Welcome to the third edition of Learning at Home! Teachers from across New Brunswick have prepared these materials with your needs in mind. They have identified important knowledge and skills from our school curriculum for students to learn and practice. These pages contain lots of useful information and interesting activities for learners of all ages and grades.

We invite you to explore and enjoy the learning adventure that awaits you!
Let’s Grow Together!

This collection of activities is intended for younger students (ages 4 to 9). Some activities may require the assistance of an older sibling or adult.

Your Challenge!

Spring is here, and it’s time to get ready to plant our gardens! Your challenge is planning your perfect garden. The activities here will help you make your plan and teach you more about gardening. Do you have to plant your garden for real? That’s up to you and your family. Still, planning and learning about gardening will be fun to do!

You will see French words here and there in the descriptions of the activities. You can try doing some of the activities in French! It’s up to you! C’est à toi!

Warm-Up: Remember What You Already Know!

Think about what you already know about gardens:

- Have you ever had a garden?
- Would you like to have a garden?
- What are your favourite foods from the garden?
- When do people usually plant a garden?
- When do people usually harvest the fruit and vegetables from a garden?

Activity: Imagine Your Perfect Garden!

Let’s start planning our garden! Here are some things you should include in your plans for your garden:

- Will your garden be indoor, outdoor or on a balcony?
- How big or small will it be? What will its area be? How long will its sides be?
- What shape will you choose?
- What type of plants do you want to grow? Will you grow flowers, vegetables, or both? (Will you grow hundreds of delicious Brussels sprouts? Yummy!)
- How many types of vegetables will you grow? How many types of flowers will you grow?
- How will you keep animals out of your garden? Will you have a scarecrow or a fence?

<table>

</tbody>
</table>
When you are ready, you can start drawing your garden! Add colour and label the parts of your garden. When you are done, share your plans for your garden with a parent, sibling, friend, or grandparent. Do you know anyone who is good at gardening or farming?

### French Helper

**Dans mon potager de légumes…**

/ In my vegetable garden…

**Dans mon jardin de fleurs…**

/ In my flower garden…

**Voici mon jardin.**

/ This is my garden.

**Il y a…**

/ There is…

un jardin en pleine terre / an inground garden

un potager de balcon / a patio garden

le jardinage en pots / container gardening

à côté de / beside

en avant / in front

en arrière / behind

environ / around

un rang / a row

un pot / a pot

des concombres / cucumbers

des haricots / green beans

des pommes de terre / potatoes

des tomates / tomatoes

des betteraves / beets

des citrouilles / pumpkins

un tournesol / a sunflower

un géranium / a geranium

une marguerite / a daisy
Activity: Plan Mr. Baker’s Garden!

Imagine that you have a fancy job as a garden planner! Mr. Baker wants to have a garden in his back yard, but he does not know how to plan it. He calls you to plan his garden for him. Can you do the job?

He has purchased 36 metres of fencing to use as an outline for his garden. The problem is that he does not know how wide and long to make his garden! You will investigate this problem and then write a letter to Mr. Baker describing the different options for the dimensions of his garden. Your letter should contain both written explanations and diagrams to make sure he understands his options. **Bonus:** Mr. Baker speaks both English and French. You can write your letter in either language!

Before you write your letter on the next page, find all of the possible dimensions for Mr. Baker’s garden given the amount of fencing he has. You should know something else. Mr. Baker wants a rectangular garden. He just **hates** squares and circles, and don’t even get him started about triangles! Draw a picture to represent each possible solution and find the answers to these questions:

1. What is the smallest garden that can be created that uses all of his fencing? (Remember to use your math skills to find the **area** in metres squared [m²].)

2. What is the largest garden that can be created that uses all of his fencing?

3. Which set of dimensions will you recommend in your letter? Why?
Now, it’s time to write your letter to Mr. Baker! As you write your letter to explain your recommendation, remember to check your work to make sure your client will be really happy. Think about these questions as you check your letter:

- Did you find all of the possible dimensions for his garden?
- In your work, did you identify the smallest and largest area that can be created?
- Does your letter include pictures to help Mr. Baker? Did you label your pictures?
- Did you make a recommendation to Mr. Baker?
- Did you explain why you made this recommendation?

**My Letter to Mr. Baker**

Activity: Do a Field Journal!

Scientists use field journals to record important facts about things that they see outside when they are exploring the world around them! Scientists record things like what the weather is like from day-to-day, what plants and animals look like, and how plants and animals grow and change over time.

You can write your own field journal to keep track of something you can see (observe) in your own household or from your own window. What time does the sun come up? How hot is it outside? What types of birds can you see from your window? Make sure you include drawings in your field journal, and make sure you include the date for all of the things you see! That way, you can see how these things change over time.

If you do plant seeds to get your perfect garden started, you can track their growth and development in your own field journal! You can use a ruler or really anything to measure your plants as they grow. It can be a centimetre (cm), it can be your thumbnail, or it can be something totally different. You decide! Just use the same unit of measurement each time you write your observation down. (My pencil is 9 thumbnails tall!)

French Helper

| Je vois / I see         | par terre / on the ground          | le matin / morning        |
| Je remarque / I notice | semblable / similar                 | l’après-midi / afternoon   |
| J’observe / I observe  | différent / different               | le soir / evening         |
| Voici mon dessin / Here is my drawing | plus petit que / smaller than | une plante / a plant |
| dehors / outside       | plus grand que / taller than        | un arbre / a tree          |
| dans la cour / in the yard | plus gros que / bigger than | un animal / an animal |
| sur le gazon / on the lawn | le vent / wind | un insect / an insect |
|                        | aujourd’hui / today                 | un oiseau / a bird        |

Activity: Water Your Garden!

You have a garden in your yard, but the garden hose will not reach it. You need to think of another way to water it. You will have to look in your recycling bin to see what new containers you could use to carry the water. What size are the containers? If your garden needs 25 litres of water each day, how many times will you need to fill the container to get the water to the garden?
Activity: Map the Moon!

Do you know why the moon has phases? The moon travels around (or orbits) the Earth. As it travels, more or less sunlight reaches it. We can always see the whole moon: it’s just that the Sun can only light up parts of it depending on where the Sun, the moon, and the Earth all are in space.

