No___

Number of Yes responses _____ x 2 = _____

Number of No responses _____ x 0 = _____

Total _______

4. Intellectual

I am interested in learning new concepts and skills.  Yes ___ No___

I listen to the radio, watch TV, read a newspaper to be aware of current events.  Yes ___ No___

I read 6 or more books a year.  Yes ___ No___

I am interested in understanding the views of others.  Yes ___ No___

I understand that I will be a lifelong learner.  Yes ___ No___

Number of Yes responses _____ x 2 = _____

Number of No responses _____ x 0 = _____

Total _______

5. Spiritual

I spend time thinking, wondering or writing about my life and its meaning (prayer, meditation, journal writing).  Yes ___ No___

I am part of something greater than myself. I realize that my actions affect those around me as well as myself.  Yes ___ No___

My beliefs demonstrate a respect for myself as well as others.  Yes ___ No___

I enjoy being outside and experiencing the wonders of nature. (solitude, energy level, appealing to the senses).  Yes ___ No___

I am optimistic.  Yes ___ No___
Number of Yes responses _____ x 2 = _____
Number of No responses _____ x 0 = _____
Total _______

Have students colour in their wellness wheels with the appropriate score. Is the wheel in balance? What areas need to be improved? The goal is to be as close to 10 in all domains of wellness.

**Goal setting**

Is your wheel well balanced? The goal is to be as close to 10 in all domains of wellness.

Are there areas of your wellness that need to improve?

This year I am going to improve in my _______________________ domain.

I will do this by___________________________________________________________

**Decision-Making Skills**

Life is a continuous decision-making process. To help people gain more control over their lives and to enhance their lifestyle, they need to approach life in a thoughtful rather than in a haphazard way. Using a decision-making process can help serve as a plan of action, when you
are faced with a problem or decision.

**Decision-Making Process**

1. Clearly define the problem.
2. Establish your criteria (what is important to you).
3. List your alternatives.
4. Evaluate your alternatives based on your criteria.
5. Make a decision.
6. Devise an action plan to carry out the decision.
7. Review and evaluate your decision and alter it as possible/necessary/appropriate.

**W.W.I.N Problem-Solving Process**

Just as a mechanic or a doctor uses a checklist when inspecting a car or a patient, you may use a checklist when you are trying to solve problems. This checklist is called the W.W.I.N Process. Each of the four letters has a special meaning presented below.

- **W** – What do you really want? To pass my Math test.
- **W** – What are you doing to get that? Paying attention in class, doing my work at school and at home.
- **I** – Is it working? Yes.
- **N** – New plans, if necessary. I may choose to make new plans, which will help me to do better.

Central to self-determination theory is the concept of basic psychological needs that are assumed to be innate and universal. According to the theory, these needs—the needs for competence, autonomy, and relatedness—must be ongoingly satisfied for people to develop and function in healthy or optimal ways (Deci & Ryan, 2000). Many of the propositions of SDT derive from the postulate of fundamental psychological needs, and the concept has proven essential for making meaningful interpretations of a wide range of empirically isolated phenomena.

The Basic Need Satisfaction in Life Scale (i.e., the general scale) was used in Gagné (2003) and in Kashdan, Julian, Merritt, and Uswatte (2006). An adaptation of the scale for assessing need satisfaction in physical education classes was created and used by Ntoumanis (2005).

### Basic Need Satisfaction in Life Scale

Feelings I Have

Please read each of the following items carefully, thinking about how it relates to your life, and then indicate how true it is for you. Use the following scale to respond:

1  2  3  4  5  6  7

not at all  somewhat  very

true  true  true

1. I feel like I am free to decide for myself how to live my life.

2. I really like the people I interact with.

3. Often, I do not feel very competent.

4. I feel pressured in my life.

5. People I know tell me I am good at what I do.
6. I get along with people I come into contact with.

7. I pretty much keep to myself and don't have a lot of social contacts.

8. I generally feel free to express my ideas and opinions.

9. I consider the people I regularly interact with to be my friends.

10. I have been able to learn interesting new skills recently.

11. In my daily life, I frequently have to do what I am told.

12. People in my life care about me.

13. Most days I feel a sense of accomplishment from what I do.

14. People I interact with on a daily basis tend to take my feelings into consideration.

15. In my life I do not get much of a chance to show how capable I am.

16. There are not many people that I am close to.

17. I feel like I can pretty much be myself in my daily situations.

18. The people I interact with regularly do not seem to like me much.

19. I often do not feel very capable.
20. There is not much opportunity for me to decide for myself how to do things in my daily life.

