Acknowledgments

The Department of Education and Early Childhood Development of New Brunswick (EECD) gratefully acknowledges the contributions of the following groups and individuals toward the development of the Civics 10 curriculum document:

- Eldon Bernard, Elder
- Andrea Colfer, Elder
- Patsy McKinney, Elder
- Noel Milliea, Elder and educator
- George Paul, Elder, Sweat Lodge Keeper, storyteller, performer
- Walter Paul, Elder, Storyteller, educator and curriculum developer
- Imelda Perley, Elder, Sweat Lodge Keeper, Medicine Wheel Teacher, Sacred Pipe Carrier, Linguist, Former Elder-in-Residence at UNB, language teacher, Keeper of the Women's Ceremonies, cultural advisor, curriculum developer, co-founder Wolastoq Language and Culture Center
- David Perley, Former Director of the Mi'kmaq-Wolastoqey Centre at UNB, Elder, lecturer at UNB and St. Thomas University, co-founder Wolastoq Language and Culture Center
- Gilbert Sewel, Elder
- Clinton Bateman, educator, Anglophone School District North
- Lise Martin-Keilty, educator, Anglophone School District West
- Kelly Harris, Curriculum Support Teacher, EECD
- Winnie Hsu, Curriculum Support Teacher, EECD
- Dr. Alan Sears, University of New Brunswick
- Kate Charette, Learning Specialist, EECD
- Cheryl Bowie, Learning Specialist, EECD
- Paul Saad, Learning Specialist, EECD
- Ryan Jones, Learning Specialist, EECD
- Craig Williamson, Learning Specialist, EECD
- Kathy Whynot, Learning Specialist, EECD
- Will Dickeson, Instructional Designer, EECD
- Jason Agnew, Educator, Anglophone School District East
- Meredith Batt, Archivist, Provincial Archives of New Brunswick
- Aïcha Salah, Educator, Anglophone School District East
- Jeannot Cyr, Educator, Anglophone School District South
- Angie Cameron, Educator, Anglophone School District South
- Adam Hayward, Educator, Anglophone School District North
- Hilary Ready, Educator, Anglophone School District West
- Susan Belliveau, Educator, Anglophone School District West

1. Introduction

1.1 Mission and Vision of Educational System

The New Brunswick Department of Education and Early Childhood Development is dedicated to providing the best public education system possible, wherein all students have a chance to achieve their academic best. The mission statement for New Brunswick schools is:

Each student will develop the attributes needed to be a lifelong learner, to achieve personal fulfillment and to contribute to a productive, just and democratic society.

1.2 New Brunswick Global Competencies

New Brunswick Global Competencies provide a consistent vision for the development of a coherent and relevant curriculum. The statements offer students clear goals and a powerful rationale for school work. They help ensure that provincial education systems' missions are met by design and intention. The New Brunswick Global Competencies statements are supported by curriculum outcomes.

New Brunswick Global Competencies are statements describing the knowledge, skills and attitudes expected of all students who graduate high school. Achievement of the New Brunswick Global Competencies prepares students to continue to learn throughout their lives. These Competencies describe expectations not in terms of individual school subjects but in terms of knowledge, skills and attitudes developed throughout the curriculum. They confirm that students need to make connections and develop abilities across subject boundaries if they are to be ready to meet the shifting and ongoing demands of life, work and study today and in the future.

See Appendix 6.1.

2. Pedagogical Components

2.1 Pedagogical Guidelines

Diverse Cultural Perspectives

It is important for teachers to recognize and honour the variety of cultures and experiences from which students are approaching their education and the world. It is also important for teachers to recognize their own biases and be careful not to assume levels of physical, social or academic competencies based on the gender, culture, or socio-economic status of their students.

Each student's culture will be unique, influenced by their community and family values, beliefs, and ways of viewing the world. Traditional aboriginal culture views the world in a much more holistic way than the dominant culture. Disciplines are taught as connected to one another in a practical context, and learning takes place through active participation, oral communication and experiences. Immigrant students may also be a source of alternate world views and cultural understandings. Cultural variation may arise from the differences between urban, rural and isolated communities. It may also arise from the different value that families may place on academics or athletics, books or media, theoretical or practical skills, or on community and church. Providing a variety of teaching and assessment strategies to build on this diversity will provide an opportunity to enrich learning experiences for all students.