Farmers and gardeners pay a lot of attention to the weather and the seasons. They have to know when it is safe to plant their seeds and seedlings outside. One way to measure time is by watching the phases of the moon as we can see more or less of it during its 28-day cycle. Did you notice that “moon” and “month” start with the same letters? That is no accident. People have always used the moon to help to measure time.

Draw your own representation of the moon phases, and then give each of them a name! Use your imagination, and then explain why you gave them the names that you picked. (I think I’ll call one Winky!)

Activity: Measure Without Rulers!

If you do not have anything at home to measure with, how else could you measure the dimensions of your garden? You can use nonstandard measurements to measure its sides. For example, you can use the length of your foot, the length of your brother or sister lying down, or even the length of a skipping rope. Whatever you use to measure, don’t leave any spaces between the nonstandard items when you measure with them, and don’t mix different nonstandard measurements. For example, my pencil is 9 thumbnails long. That works. But I can’t say that my pencil is 2 thumbnails and one cell phone long.
Activity: Create!

For generations, many Indigenous Peoples have measured the year by a lunar cycle of 13 full moons, which are visible every 28 days, over the course of the 365 days that make up a year. The names of the 13 moons describe different aspects of nature depending on the time of year. The names vary from Nation to Nation, and from region to region, because of the diversity of the natural landscape and languages across regions.

Do you want to see something cool? This picture of a turtle shows the way many Indigenous Peoples have drawn their calendar! They see the 13 middle parts of the shell as the 13 moons of the year, and the 28 smaller parts on the outside of the shell are the number of days in each of the 13 lunar cycles of the year.

13 x 28 = ?

Draw your own turtle with 13 moons and 28 segments. Are the moons and segments approximately the same size? Did you use anything to help you measure the sizes of the moons and segments on the turtle’s back?

Here are some words you can learn from the Wolastoqey Nation!

turtle: cihkonagc ("jeek-knock-kch")

moon: nipawset ("ne-baw-sek")
Activity: Seeing Changes Over Time!

Gardening and farming are very important to life, especially in New Brunswick. Do you know how farming and gardening have changed over time? You can ask a family member, a family friend or a neighbour all about it. You just need your parents’ permission to do an interview over the phone.

You will have to think about your questions first before you do your interview. You can use your questions to discover how farming/gardening practices, tools, technology and even crops have changed over time. When you have your answers, be creative about presenting your findings. You can draw a picture, write a newsletter article, create a short video, or prepare a pamphlet.

Did you know that during each of the World Wars, Canadians were encouraged to grow some of their own food to help the war efforts? This poster is from World War I.

**My Interview Questions**

---

**French Helper**

- le jardinage / gardening
- l'agriculture / farming
- une ferme / a farm
- une serre / a greenhouse
- un changement / a change
- les pratiques agricoles / agricultural practices
- l'arrosage / watering
- les utilisations technologiques / the technological uses

- le sol / the earth, the ground, the dirt
- biologique / organic
- semer / to sow
- planter / to plant
- cultivar / to cultivate
- récolter / to harvest
- améliorer / to improve
- comme / as
- différent de / different than

- semblable à / similar to
- parce que / because
- plus / more
- moins / less
- auparavant / before
- maintenant / now
- aujourd’hui / today
Activity: Move!

You can measure gardens, and you can measure time. Think for a moment now. How can you measure the ways your body moves or functions?

- I can measure how far I can jump. That’s **distance**!
- I can measure how fast I can run. That’s **speed**!
- I can measure how fast my heart goes when I move. That’s **heart rate**!
- I can even measure how tall I’m getting. That’s **height**!

Let’s do a challenge together. Make sure that you’re doing this in a good place to jump and to land, some place where you won’t get hurt and where you won’t break anything fragile. We’re going to do a standing long jump challenge. You just need something to be the base (or starting point) to jump from. It could be a pillow, a tile, a rock, a stick, or really anything you have. You just have to be able to stand beside it and to measure starting from it! Follow these steps:

1. Bend your knees.
2. Swing your arms back to start.
3. Then, swing your arms forward as you jump as far as you can go.

The first part of you to hit the ground/floor marks how far you got. Measure the distance! Try repeating the jump with little changes to see whether they help or hurt your distance. Can you go farther if you jump off of one foot or two? Can you jump farther on different surfaces like grass or your driveway? Record your distances from each type of jump and see which one was best.

How far did you make it? Could you jump as far as your mom or dad is tall? Which unit of measure was best for your distance? (Think about centimetres, millimetres, feet, and metres.)

<table>

Activity: Make Music!

What plants are you going to plant in your garden? Create a rhythm chant or body percussion that uses all the names of the different plants. Start with long rhythms, and gradually move to shorter rhythms. Now, do the opposite! Ask family members to help you to perform what you create. Here is an example of how to transform words to rhythms.
Bees!

Do you know how pollinators help our gardens grow? Pollinators like bees spread pollen from flower to flower and plant to plant. When they do that, they help the plants to produce seeds! Without pollinators, many plants and trees would struggle to survive. The flowers we plant in gardens can help to make sure that pollinators like visiting our yards and balconies.

Activity: Plant!

Well, we have nothing else to talk about to get ready to grow this spring. Nothing.

Nothing at all.

Except plants!

If you want to plant your gardens now, you can get seeds and planters from around your household to get started. When you eat uncooked fruits and vegetables, see whether you can find the seeds in them. The seeds are easier to see in some fruits and vegetables than others. It’s easy to find seeds in peppers, squashes, and pumpkins. Some of the vegetables we eat can be started from ones grown last year, like potatoes.

When you have your seeds, an old egg carton makes for a great planting tray. You can put a seed in each of the holes for the eggs. When it comes time to plant the seedlings in a bigger pot or outside, you can plant that part of the egg carton, too. What a great way of re-using something to make it new again! Good luck planting! Let’s grow together!
A River Runs Through It

This collection of activities is intended for students ages 10 to 14.

Introduction

Most communities in New Brunswick are built along or close to a river. Each river is a water system and an ecosystem combined, offering benefits and sometimes challenges to the diversity of living organisms within its reaches. These activities will provide you with opportunities to investigate and learn about rivers in New Brunswick.

River Roundup

Let’s start by looking at the parts of a river as it moves from its source to its destination: a lake or ocean. Can you identify the parts of a river? Match the words with the number labels on the image. You may consult the glossary below and on the next page.

