List of Interchangeable Pharmaceutical Products	1
<hr/>	

New Brunswick Formulary:

The New Brunswick Formulary is a listing of interchangeable pharmaceutical products. It is not a benefit formulary.

An interchangeable pharmaceutical product is defined as one which contains identical amounts of the identical active ingredients in an identical dosage form. Interchangeable products do not necessarily contain the same non-medical ingredients.

An electronic copy of the Formulary is updated monthly on the NBPDP web page. . To have your name added to the e-mail mailing list to receive notification of monthly updates and Formulary Update Bulletins, please sign up online at [NBPDP Email Announcements](#).

New Brunswick Product Selection Committee:

The New Brunswick Product Selection Committee is charged with the responsibility of designating products with the same non-proprietary name as:

1. therapeutically interchangeable; and,
2. appropriate for the purpose of dispensing under the New Brunswick Pharmacy Act and Regulations

Certain manufacturer and product standards have been established for this purpose ([Requirements for Manufacturers' Submissions](#)). They are, however, not intended to be all inclusive. The Product Selection Committee reserves the right to take into consideration any other factors consistent with its terms of reference which it considers to be in the public interest.

Interchangeable Product Submissions:

Manufacturers may forward submissions to the Product Selection Committee at any time. Submissions should be sent via email to NBPSC-Submissions@nbdp-pmonb.ca . Samples and deposit can be forwarded to:

Secretary, Product Selection Committee

EXPLANATIONS

- (1) Anatomical Therapeutic Chemical Classification
- (2) Dosage form, route and strength of the drug. Strength represents the amount of ingredients present in a solid dose form (Tablet) or in one gram or one millilitre of a preparation (Cream, Liquid, etc)
- (3) Brand or Trade name of the drug
- (4) The Drug Identification Number (DIN), which has been assigned by the Health Protection Branch of the Department of National Health and Welfare
- (5) Three letter identification code assigned to each manufacturer