Universal Design for Learning

The curriculum has been created to support the design of learning environments and lesson plans that meet the needs of all learners. Specific examples to support Universal Design for Learning for this curriculum can be found in the appendices. The **Planning for All Learners Framework** will guide and inspire daily planning.

See Appendix 6.2

Cross Curricular Literacy and Multilingual Language Learners

Literacy occurs across learning contexts and within all subject areas. Opportunities to speak and listen, read and view, and write and represent are present every day - in and out of school. All subject-area teachers support all learners' language development with content-area vocabulary development, academic language structures, and structured classroom conversations. Supporting documents detailing ways to engage and provide scaffolds for Multilingual Language Learners (MLLs) will be developed in Summer 2022 and will be located in the appendices of this document.

2.2 Pedagogical Guidelines

Assessment Practices

Assessment is the systematic gathering of information about what students know and are able to do. Student performance is assessed using the information collected during the evaluation process. Teachers use their professional skills, insight, knowledge, and specific criteria that they establish to make judgments about student performance in relation to learning outcomes. Students are also encouraged to monitor their own progress through self-assessment strategies, such as goal setting and rubrics.

Research indicates that students benefit most when assessment is regular, ongoing, and used to promote learning (Stiggins, 2008). This is often referred to as formative assessment. Evaluation is less effective if it is simply used at the end of a period of learning to determine a mark (summative evaluation).

Summative evaluation is usually required in the form of an overall mark for a course of study, and rubrics are recommended for this task. Sample rubrics templates are referenced in this document while acknowledging teachers may have alternative measures they will apply to evaluate student progress.

Some examples of current assessment practices include:

● Questioning	● Projects and Investigations
● Observation	● Checklists/Rubrics
● Conferences	● Responses to texts/activities
● Demonstrations	● Reflective Journals
● Presentations	● Self and peer assessment
● Role plays	● Career Portfolios
● Technology Applications	● Projects and Investigations

Formative Assessment

Research indicates that students benefit most when assessment is ongoing and used to promote learning (Stiggins, 2008). Formative assessment is a teaching and learning process that is frequent and interactive. A key component of formative assessment is providing ongoing feedback to learners on their understanding and progress. Throughout the process, adjustments are made to teaching and learning.

Students should be encouraged to monitor their own progress through goal setting, co-constructing criteria and other self-and peer-assessment strategies. As students become more involved in the assessment process, they are more engaged and motivated in their learning.

Additional details can be found in the [Formative Assessment document](#) on the ONE site.

Summative Assessment

Summative evaluation is used to inform the overall achievement for a reporting period for a course of study. Rubrics are recommended to assist in this process. Sample rubrics templates are referenced in this document while acknowledging teachers may have alternative measures they will apply to evaluate student progress.

For further reading in assessment and evaluation, visit the Department of Education and Early Childhood Development's Assessment and Evaluation site [here](#).

Cross Curricular Literacy

Literacy occurs across learning contexts and within all subject areas. Opportunities to speak and listen, read and view, and write and represent are present every day—in and out of school.

3. Subject Specific Guidelines

3.1 Rationale

Civics 10 is intended to replace Ancient and Medieval History as the required Grade 10 Social Studies course. In a rapidly changing world, it is critical that students are invested in the public good, equipped to make informed decisions and supported in participating in democratic decision-making and civil discourse. This course focuses on the elements required to bolster this participation: citizenship, democratic processes, and fundamental human rights and freedoms. To preserve a healthy democracy, students must be prepared to examine how power is gained, used, and justified. They must also be prepared to support the protection of individual and collective rights and freedoms ensured within the context of constitutional democracy. This includes digital citizenship (embedded within this is media literacy) as well as data literacy (mathematics skills for civic decision-making such as proportional reasoning, statistics, graph theory). Research indicates that students have already developed civic dispositions by the time they reach high school. For civics education in high school to be effective, secondary students should have co-curricular opportunities for civic engagement, where they can use their civic knowledge to engage in community problem-solving. Students should have opportunities to participate in their communities to solve problems in a responsible, inclusive, accountable, sustainable, and ethical manner.

3.2 Course Description

By the end of this course, students will be able to articulate personal rights and responsibilities and interplay among authority systems, citizens, and public policy. They will be able to express their understandings of various ideologies and forms of power as well as how those are operationalized and lived out in governments, civil society organizations, and the lives of individuals. They will be able to articulate the origins, functions, and sources of government power and how the roles played by individuals and groups is critical to informed citizenship and decision-making. This course pairs classroom learning with experiential learning opportunities so that students can use their civic skills to engage with issues that impact them and their communities. Students will be able to exercise their civic agency within the four domains of civic engagement (Peck & Sears, 2019) and explore the benefits and limits of power and governance. Students will be able to articulate and act on personal rights and responsibilities and the interplay among authority systems, citizens, and public policy.