<table>
<thead>
<tr>

### Going Fishing

Fishing licenses go on sale in New Brunswick in April. An adult fishing license costs $26.45. There are 85,000 adults living in New Brunswick and approximately 30,000 of them will purchase fishing licenses this year. Estimate how much money this will generate for revenue for the province.
A Water Cycle Experiment

Rivers are \textbf{freshwater} systems whose main source of water is precipitation (rain and snow) from the atmosphere. Fresh water contains less salt than ocean water. Why? Try to create your own water cycle by performing the experiment below.

You will need:
- big and small bowls
- salt
- plastic wrap
- rock/weight
- tape

Steps:

1. Mix warm water and salt in a big bowl.
2. Put a small bowl inside the big bowl.
3. Put plastic wrap over the big bowl.
4. Tape plastic to the bowl.
5. Put a rock on top of the bowl.
6. Put the bowl in a window for 3 days.

What do you see?
The sun will warm the water in the bowl. Look at the bowl each day for 3 days. Taste the water in the small bowl.

What do you taste?

What do you feel?

Using the Land

1. Approximately what percent of the Saint John River Basin is dedicated to each of the land uses found in the chart shown at the far right? Fill in the table with your estimates.

2. What types of land use could fit in the \textbf{Other} category?

3. Since \textbf{Forest} is the largest percentage of land use, what industries could this include?

<table>
<thead>
<tr>
<th>Land use in the Saint John River Basin (NB)</th>

</tbody>
</table>

Information from \textit{UNB/Canadian Rivers Institute}
How’s the Weather?

Examine the following graph of average monthly temperature (°C) and precipitation (mm) for a community in the Saint John River Basin. Answer the questions that follow.

1. What month has the least amount of precipitation?
2. What month has the greatest amount of precipitation?
3. What is the difference in the greatest and least amount of precipitation?
4. What month has the lowest average temperature?
5. What month has the highest average temperature?
6. What is the difference in the highest and lowest average temperature?
7. What is the range, mean, median and mode of the precipitation in Beechwood over the course of the year?

8. What is the range, mean, median and mode of the average temperature in Beechwood over the course of the year?

For Questions 9 and 10, consider this data:
Environment Canada reports that winter 2020 was 1.4 degrees warmer than normal, but the snow depth at the end of February was above normal by about 20%.

9. Using the data above, calculate the actual winter temperature in 2020 (assuming that the overall winter months are Jan–March).
10. Using the data above, calculate the average daily precipitation in February 2020.
Flooding and Contaminated Well Water

Following the spring flood of 2019, homeowners who rely on well water in flooded areas were directed to chlorinate their wells. Chlorination is the process of flushing your well and water system with a chlorine solution to kill harmful microorganisms. This table lists the recommended volumes of chlorine solution for wells of various sizes.

<table>
<thead>
<tr>
<th>Well Depth (ft)</th>
<th>Vol. of Chlorine Solution (litres) per Diameter of Well</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>4 inch</td>
</tr>
<tr>
<td>less than 50</td>
<td>1</td>

</tr>
<tr>
<td>301–350</td>
<td>8</td>
</tr>
<tr>
<td>351–400</td>
<td>9</td>
</tr>
</tbody>
</table>

Source: Government of New Brunswick

1. If your well is 225 feet deep with a diameter of 5 inches, how many litres of chlorine solution will you need?
2. At what well depths are the recommended volumes of chorine for 5-inch and 6-inch wells multiples of the volume for 4-inch wells?
3. If the diameter of your well is 6 inches, what is the circumference of the well? \( c = \pi d \)
4. What is the mode of litres of chlorine solution used for all three well diameters?
5. Which well has a greater surface area? Calculate your answer.
   A well with a 6-inch diameter that is 145 feet deep.
   OR
   A well with a 4-inch diameter that is 225 feet deep.
6. What is the volume of a 333-foot well with a 5-inch diameter? (Let's assume the well has a base and a cap.)

\[ V = \pi r^2 \times h \]
\[ V = 3.14 \times r^2 \times h \]
How Deep? How Wide?

The main stem of the Saint John River upstream of Edmundston averages 50 m wide and 2 m deep. At Fredericton, the river’s average width is 750 m while its depth is 3 m.

1. What is the difference in the average width of the Saint John River above Edmundston and at Fredericton?
2. What is the difference in the average depth of the Saint John River above Edmundston and at Fredericton?
3. Give five possible widths of the Saint John River upstream of Edmundston if the average is 50 m wide.
4. Give five possible depths of the Saint John River in Fredericton if the average depth of the river is 3 m.
5. What is the percent increase in the width of the river from above Edmundston to Fredericton?
6. What is the percent decrease in the depth of the river from Fredericton to above Edmundston?

<table>
<thead>

Waterfalls in New Brunswick

New Brunswick’s rivers and streams offer many waterfalls to explore—some well-known and some hidden. A few are listed here. Examine the table and answer the questions that follow.

1. Place the waterfalls of NB in increasing order. What is the highest waterfall in NB?
2. Is there another way we can represent the “height” of the Reversing Falls? (Hint: It is below sea level.)
3. If the Reversing Falls is 11 m at low tide and the tide rises 8.5 m, what is the total depth of the underwater ledge?
4. What is the range, mean, median and mode of the different heights of the five waterfalls? (See the “How’s the Weather?” activity for hints on calculating these values.)
5. What is the percent increase in the size of the St. George Falls and Third Vault Falls?
Sandbag Math

When floods threaten built structures, people often turn to sandbags and plastic sheeting to help keep the water out. Answer the questions below to find out how much work and material this requires.

1. If it takes 2 people to fill 12 bags in 1 hour, how many bags will they fill in 6 hours?

2. If 1 person can fill 8 bags in 1 hour, how many hours will it take to fill 44 bags?

3. According to the pros, you will need 6 sandbags to keep out 20 cm depth of water for a standard door opening (80 cm). Each sandbag will need approximately 15 kg of sand.
   a. Use a referent to show/explain how deep 20 cm of water is.
   b. How many kilograms of sand will you need to protect 2 doors?
   c. A cubic metre of sand contains about 1600 kg. How many bags will this fill?

4. To create sandbag protection that is more than 3 layers high, you will need to build in a pyramid style. For the structure to be stable, you should build the sandbag wall 3 times as wide as you need it to be high. One sandbag measures 25 cm wide x 52 cm long x 10 cm tall when filled.