21. People are generally pretty friendly towards me.

**Scoring information.** Form three subscale scores, one for the degree to which the person experiences satisfaction of each of the three needs. To do that, you must first reverse score all items that are worded in a negative way (i.e., the items shown below with (R) following the items number). To reverse score an item, simply subtract the item response from 8. Thus, for example, a 2 would be converted to a 6. Once you have reverse scored the items, simply average the items on the relevant subscale. They are:

- **Autonomy:** 1, 4(R), 8, 11(R), 14, 17, 20(R)

- **Competence:** 3(R), 5, 10, 13, 15(R), 19(R)

- **Relatedness:** 2, 6, 7(R), 9, 12, 16(R), 18(R), 21
Appendix D: Proposed NB 21st Century Competencies

1. Critical thinking and creative problem solving

Students will know and be able to use strategies and processes to think creatively, understand deeply, conduct meaningful reflection and solve problems. Through innovative ideas, entrepreneurship, and/or artistic expression, students will demonstrate that they:

- have learned the elements and processes associated with critical thinking and problem solving.
- have a deep understanding of complex concepts and the ability to work creatively in order to generate new ideas, theories, products and knowledge.
- have learned to think logically and to solve ill-defined problems by identifying and describing the problem, framing and testing hypothesis and by formulating creative solutions.
- are exploring and developing their creative abilities and applying them in a variety of ways.
- are able to acquire, process and interpret information critically to make informed decisions.

2. Collaboration

Students will be able to interact with others in generating ideas and developing products. They will use appropriate interpersonal skills within a variety of media and social contexts. Students will demonstrate that they:

- understand how to relate to other people in varying contexts, including those in which they manage or are managed by others.
- are able to collaborate across networks, using various technologies.
- are able to effectively participate as a team member and know their own capacities for filling different team roles.
- have developed proficiency in managing personal relationships.
- are able to use various means to manage conflict.
- understand the creative process through collaboration, exchange of ideas and building upon the achievement of others.
- have been sensitized to the issues and processes associated with collaborating across cultures.

3. Communication

Students will be able to communicate effectively using the arts; mathematical and scientific concepts and symbols; and the listening, viewing, speaking, reading and writing modes of language(s). They will communicate using a variety of media and technologies. Students will demonstrate that they:

- think divergently and creatively through use of analogies, metaphors and visual thinking.
- create, explore, reflect on and express their own ideas, learning, perceptions and feelings.
- understand ideas and relationships presented through words, actions, numbers, symbols, graphs, sound, movement, images and charts.
- have a level of proficiency in their second official language.
• manage, access, process, evaluate and present information clearly, logically, concisely, aesthetically and accurately for a variety of audiences.
• critically interpret and evaluate ideas presented through a variety of media.
• acknowledge, consider and respond to different points of view.

4. Personal development and self-awareness

Students will be resourceful, reliable and resilient. They will see themselves as capable learners, aware of their own potential. They will make well-informed, healthy choices that contribute to the well-being of themselves and others. Students will demonstrate that they:
• make decisions and take responsibility for those decisions.
• pursue an active, healthy lifestyle.
• have developed techniques for managing change, risk and uncertainty in a wide range of contexts.
• have persistence and determination.
• demonstrate motivation and confidence.
• acknowledge and consider different points of view.
• are able to take control of learning.
• are well positioned and prepared for post-secondary pursuits.
• have developed an awareness of cultural heritage.

5. Global citizenship

Students will be able to assess social, cultural, economic and environmental interdependence in a local, national and global context. Students will demonstrate that they:
• understand the dynamic interactions of Earth’s systems, the dependence of our social and economic systems on these natural systems, our fundamental connection to all living things, and the impact of humans upon the environment.
• comprehend Canada’s political, social and economic systems in a global context.
• are able to critically analyze the social, political, cultural and economic forces that have shaped the past and present and apply those understandings in planning for the future.
• understand key ideas and concepts related to democracy (for example: human rights).
• comprehend and appreciate cultural and societal diversity in local, national and global contexts.
• possess the dispositions and skills necessary for effective civic engagement.
• use creative and critical thinking to develop innovative solutions to complex societal and environmental problems.
• understand key ideas and concepts related to culture and human expression.

Rubrics

The strength of rubrics is that they clarify expectations and ensure that student creations are judged on common criteria. One of the greatest strengths of a rubric comes when it has been co-created with students prior to the assigned task. This helps to ensure that the students truly understand the task and the expected level of performance. Rubrics also provide students with information and direction for the future.

Rubrics are helpful assessment tools because they provide students and teachers with a written description of various degrees of success. Rubrics are simply charts that identify criteria for success and describe various degrees of success. The challenge when creating rubrics is to ensure that the criteria reflect what is truly important and that the descriptors are specific enough that when one looks at the work, the correct criteria can be easily identified.

Here are some suggestions for creating rubrics:

- Involve the students in the process.
- Try to avoid or limit the use of words and phrases such as “very,” “often,” “sometimes,” and “to a great extent” because they are hard to qualify.
- Limit the number of criteria. It is difficult for students to focus on more than three to five items at once. It may be necessary to reduce this number for individual students in the class.
- Consider the range of descriptors that are provided: three is a minimum, five a maximum.
- Decide whether certain criteria require only two descriptors (this may be necessary if a criterion is simply met or not, with no range in between).
- Decide whether some criteria are more important than others. If this is the case, you may want to weight these criteria more heavily, especially if grades are being assigned as a result of the rubric.
- Use student work samples to generate criteria and descriptors. Have students examine them and build the rubric with these in mind.