Pedagogical considerations for Civics 10

Lenses and biases

When looking for resources and planning lessons, please intentionally include diverse perspectives including those of Indigenous peoples, persons with disabilities, persons of different ethnicities, persons within the LGBTQI2S+ communities, persons of privilege, and persons living in poverty. Experiences of community and of civic engagement vary, particularly for historically excluded peoples, and students will benefit from learning from a wide range of perspectives on belonging, engagement, and specific issues that their Canadian and global peers are currently engaged with.

Multilingual Language Learners

All learners require content vocabulary support. Language learners in particular will require content vocabulary support to engage meaningfully in this course. Teachers are encouraged to remember that all learners bring *funds of knowledge* to the classroom, and that students' additional and home languages are assets, not barriers. Please see *Appendix 6.3* on Culturally Responsive Teaching for teaching recommendations.

Digital Citizenship extensions

With student participation in digital spaces comes the need for Digital Citizenship education. Students who are conducting online research and participating in online learning will benefit from explicit media literacy instruction (how to trust digital sources and responsible research habits) as well as digital citizenship learning around what kinds of information are found in which spaces, and how that influences decision-making. Here are some recommended activities to enhance instruction in **Civics 10**:

- [Lateral Reading](#)
- [What Do Other Sources Say?](#)
- [Online Verification Habits](#)
- [Digital Skills for Democracy](#)
- [Challenging Confirmation Bias](#)
- [Critical Digital Literacy Worksheets](#)

3.3 Curriculum Organizers and Outcomes

Organizers

The general curriculum outcomes (GCOs) for the social studies curriculum are organized around six conceptual strands. These general curriculum outcomes statements identify what students are expected to know and be able to do upon completion of study in social studies. These strands are elaborated upon in the Foundation for the Atlantic Canada Social Studies Curriculum document.

1. Citizenship, Governance, and Power:

Students will be expected to demonstrate an understanding of the rights and the responsibilities of citizenship and the origins, functions, and sources of power, authority, and governance.

2. Individuals, Societies, and Economic Decisions:

Students will be expected to demonstrate the ability to make responsible economic decisions as individuals and as members of society.

3. People, Place, and Environment:

Students will be expected to demonstrate an understanding of the interactions among people, places and the environment.

4. Culture and Diversity:

Students will be expected to demonstrate an understanding of culture, diversity, and world view, recognizing the similarities and differences reflected in various personal, cultural, racial, and ethnic perspectives.