   If the sandbag wall is built to protect a garage door that measures 244 cm and the height of the wall must be at least 50 cm, what is the minimum number of sandbags you will need? (Remember: You cannot use part of a bag.)
Une nouvelle—Les inondations au Nouveau-Brunswick

Chaque année les rivières et les lacs du Nouveau Brunswick débordent les communautés. Parfois il y a les conséquences extrêmes pour les résidents, les commerces, et les infrastructures.

Vous allez imaginer que vous êtes journaliste et écrire une nouvelle avec le thème des inondations au Nouveau-Brunswick (spécifique à votre région, si possible). Vous pouvez inclure les prédictions pour les niveaux de la mer, les conditions météorologiques, des craintes des résidents, et les restrictions municipales. Présentation : Vous pouvez communiquer votre nouvelle comme article écrit ou vous pouvez enregistrer la nouvelle comme journaliste à la télévision. Partagez-le avec votre famille ou vos amis.

Answer Keys

River Roundup
1. Source
2. Tributary
3. Confluence
4. Meander
5. Floodplain
6. Downstream
7. Delta
8. Mouth

How’s the weather?
1. February
2. November
3. 43 mm
4. January
5. July
6. 31 degrees difference
7. Using the data below, in mm (your answers may vary slightly)

<table>
<thead>
<tr>
<th>Jan</th>
<th>Feb</th>
<th>Mar</th>

<td>7</td>
<td>0</td>
<td>-3</td>
</tr>
</tbody>
</table>

Range: 31°C, Mean: 5°C, Median: 5.5°C, Mode: none

9. -7.3°C (using the above data for Jan, Feb, March)

10. 74.4 mm (using the above data for Feb)

Using the Land
1. Answers may vary slightly: Forest 85%, Agriculture 5%, Wetlands 4%, Water 2%, Development 2%, Other 2%
2. Answers will vary, e.g., Desert - land that cannot grow food, people cannot occupy, water is scarce.
3. Answers will vary, e.g., Lumber, sawmills, pulp and paper, newsprint, tissues

How Deep? How Wide?
1. Width: 700 m difference
2. Depth: 1 m difference
3. Answers may vary but the easiest would be 52, 52, 50, 49, 48
4. Answers may vary but the easiest would be 5, 4, 3, 2, 1
5. 1400% increase in the width
6. 33% increase in the depth

Waterfalls in New Brunswick
1. Reversing Falls, Fuller Falls, Third Vault Falls, St. George Falls, Grand Falls Gorge
2. -11 m or -36 feet
3. 19.5 m
4. Range: 12 m or 39.5 feet
   Mean: 17.02 m or 55.9 feet
   Median: 15.8 m or 52 feet
   Mode: none
5. 24%

Flooding and Contaminated Well Water
1. 11 litres of chlorine solution
2. The first is 151-200 (4.5, 9, 13.5); Second is 301-350 (8, 16, 24); Third is 351-400 (9, 18, 27)
3. 18.84 inches
4. The mode is 7
5. The second well: a well with a 4-inch diameter and 225 feet deep
6. \( V = 6535.125 \text{ in}^3 \)

Sandbag Math
1. 72 bags
2. 5.5 hours
3. a. Answers will vary. About the width of a sheet of paper, a stair tread, a step, elbow to wrist
   b. 180 kg of sand
   c. 106 sandbags
4. Wall height: 50 cm. Wall width: 150 cm. Garage needs 5 sandbags for length and 6 rows wide at base. Therefore, you will need 105 sandbags.
PUZZLE ANSWERS

Here are the answers to the puzzles on page 32.
Introduction

Let’s start by talking about gratitude. Gratitude is more than just a simple “thank you.” When it’s done as a reflex, it’s practically meaningless. True gratitude, the type that improves our well-being, involves an active, almost meditative experience on what we are thankful for.

Being grateful for what you have is an important life skill that everyone can grow. Grateful people are healthier, happier, and they have better relationships with others. They are also more generous and spend their money more consciously, which improves financial health.

The activities provided here will support your understanding of gratitude, needs and wants, helping others, career planning and goal setting. You will also develop some basic financial skills through budgeting and tracking expenses.

To start, take the next 15 minutes to think about the questions in the picture.

When you are done, write a few sentences about where you are in your understanding of financial literacy today. (You can look back at this to see your progress as you work through the activities.)

Then, write a few sentences about what you hope to learn by doing these activities.

Finally, write a description of the best and worst purchases that you’ve ever made. What made your best buy so great? Why do you feel your worst buy was not such a good purchase? What did you learn from these purchases?
What Are Your Employability Skills?

Unless you win the lottery at a very young age (and 99.999% of you won’t!), you will need to find employment. Do you know the skills you need to find and keep a job and to progress in the work world? The Conference Board of Canada has identified the three employability skills people need to do just that:

1. **Fundamental Skills**
   To be employed, you need the basic skills of being able to:
   - Communicate
   - Manage information
   - Use numbers
   - Think and solve problems

2. **Personal Management Skills**
   To achieve your potential and succeed, you need the skills of being able to:
   - Demonstrate positive attitudes and behaviours
   - Be responsible
   - Be adaptable
   - Learn continuously
   - Work safely

3. **Teamwork Skills**
   To contribute to a task or project, you need the skills of being able to:
   - Work with others
   - Participate in projects and tasks

**Identify Your Employability Skills**

Follow these steps:

1. First, make a list of three things you do well and are proud of. These can be hobbies or activities you participate in.

2. Then, identify which employability skills are highlighted in each of these activities.

3. Finally, reflect on how you demonstrate the skills in your hobby or activity.

If you have a chance, share this information with your family and others. They may be able to identify some of your other skills! Valuing things you do well, knowing your strengths, and knowing areas where you need to grow are important steps towards choosing your first/future career.

<table>

| Ringette player   | Personal Management Skills
- demonstrate positive attitudes and behaviours, be adaptable
- Fundamental Skills
- communicate
- Teamwork Skills
- work with others |
|                   | I have played ringette for nine years. As one of the older players on the team, I know that I have to have a positive attitude so that the younger players don’t get discouraged when we are losing. I also know that I have to communicate game play with my defense partner especially when we are playing on a different line. Teamwork and working with others are also important. Sometimes this is tough because we spend so much time together. We can get on each others’ nerves! Knowing when we have to focus on the goal and work as a team helps us to be successful |

NB Education Supplement: Edition 3
30 May 2020
## How Can You Make Money Now?

