

AMENDMENT No. 2
Made to Approval to Operate No. **I-10081** issued to:

Twin Rivers Paper Company Inc.
for the operation of
**Edmundston Sulfite and Groundwood Pulp Mills & the Saint-Basile
Effluent Treatment Plant**

The Approval to Operate with identification number **I-10081**, issued under the *Air Quality Regulation - Clean Air Act*, is hereby amended by:

Amending condition 10 (h) and, 30 (a) and (b) under TERMS AND CONDITIONS of Schedule "A" as per the following:

10. **Annual Air Quality Report:**

(h) the annual average ambient SO₂, and the 98th percentile daily average of the PM_{2.5} measured near the Police Station (formerly known as Cormier School) and St. Mary's Academy monitoring stations;

30. **Ambient Air Quality Monitoring:**

Twin Rivers shall:

(a) operate an ambient EPA certified SO₂ monitor (installed, maintained, and operated in accordance with quality assurance requirements provided by the Department) near the Police Station (formerly known as the Cormier School) with continuous feedback to the mill and equipped with sufficient data logging capability to provide 5-minute averages, one-hour averages (calculated from the 5 minute data), 24-hour running average and annual average reading for SO₂ expressed in parts per billion at standard conditions; and, an EPA certified PM_{2.5} monitor configured to provide the one hour averages and 24 hour average PM_{2.5} readings based on the midnight to midnight time period, expressed in micrograms per cubic meter.

(b) operate an ambient EPA certified SO₂ monitor (installed, maintained, and operated in accordance with quality assurance requirements provided by the Department) at the St. Mary's Academy with continuous feedback to the mill and equipped with sufficient data logging capability to provide 5-minute averages, one-hour averages (calculated from the 5-minute data), 24-hour running average and annual average reading for SO₂ expressed in parts per billion at standard conditions.