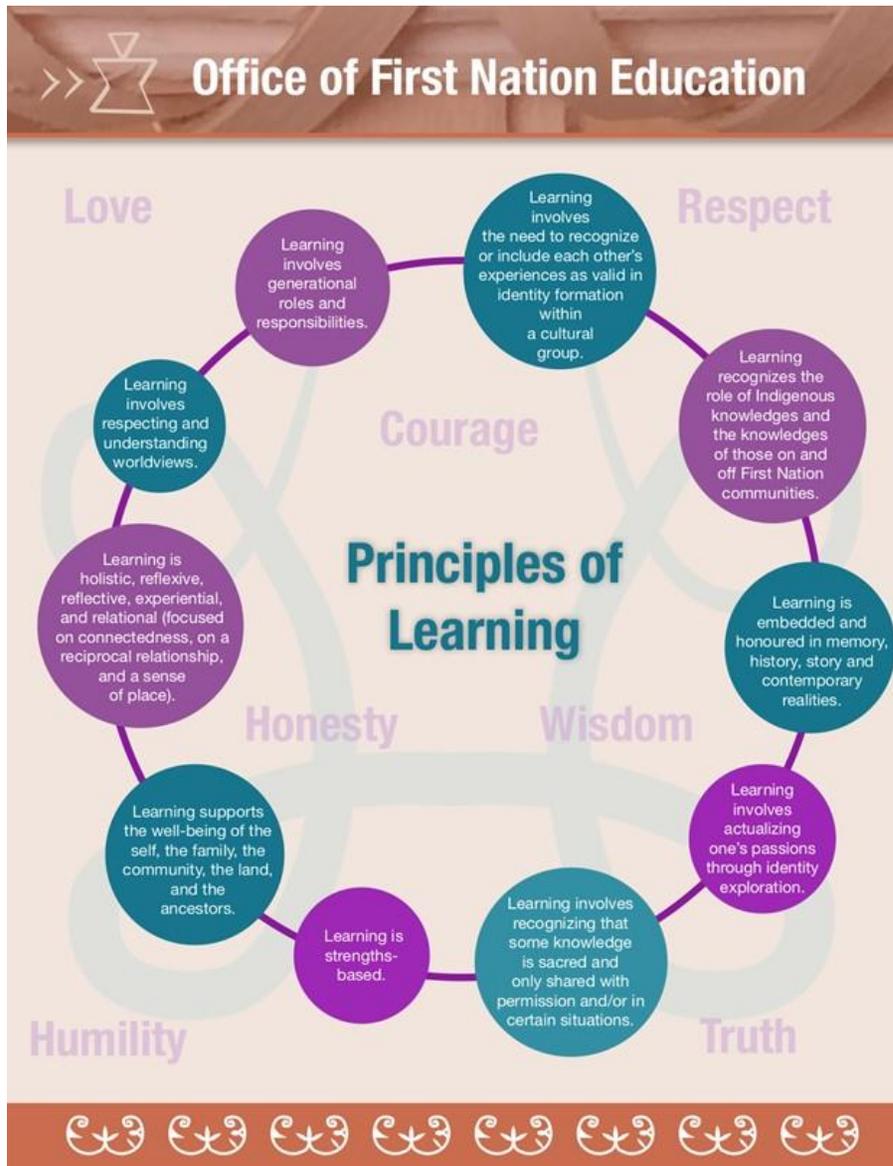

5. Interdependence:

Students will be expected to demonstrate an understanding of the interdependent relationship among individuals, societies, and the environment – locally, nationally, and globally – and the implications for a sustainable future.

6. Time, Continuity and Change:

Students will be expected to demonstrate an understanding of the past and how it affects the present and future.