Brainstorm a list of all the ways you earn or receive money. How do you earn money now? Where does it come from? What did you have to do to get it? Is it just given to you? If you have a job, don’t forget to include that!

Once you are done brainstorming your list, it’s time to reflect. Did you list chores or odd jobs? Did you list times when you have cared for others, such as babysitting? Did you include selling some of your baked goods at a yard sale? Maybe you didn’t list activities like reading to seniors because you weren’t paid money? Can you be paid in other ways, for example, through gratitude or reciprocal deeds? All of these activities require skills like communication, working safely, thinking and solving problems, working with others, and being responsible. Do any of these sound familiar to you? They should! These are the Conference Board of Canada’s employability skills.

It’s time to put it all together—your skills, hobbies and activities, ways of earning money now (or feeling fulfillment and joy), and potential future career opportunities. Reflect on these ideas and organize them in the chart on the next page.

<table>

How Do I Find a Job?

Now it’s time to look for a job! Finding a job can be challenging; however, there are many resources available to assist you with your job search.

**Where to Start**

To find a job, you can:
- Go to a job fair in your school, city or town. A job fair is an event where employers and job seekers meet to discuss job opportunities.
- Use job boards and career websites to get access to thousands of job opportunities. For instance, Job Bank ([www.jobbank.gc.ca](http://www.jobbank.gc.ca)) is one of the most popular job boards in Canada that provides innovative tools to help you find a job. All job postings are displayed in both official languages. Over one million new jobs are advertised on Job Bank every year with thousands added every day.
- Research employers you wish to work for. Most employers have a “Careers” section on their corporate website where job postings are listed.
- Connect with those in your network.

**A Note on Networking**

Networking is nothing more than getting to know people. Whether you realize it or not, you’re already networking every day and everywhere you go. Networking can be a valuable means to assist you in getting a job and building a career. How effective is your network already? If you had to identify five people in your network to call upon for career or job advice, who would they be? What can you do to improve and maintain your network?

Young people today are very familiar with social networking. Draw upon these skills and experiences to network in reference to your future career and finding a job.

**Ponder a Posting**

Do you know of any jobs available in your community? If you have access to the Internet and a device, search for a job that meets your interests. [Nbjobs.ca](http://Nbjobs.ca) and Job Bank ([www.jobbank.gc.ca](http://www.jobbank.gc.ca)) are great places to start!

You may also want to refer to the employability skills that you already learned about. Do you have the right skills for the job?
How Do I Make a Budget?

A budget is an estimate of how much money you expect to earn and how you will manage it. An important reason to create a budget is to help you save and plan for the future. It also helps you to pay your bills on time. Whether you are saving for a cell phone, a post-secondary tuition, or your first apartment, a budget can help you to achieve your goals.

Meet Twins Amy and John!

Amy and John’s parents taught them from an early age that it’s important to save for their future and not to spend everything right away. The twins’ parents also expect them to share what they earn with others or to give some money to a charity monthly.

One lesson they learned from their parents is that it’s more difficult for some people in First Nation communities to get loans because their homes are community-owned and can’t be used as collateral.

Collateral is property owned by someone who wants to borrow money. They agree that the collateral property will become the property of the bank, company or person who lends the money if the debt is not paid back.

John and Amy’s Challenge

John and Amy’s parents have asked them to create a monthly budget and have given them the goal to save at least $400 each in two years. Have a look at their first monthly budget and answer the questions below. Both twins are able to save some money, but will it be enough to meet their goal?

1. How do John’s and Amy’s expenses compare to their income?
2. After two years will John and Amy each be able to save $400 if every month is the same as this one?
3. How much do each of them need to save each month to reach their goal?

<table>
<thead>
<tr>
<th>Monthly Income or Expense</th>
<th>John</th>
<th>Amy</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earnings</td>

</tr>
<tr>
<td>Buying comic books</td>
<td>$25</td>
<td>-</td>
</tr>
<tr>
<td>Savings</td>
<td>$10</td>
<td>$20</td>
</tr>
</tbody>
</table>

An expense is money spent during a period of time to pay for goods or services.

Expenses can be fixed (the same for a set period of time like monthly rent) or variable (different every time like groceries or restaurant bills).

Income is money received during a period of time from wages, interest, and other sources.
Your Challenge

Imagine that you have a job with a monthly net income (that is the money you take home after taxes and deductions) of $2,050. You have just moved out on your own and are responsible for paying your own way. Build a budget to make the most of your money. Don't forget to save! Some financial planners say that you should “pay yourself first” and encourage you to save 10% if possible.

For help in estimating costs, you can speak to a family member or, if possible, check online for prices.

<table>

(Adapted from FCNB Financial Literacy: A Guide for New Brunswick Teachers.)
Gratitude

In his article “The Science of Gratitude and Why It’s Good for Your Wallet”, Eddie Schmid says that practicing gratitude is a key factor in developing psychological wealth. This is not just about how much money you have but also includes your attitude towards life, relationships, health, and other activities.

Practicing gratitude can help us focus our attention on others, improve our well-being (by helping us feel more positive), handle challenges better, and build strong relationships. It can also benefit your financial wealth by helping you become a more patient and less impulsive consumer. The key to this is to practice gratitude daily!

The Gratitude Letter Experiment

First, read about the gratitude letter experiment. Then, write a letter to someone for or to whom you are extremely grateful. This could be a relative, friend, or teacher. Write directly to the person. Be specific about what the person did, what they said, or how they helped. Don’t worry about grammar or spelling; instead, do your best to express how you feel. Keep your letter to one page.

Once you’ve finished writing the letter, plan a call. Let your special person know that you have something to share, but don’t say what. Let it be a surprise! When you share, tell the person that you are grateful to them and would like to read a letter. Ask them not to interrupt you until you are done. While you read the letter, pay attention to their reaction and to your own. After you read the letter, be open and talk about your feelings together. Another option is to record yourself reading the letter, and then, play it to your special person.

Scientists have proven that one of the greatest contributing factors to happiness in your life is how much gratitude you show. Think about that!

In an experiment, scientists measured participants’ level of happiness. Then, the participants were asked to write a letter to a special person telling them why they are important to them. Some were asked to read the letter out loud to the special person. After that, the scientists measured their level of happiness again. Guess what they found?

All participants had an increase in their level of happiness, but those who read the letter out loud to their special person had the greatest increase!

Gratitude helps you focus on the positive influence of another person in your life. This reminds you that someone cares about you and that you matter. Reading the letter can be a positive influence for both people. Why do you think that is true?
Final Activity

Gratitude fosters an interest in helping others. It’s important to remember that helping others doesn’t mean you have to spend money. There are ways of giving back by using your skills and talents or even donating items you no longer need. Remember, grateful people are healthier and happier, and they have better relationships with others. They are also more generous and spend their money more consciously, practices that improve their financial health. Think of a way you would like to help others and give it a try!

Practicing Gratitude: Tomorrow Together!

There are countless ways that you can reflect on things that you are grateful for and ways to show your gratitude. You may want to consider trying some (or all!) of the options provided below.

**Gratitude Practice** - Watch a video or documentary about the benefits of gratitude or happiness and use the ideas you see to develop your own gratitude practice or make changes to your current practice. One gratitude practice is doing a thank you walk in which you look and listen intently and give thanks for small things in your environment. Another gratitude practice is to deliberately look for the good in the bad.

**Gratitude Rock** – Paint a rock with a meaningful thank you message on it and gift it to a friend or leave it in a random place for people to see. Some examples of messages are “Thanks for clean air” or simply “Breathe.”

**Gratitude Jar** – Make a gratitude jar for your family. Have each family member write something they are grateful for on a strip of paper and then place the strip into a decorated jar. At the end of each week, gather around as a family and take turns reading the strips aloud.

**Gratitude Journal** – Write, record an audio message, or draw a picture to express your gratitude.
Caregiver Fatigue

Why is this important?

Caring for children can be very rewarding, but it can also involve many stressors, especially under the current circumstances. With children unable to attend school, you may be faced with limited supports to help care for them. Before the COVID-19 pandemic, children attended school, and adults were able to meet other commitments such as engaging in paid work, doing household jobs and caring for other children. Now, adults are trying to juggle these tasks in addition to caring for school-age children.

If children have disabilities, caring for them may be even more stressful, challenging and difficult. Caregiver fatigue has often been associated with caring for a person who is elderly, has a chronic illness, or has a disability; however, during the upcoming months, many caregivers for children might also experience caregiver fatigue because of the added stress of the pandemic.

Giving yourself permission to take care of yourself is important so that you are in the best mental and emotional state to care for any children in your care. Understanding what caregiver fatigue is, how to identify the symptoms, and how to manage your stress to avoid it can help decrease its impact.

What is caregiver fatigue?

Caregiver fatigue is “a debilitating psychological condition brought about by unrelieved stress.” By the time most caregivers suspect caregiver fatigue, they’re already suffering many symptoms. Symptoms of caregiver fatigue can include:

- Anxiety, depression, irritability
- Lack of energy
- Overwhelming fatigue, constant exhaustion
- Sleep problems
- Changes in eating habits
- Feelings of hopelessness and helplessness
- Neglect of your own physical and emotional needs

To prevent or reduce caregiver fatigue, here are a few tips:

- Ask for help! Reach out to a friend, family member or community agency. They may be able to help, even from a distance.
- Take breaks throughout your day.
- Exercise, eat well and get enough sleep.
- Start your day 15 minutes before children wake up and do something for you. Enjoy your first cup of coffee in silence, meditate, stretch…something, anything, just for you!
- Make a list of everything you need to do during the day. See if there are any items you can delegate to someone else.
- Focus on things you can control. Some examples of things you can control could be how you react to situations and where you invest your time and energy.
- Set realistic goals. Break larger tasks into smaller manageable steps and focus on one step at a time.
- Explore community agencies or supports that might be able to help. One example is Strongest Families (strongestfamilies.com). They offer family-centered, online care that is customized to the family’s needs.

Resources

**GNB Social Development: Family Supports for Children with Disabilities**
A voluntary program that provides social work support and financial resources to families to assist with the care and support required to meet the special developmental needs of their child with a disability.

**New Brunswick Multicultural Council**
A bilingual umbrella organization for immigrant-serving agencies and ethno-cultural associations in New Brunswick. Find out more by visiting the website or contact them at (506) 453-1091 to ask to be connected to your local immigrant-serving agency or ethno-cultural association, who can help you connect to same-language speakers and other supports.

**New Brunswick Association for Community Living:**
**Strong Voices for Families**
A provincial program offering support to families who have a child with an intellectual or developmental disability. Visit the website or call 1-866-622-2548 (choose option 2).

**Vitas Healthcare: Signs of Caregiver Burnout and How to Prevent It**

**Web MD: Recognizing Caregiver Burnout**

Notre collation

1. Voici une pomme.
2. Voici une banane.
3. Voici une orange.
4. Voici des carottes.
Voici des craquelins.

Voici du fromage.

Voici des raisins.

Voici notre collation.
Puzzle Time!
Answers to puzzles 4 and 5 are on Page 20.

Puzzle 1: Test Your Geometry Memory
Remembering sizes in geometry is hard! From memory, draw each of the following objects as closely to its actual size as you can:

- A circle the size of a loonie
- A circle the size of a bottle cap
- A square the size of a plastic bread tag
- A rectangle or square the size of a piece of Lego
- An object of your choice

Then, compare your drawings to the actual objects. How did you do?

Puzzle 2: Classic Tic-Tac-Toe
Players: 2
Materials: pen, pencil, or marker
Instructions: Each player is assigned “X” or “O.” The players take turns filling in one space of the grid at a time. The first to fill three spaces in a row, column or diagonal with their letter is the winner.

Puzzle 3: Tic-Tac-Toe with a Twist
Players: 2
Materials: pen, pencil, or marker
Instructions: Players take turns filling in one space of the grid, but they can choose to fill in an “X” or an “O” each time. For example, a player can fill in an “X” on one turn and an “O” on the next turn. The first player to complete a row, column, or diagonal of either letter is the winner.

Puzzle 4 and 5: AMAZING Mazes
Use your finger or a pencil to find the way to the centre of these mazes.