Indigenous Principles of Learning

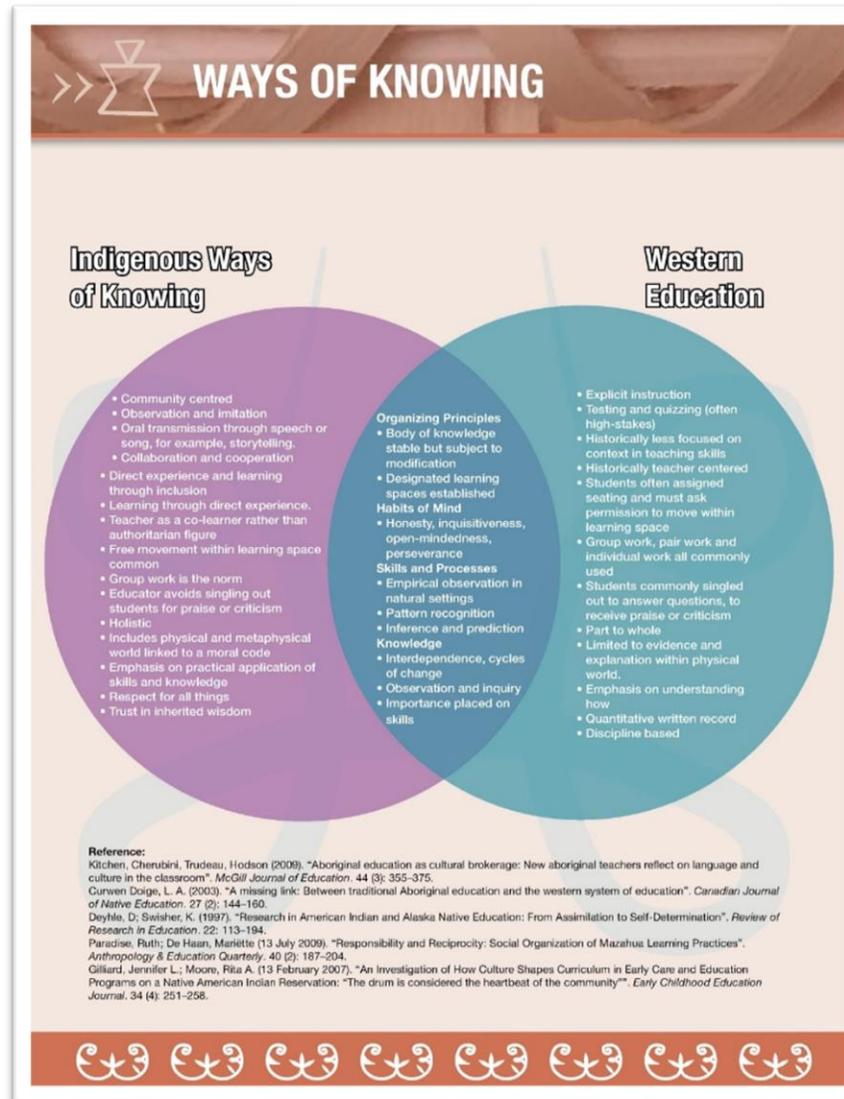

The Indigenous Principles of Learning and Indigenous Ways of Knowing infographics are important frameworks for Social Studies educators to read and incorporate into their teaching. Understanding and respecting the differences and commonalities between Indigenous and Western perspectives on teaching and learning affirms all learners and educators in public schools.

“Indigenous ways of teaching and learning are relevant not only for Indigenous people, but for the education of all people... For instance, think of differentiated instruction, daily physical activity, outdoor education, place-based, experiential, embodied, or service learning—pick a pedagogical buzzword—and there is likely some root to be found in the ways that worked for Indigenous communities for millennia. So why not explore how the old ways could be the new way forward?” (Restoule, Jean-Paul and Chaw-win-is. “Old ways are the new way forward: How Indigenous pedagogy can benefit everyone”, the Canadian Commission for UNESCO’s IdeaLab, October 2017.)

Mi’kmaq, Peskotomuhkati, and Wolastoqey nations have occupied the territories presently known as Newfoundland, New Brunswick, Nova Scotia, Prince Edward Island, and parts of northern Maine and eastern Quebec for many thousands of years. These nations each have their own traditional institutions, borders, cultures, and languages. The Wabanaki Confederacy is an important regional organization that consists of the Peskotomuhkati, Mi’kmaq, Wolastoqey, Abenaki, and Penobscot nations. The Wabanaki nations have historically and generally continue to have individual forms of spirituality, systems of justice, education, economics, and governance that may share some similarities with each other, but they are individually distinctive. As this course will be taught in New Brunswick provincial schools, the focus should be on the Mi’kmaq, Peskotomuhkati, and Wolastoqey nations. While commonalities exist, Indigenous nations are as diverse as the nations on any other continent.

Indigenous Ways of Knowing

(zoom to view)

A Thinking Focus

Deep learning in a social studies course occurs when other key dimensions, such as historical thinking, geographical thinking and critical inquiry, are considered and implemented. **Civics 10** provides students with the relevant, current issues and the relevant resources that will allow students to apply these approaches.

Historical and Geographical Thinking

Six [historical thinking concepts](#) have been identified by Peter Seixas through his work at the University of British Columbia's *Centre for the Study of Historical Consciousness*. These six historical thinking concepts are designed to help students think more deeply and critically not only about the past but also about their own relationship to the past, including how it can be linked to the present. Teachers can use these historical thinking concepts to extend and deepen the learning of the specific curriculum outcomes. Inspired by the work of Peter Seixas in historical thinking, the six [portals of geographical thinking](#) were developed to engage students in critical thinking about geography and geographical issues rather than memorizing information alone. Relationship to place plays a fundamental role in how we understand the world, and it is central to the social studies. Please see *Appendix 6.4* on Historical and Geographical Thinking.

For more information on historical thinking and for access to valuable lesson ideas for this and other social studies courses, teachers can go to [The Historical Thinking Project](#), [The Centre for the Study of Historical Consciousness](#), or [The Critical Thinking Consortium](#). For more information on geographical thinking and for access to valuable lesson ideas for this and other social studies courses, teachers may go to [The Critical Thinking Consortium](#) or [Canadian Geographic Education](#).

Critical Inquiry

To help focus the exploration of ideas, teachers should ensure that the key questions are identified. When students are invited to investigate and resolve their queries, the learning is enriched. It is the ideal, of course, to have students create their own critical questions, but students might need direction and practice to arrive at the point where they are formulating quality questions that will spark curiosity and involvement. Teachers may use the following six criteria for the construction of solid critical inquiry questions:

A Good Critical Inquiry Question:

1. The question should be one that the learner is interested in. The ideal level of interest would be such that the student feels a need to find answers to satisfy a real curiosity.
2. The question is open to research. This means that there is a need to dig deeper to find the answer, that credible sources are needed to find the answers, and that in most cases, the research is accessible within the classroom environment.
3. The learner does not already know the answer or has not already decided on the answer before doing the research.
4. The question is an "open" one. The question calls for an extensive explanation that is multi-layered. The explanation shows its complexity by referring to various viewpoints and angles. There may be more than one explanation.
5. The question has a clear focus. The question can be framed by the teacher, the student, or the student and teacher together. The question needs to have enough focus to enable productive research from the start. Questions are often seen as stepping stones to the work, but students are likely to adjust the original questions as they learn more from their research.
6. The question can be seen as an initial question that identifies sub-questions. In that case, the final explanation is the sum of the responses to the sub-questions.

(Adapted from Dale Roy, Erika Kustra, Paola Borin, 2003, McMaster University)

For further resources and professional learning in inquiry learning and critical thinking, please visit [The Critical Thinking Consortium](#).
For additional Social Studies teaching resources, teachers may wish to visit the [Social Studies SharePoint site](#).

Outcomes

The New Brunswick Curriculum is stated in terms of general curriculum outcomes, specific curriculum outcomes and achievement indicators.

General Curriculum Outcomes (GCO) are overarching statements about what students are expected to learn in each strand/sub-strand. The general curriculum outcome for each strand/sub-strand is the same throughout the grades.

Specific Curriculum Outcomes (SCO) are statements that identify specific concepts and related skills underpinned by the understanding and knowledge attained by students as required for a given grade.

Learning Outcomes Summary Chart

GCO 1	Students will investigate civic engagement.
SCO 1.1	Students will explore the four domains of civic engagement.
SCO 1.2	Students will examine what civic engagement looks like.
SCO 1.3	Students will research how civic engagement changes over time.

GCO 2	Students will explore what it means to belong.
SCO 2.1	Students will research the concept of belonging from historical, cultural, and legal perspectives.
SCO 2.2	Students will consider issues of power, voice, and belonging.
SCO 2.3	Students will investigate community spaces that respond to issues of belonging.

GCO 3	Students will explore decision-making and representation.
SCO 3.1	Students will explore how values influence people and inform decision-making in a democracy.
SCO 3.2	Students will investigate different ways that citizens are represented within Canada and around the world.
SCO 3.3	Students will use data and media literacy to respond to issues of civic importance.

GCO 4	Students will analyze how human rights are established and upheld.
SCO 4.1	Students will investigate human rights legislation.
SCO 4.2	Students will examine the relationship between human rights and democracy.

4 Curriculum Outcomes

GCO 1 Students will investigate civic engagement.	
SCO 1.1	Students will explore the four domains of civic engagement.

6 Appendices

6.1 New Brunswick Global Competencies

6.2 Universal Design for Learning (UDL)

UDL helps meet the challenge of diversity by suggesting flexible instructional materials, techniques, and strategies that empower educators to meet these varied needs. UDL research demonstrates that the challenge of diversity can and must be met by making curriculum flexible and responsive to learner differences. UDL provides guidelines to minimize barriers and maximize learning for all.

<p>Is there a form of assistive technology that could be used to enhance/facilitate this lesson?</p>	<p>Screen readers, screen magnifiers, speech-to-text, text-to-speech, etc.</p>
<p>Are there materials which can appropriately challenge readers to enhance this learning?</p>	<p>The Social Studies SharePoint offers resources which can extend learning for students who require more challenging course material.</p>
<p>Are there students in this group who cannot access this learning (PLP background) and whose needs I must revisit before teaching?</p>	<p>Teachers should view previous PLP information for considerations.</p>
<p>Are there other choices that can be provided in this learning opportunity?</p>	<p>Learning can be differentiated for outcomes as well as for depths of learning and methods of demonstrating learning.</p>
<p>Is there another/a variety of media available? Only paper-based? Can it be listening? Can I add a visual component?</p>	<p>The Social Studies SharePoint offers resources that include visual and auditory means of learning about Social Studies topics.</p>