This famous maze was built with hedges on the grounds of Hampton Court Palace in England.
Let’s Get Moving!

Remember to always check your equipment and your space! Play fair and have fun!

**Disc-Golf with a Twist!** This activity is designed for students ages 5 and up.

**Have you ever played mini-golf? This version of disc-golf is similar to mini-golf.**

**Materials:** Flying disc (e.g., Frisbee), an open area, and trees or other objects to use as targets

**Big idea:** I can demonstrate ways to receive, retain, and send an object with increasing accuracy.

**Safety:** This activity should be performed in an open area, away from traffic.

### Setting Up Your Course

In an open area, set up your disc-golf course using trees or other objects as targets. Set up at least 5 targets and number them. Just like in mini-golf, you will also need to choose and mark the starting point for each target. (The starting point is where you will first throw your disc toward the target.)

#### Challenge!

Be creative when designing your disc-golf course! Can you add any obstacles that would change the direction of the shots? In narrow spaces, players could even roll the disc on its edge to hit the target!

### How to Throw a Disc

Before you get started, here’s a quick review on how to throw a disc:

1. Look at your target.
2. Place your thumb on top, index finger on side, and other fingers underneath your disc.
3. Point your index finger towards your belly button, flick your wrist, and release the disc towards the target.
4. Step forward with the same foot as your throwing arm.

### How to Play the Game

1. From the first starting point, throw the disc towards Target 1.
2. If the disc does not hit the target, go to where it landed and throw it again from that spot. Continue doing this until you successfully hit the target. Keep track of the number of attempts it takes you to hit the target (just like in mini-golf).
3. Move to the next starting point, and try to hit the next target.

#### Challenge!

After hitting all of the targets, add up your points just like in mini-golf. Challenge a family member to see who can get the lowest score!

### Reflect

When you’re done, think about these questions:

- Was it easier to hit the target when you were farther from it or closer to it?
- Did anything else affect where your disc landed?
Practice English at Home
Ages 5 to 11
Beginner (A1/A2) Level of English Language

Activity 1

1. Read the short story "I Live in New Brunswick":

I live in New Brunswick.
It is spring in New Brunswick.
Spring is a season.
New Brunswick has four seasons: winter, spring, summer and fall.
Winter is my favourite season because it snows in winter.
Winter is cold.
But I have a warm coat, mittens, hat and boots!

2. Find two new words.

3. Write them on your letter list.

4. Read the story again to your family.

<table>
<thead>
<tr>
<th>Word</th>
<th>Picture</th>
<th>Translation</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>apple</td>
<td>ابل</td>
</tr>
<tr>
<td>B</td>
<td>ball</td>
<td>球</td>
</tr>
<tr>
<td>C</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Start a letter list. Try to write a word for every letter from A to Z. For example, a-art, b-blue, and c-cold.

Draw a picture or write the word in your language.

Talk with your family in English.
- Act out the words on your letter list.
- Ask your family to guess the words.
- Ask them, “Can you think of more words for my list?”
### Activity 2

**Reading and Viewing**
- Read and repeat these words for **things to do**:
  - Learn a new song
  - Try a new sport
  - Meet a new friend
  - Learn a new word
  - Read a new book
- Think about **what you like to do**.

**Writing and Representing**
- Find a new piece of paper.
- Write the title “Things I like to do”.
- Write a list of things you like to do.
  - I like to __________.
- Try to write **seven** things you like to do.
  - Draw a picture beside each thing you like to do.
  - Next, write **three** things you do not like to do.
  - I do not like to __________.
  - Draw a picture beside each thing.

**Speaking and Listening**
- Talk with your family in English:
  - Read your list of things you like to do to your family.
  - Ask your family, “What do you like to do?”
  - Listen to their answers.
  - Do you and your family like to do some of the **same** things?
  - Read your list of things you do not like to do to your family.
  - Ask your family, “What do you not like to do?”
  - Listen to their answers.
  - Do you and your family not like to do some of the **same** things?

If you have Internet and a device:
1. Go to [https://www.uniteforliteracy.com](https://www.uniteforliteracy.com).
2. Search “Croí” to find the story “Something New to Do” by Quilean Croi.
3. Read the story.
### Activity 3

**Reading and Viewing**

Watch ten minutes of television in English.

Listen for two new words.

Write them on your letter list.

<table>
<thead>
<tr>
<th>Word</th>
<th>Picture</th>
<th>Translation</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>apple</td>
<td>جَبَلوُنْ</td>
</tr>
<tr>
<td>B</td>
<td>ball</td>
<td>球</td>
</tr>
<tr>
<td>C</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Think about the characters from the show.

**Writing and Representing**

Draw a picture of a character from your TV show.

Write the character’s name. “The character’s name is ______.”

Write the character’s age. “The character is _____ years old.”

Write whether the character is a boy or girl. “The character is ______.”

- The character’s name is Clara.
- Clara is 12 years old.
- Clara is a girl.

**Speaking and Listening**

Talk with your family in English.

- Show them your picture of the character.
- Tell them the character’s name.
- Tell them the character’s age.
- Tell them whether the character is a boy or a girl.

**Activity 4**

**Reading and Viewing**

Read a book in any language.

You can read a book that is in your home.

Or, you can find a book online here: [https://globalstorybooks.net/](https://globalstorybooks.net/)

Find two new words.

Write them on your letter list.

<table>
<thead>
<tr>
<th>Word</th>
<th>Picture</th>
<th>Translation</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>apple</td>
<td>جَبَلوُنْ</td>
</tr>
<tr>
<td>B</td>
<td>ball</td>
<td>球</td>
</tr>
<tr>
<td>C</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Writing and Representing**

Write 7 sentences about yourself.

**All about me.**

1. My name is ______.
2. I am _____ years old.
3. I was born in _____.
4. Now, I live in ______.
5. My favourite foods are ______, ______ and ______.
6. My favourite colours are ______, ______ and ______.
7. My favourite people are ______, ______ and ______.

**Speaking and Listening**

Talk with your family in English.

Ask them:

1. How old are you?
   *They should answer: I am _____ years old.*

2. Where were you born?
   *They should answer: I was born in _____.*

3. What are your favourite colours?
   *They should answer: My favourite colours are ______ and ______.*

Try asking them “Why?”, too!
### Activity 1

#### Reading and Viewing

Read the paragraph called **“Shopping”**.