Can movement be involved?	Students can perform this learning on any device.
Grouping and regrouping?	Learning can be cooperative and team-based. Learning can be demonstrated using virtual means and in games and competitions.
Teacher versus non- teacher centered? Instructional design strategies –...	Learning always revolves around the teacher, but opportunities exist for students to be more self-directed and self-paced using online resources and project-based learning. Students can self-initiate projects.
Opportunities for students to propose variations to the assignments/projects?	Students may propose any variations that will demonstrate achievement of the curriculum outcomes in this course.
Use of art /music / technology?	Almost all student resources for this course are available online. There are many additional online resources for Social Studies education, including web sites and videos, listed on the Social Studies SharePoint .
Can I use drama? Art....	Multiple modes of artistic expression can be used both to understand, explain, and demonstrate learning about Social Studies topics including ethical, historical, geographical, cultural, sociological, and philosophical elements.
Is there a plan to support the student/s who might already know this subject matter? Enrichment	Students can prove prior learning and have opportunities to advance and enrich their own learning. This can be through self-initiated project proposals at various degrees of independence.

<p>Does the language level need to be adjusted for the student to access this learning?</p>	<p>This course is highly dependent on the use of the English language. While students can use online translators for context, the demonstrations of learning are usually done in English. The teacher may wish to search for online lessons that are multi-lingual dealing with big concepts in the Social Studies such as justice, citizenship, etc.</p>
<p>Is there an independent or collaborative activity-project that would be better meet the needs of one or more students?</p>	<p>This course is best taught using an inquiry approach, which lends itself to project-based learning. Course work can be done independently or collaboratively, based on the needs of the student.</p>
<p>Are there any experts that I could bring into the classroom electronically or as a guest speaker?</p>	<p>There are many experts available, locally and online, as well as seminar and lecture videos such as TED talks, etc.</p>
<p>Have I linked the goal to as current event or a cultural event in the student's lives? Can I make the learning more relevant?</p>	<p>Create, start, and adjust the unit based on the students' interests. There may be many different entry points to a topic based on student readiness, background, and interest, as well as local connections.</p>
<p>Is there a hands-on experience that we could do to launch this lesson or this learning?</p>	<p>Learning in the Social Studies is effective when planned through local, place-based approaches. Teachers should seek out opportunities to connect curriculum content and concepts with experiences in the local community.</p>

6.3 Culturally Responsive Teaching

Clarifying “Culture”

To understand the role *culture* plays in our classrooms, it helps to view *culture* as *ways of knowing and being*. Or, as Zaretta Hammond explains it (2015), “Culture is the way that every brain makes sense of the world” (p. 22). Our *ways of knowing and being* influence how we interpret everything. Each person’s culture will be unique, influenced by their community and family values, beliefs, and ways of viewing the world.

What is Culturally Responsive Teaching?

Culturally Responsive Teaching is not a tool, a strategy, or an add-on. It is a way of teaching that recognizes and honours the variety of cultures and experiences from which students are approaching their education and the world. Teachers working to become culturally responsive also recognize their own biases and work to counter their internalized assumptions about levels of physical, social or academic competencies based on gender, culture, race or socio-economic status.

Culturally Responsive Teaching (CRT) is different from Multicultural and Social Justice Education. Whereas Multicultural Education recognizes and celebrates diversity, and Social Justice Education values the fostering of critical lenses, Culturally Responsive Teaching is focused on equitable instructional practices.

Why is CRT a priority practice?

Culturally and linguistically diverse students have trouble remembering and learning in classrooms where they are minoritized and not valued for their unique experiences. Feeling unsafe, unseen or misunderstood leads to “amygdala hijacks,” wherein the brain produces cortisol and is unable to learn (Hammond, 2015). *Conversely, when students feel affirmed, trusted and validated as who they are, the teacher can become the “warm demander” that students need (Hammond, 2015).*

What may it look like?

Teachers working to become culturally responsive intentionally and consistently use a variety of teaching and assessment strategies, supported by explicit modelling and scaffolding of expectations. They affirm students’ backgrounds and *funds of knowledge*, and fully and openly expect that learners will achieve.

Teachers working to become culturally responsive understand that they are not “doing something new to students” (Hammond, 2015, p. 52), but rather working internally to transform their own expectations, understandings and practice. Hammond explains:

“Before [we] can leverage diversity as an asset in the classroom, [we] must reflect on the challenges that can interfere with open acceptance of students who are different from [us] in background, race, class, language, or gender” (p. 53).