Shopping 🛍️ is something that most people do.

Some people shop every day.

Other people do not shop every day. They may shop once per week, or they may shop once per month.

They may go shopping in person.

Or, they may shop online.

Some people like to shop for groceries.

Other people prefer to shop for clothes.

I love to shop for books!

1. Find three new words.
2. Find a notebook. Write “New Words” on the cover. Open the notebook.
3. Draw three boxes in the notebook.

<table>
<thead>
<tr>
<th>Word</th>
<th>What it means</th>
<th>In my language</th>
<th>Picture</th>
<th>Sentence</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

4. Fill in the boxes with three new words.

#### Writing and Representing

Find a notebook. Write “Learning English” on the cover. Open the notebook.

- Write today’s date.
- Write the title “My Store”.
- Find five items in your room that you could find in a store.
- Write the name of each item. Write how much you think it would cost.

For example:

<table>
<thead>
<tr>
<th>May 22, 2020</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>My Store</strong></td>
</tr>
<tr>
<td>1. Red T-Shirt $10</td>
</tr>
<tr>
<td>2. Black Pants $20</td>
</tr>
<tr>
<td>3. Pink Hat $6</td>
</tr>
<tr>
<td>4. ...</td>
</tr>
<tr>
<td>5. ...</td>
</tr>
</tbody>
</table>

#### Speaking and Listening

Talk with your family in English:

- Show them the items you put on your list.
- Talk about the items. (“This is a _____. It costs ____.”)
- For each item, ask them, “Do you think this should cost more or less?”
<table>
<thead>
<tr>
<th>Reading and Viewing</th>
<th>Writing and Representing</th>
<th>Speaking and Listening</th>
</tr>
</thead>
<tbody>
<tr>
<td>Read for at least 15 minutes.</td>
<td>Start a new page in your Learning English notebook.</td>
<td>Practice speaking English with your family or friends.</td>
</tr>
<tr>
<td>Look for words that start with H, A, or F.</td>
<td>Write today’s date.</td>
<td>• Read them your name poem.</td>
</tr>
<tr>
<td>Read a book that is in your home.</td>
<td>Write the title “Name Poem”.</td>
<td>• Tell them what each word means.</td>
</tr>
<tr>
<td>Or, find a book online here: globalstorybooks.net.</td>
<td>Write your name down the side of the paper like this:</td>
<td>• Tell them why you chose each word.</td>
</tr>
<tr>
<td>Use your Learning English notebook.</td>
<td>Think of words that match each letter in your name.</td>
<td>• Ask them, “What other words could you use to tell about me?”</td>
</tr>
<tr>
<td>• Write today’s date.</td>
<td>They can be things you like or words that are about you.</td>
<td></td>
</tr>
<tr>
<td>• Divide your page like this:</td>
<td>Draw a picture of yourself beside your name poem.</td>
<td></td>
</tr>
<tr>
<td>H A F</td>
<td>L: Light</td>
<td></td>
</tr>
<tr>
<td>• Write the words you found.</td>
<td>A: Active</td>
<td></td>
</tr>
<tr>
<td>• Write two sentences about what you read:</td>
<td>U: Umbrellas</td>
<td></td>
</tr>
<tr>
<td>1. Today, I read _______.</td>
<td>R: Relaxed</td>
<td></td>
</tr>
<tr>
<td>2. I learned that_____________.</td>
<td>E: Excited</td>
<td></td>
</tr>
<tr>
<td></td>
<td>N: Nice</td>
<td></td>
</tr>
<tr>
<td>Challenge! Try doing your first and your last name.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>May 26, 2020</th>
<th>My New Words</th>
</tr>
</thead>
<tbody>
<tr>
<td>H   A   F</td>
<td></td>
</tr>
</tbody>
</table>
### Reading and Viewing

**Activity 3**

Read the short story “I Love to Learn New Things”.

I love to learn new things. Learning new things keeps life interesting.

I have learned a lot in the first five months of this year: 2020.

I learned how to work from home.

I learned many new words. One of the new words I learned is, “upload.”

I learned how to use Microsoft Teams.

I learned that I live in a place with many helpful people.

I learned how to make bread.

I learned about physical distancing to stop illness.

I learned that family is the most important thing in life!

Open your New Words notebook.

Draw two new boxes in the notebook.

| Word: |
|---|---|
| What it means: | In my language: |
| Picture: | Sentence: |

Fill in the boxes with two new words.

### Writing and Representing

Start a new page in your Learning English notebook.

Write today’s date.

Write the title “In 2020, I Learned”.

List six things you learned so far in 2020.

Think about:

- Did you try a new food?
- Did you make a new friend?
- Did you watch a new movie?
- Did you learn a new sport?
- What did you learn at school?

Think about your list of things you learned.

Read your list to your family.

Tell them about the things you learned.

Ask them, “What have you learned in 2020?”

Do you have some of the same things on your lists?

### Speaking and Listening

May 28, 2020

**In 2020, I Learned**

In 2020, I learned:

1. ...
2. ...
3. ...
4. ...
5. ...
6. ...

Think about your list of things you learned.

Read your list to your family.

Tell them about the things you learned.

Ask them, “What have you learned in 2020?”

Do you have some of the same things on your lists?
Newspaper Building Challenge!

The Materials
Newspaper (flyers or any paper), a pencil, and masking tape

Helpful Hints
Some shapes are stronger than others when building structures. Shapes like triangles, hexagons, arches and semi-circles are a few of the best weight-bearing shapes.

To reinforce your newspaper, you can do an accordion fold, or roll each sheet tightly around a pencil, tape it, and then take the pencil out so it looks like a straw. Can you find other ways to reinforce your newspapers to have a stronger structure?

The Challenge!
We challenge you to:
1. Build a structure as tall as yourself.
2. Build the highest structure that you can in 10 minutes.
3. Build a structure that will hold a heavy book for at least 1 minute.

Reflect
After you build a structure, think about these questions:

What was most challenging?
How did I overcome the challenges?
What could I do to improve my structure?
How does this apply to the job of an engineer?

Share! Send pictures of your structures to the address at the bottom of this page! If you have Internet, a device and a parent’s permission, you can also share your structures with Science East on Facebook, Twitter or Instagram!