In culturally inclusive environments, educators:

- use a variety of teaching and assessment strategies, supported by explicit modelling and scaffolding of expectations.
- affirm learners’ *funds of knowledge* by validating, representing and learning from diverse ways of knowing.
- change deficit focuses and approaches into positive ones by focusing on contributions, ways of knowing, histories, and role models which are culturally diverse and may be different from the expected norm.
- respond positively to diverse cultural expressions and share their own.
- build trust with families, especially those from communities that may not have been provided positive schooling experiences in the past.
- recognize and participate in special events that students and school community members are experiencing.
- hold and demonstrate high expectations, while providing as many scaffolds as needed when needed.
- collaborate with families and community to ensure that school plans and initiatives are inclusive of all school members.
- examine their own biases and cultural lenses and respond consistently and effectively to reports of prejudice, bias or discrimination.

Funds of knowledge = knowledge that learners and their family members have because of their unique cultural identities and roles in the family and/or community (e.g., how to resolve conflict, ways to show respect for Elders). Honouring these *funds of knowledge* is valuable as they are culturally relevant and meaningful to learners.

Scaffolds/scaffolding = a variety of instructional techniques used to support students as they move toward stronger understanding and independence

What can I do to start?

When planning, consider:

- What background knowledge do I need to provide, and how can I tap into and validate the knowledge(s) my students have?
- What messages am I sending through the objects and practices in my learning environment? What can I change?
- Who can help me work toward becoming culturally responsive?

When teaching, consider:

- How can I address negative self-talk in my students and model how to “talk back”?
- How can I ensure I find time to listen to my students, and validate their experiences?
- Whose voices and experiences do I amplify? Whose voices are missing or silenced?

When assessing, consider:

- Did I provide adequate explanation and modelling of what I expect, including various exemplars?
- Did I provide space and support for students to choose how to demonstrate their knowledge?
- Has the learner shown an understanding of the outcome, even if it's not what I expected?

For further learning on Culturally Responsive Teaching, please consult the Ready for Rigour Framework (Hammond):

6.4 Historical and Geographical Thinking Concepts

The “Big Six” Historical Thinking Concepts

Historical Significance – looks at why an event, person, or development from the past is important. E.g., what is the significance of a particular event in history? What would have happened if this person [historical figure] had not existed?

Evidence – looks at primary and secondary sources of information. To learn from a piece of evidence we must learn to ask appropriate questions. Different questions would be asked about a diary entry, for example, than would be asked about an artefact.

Continuity and change – considers what has changed with time and what has remained the same (e.g., what cultural traditions have remained the same and what traditions have been lost over time?). Includes chronology and periodization, which are two different ways to organize time and which help students to understand that —things happen between the marks on a timeline.

Cause and Consequence – examines why an event unfolded the way it did and asks if there is more than one reason for this (there always is). Explains that causes are not always obvious and can be multiple and layered. Actions can also have unintended consequences (e.g., how has the exchange of technologies over time changed the traditions of a culture?). This concept includes the question of – agency, that is, who (what individual or groups) caused things to happen the way they did?

Historical Perspective – any historical event involves people who may have held very different perspectives on the event. For example, how can a place be found or – discovered if people already live there? Perspective taking is about trying to understand a person’s mind set at the time of an event, but not about trying to imagine oneself as that person. The latter is impossible as we can never truly separate ourselves from our 21st century mindset and context.

Ethical Dimension – assists in making ethical judgments about past events after objective study. We learn from the past in order to face the issues of today. Perspective-taking and moral judgement are difficult concepts because both require suspending our present-day understandings/context.

The Six Portals of Geographical Thinking

Spatial significance – *The central question about matters of geographical importance is: How do we determine and assess the features that make particular geographical phenomena and locations worthy of attention or recognition?*

Patterns and trends – *This portal raises the question: What can we conclude about the variation and distribution of geographical characteristics over time and space?*

Interrelationships – *This portal raises the question: How do human and natural factors and events connect with and influence each other?*

Geographical perspective – *The key question in understanding the geography of a place is: What are the human and physical features and identities, as understood through various lenses, that characterize a place?*

Evidence and interpretation – *This portal raises the questions: What information can be used as evidence to support ideas about geography, and how adequately does the geographical evidence justify the interpretations offered?*

Ethical judgment – *The central question invoked by ethical judgement is: How desirable and responsible are the practices and outcomes associated with particular geographical actions and events?*

Sharpe, B., Bahbahni, K., & Tu Huynh, N. (2016). *Teaching geographical thinking (revised and expanded edition)*. The Critical Thinking Consortium/ The Royal Canadian Geographical Society.
