2020 Hunt & Trap
Aboriginal and Treaty Rights

The Mi'gmaq, Peskotomuhkati (Passamaquoddy), and Wolastoqiyik (Maliseet) Peoples have sustained their families and communities in New Brunswick for thousands of years. At the time of contact with European settlers they had vibrant cultures with economies based on the use and trade of plants, fish, seafood, and wildlife, supported by land and water networks connecting camps, villages, and spiritual places. Their relationship with the land has always been one of respect, reciprocity, and conservation of natural resources.

The Aboriginal Peoples of North Eastern North America signed Peace and Friendship Treaties with Great Britain (the Crown) in the 18th century. Under these Treaties the Aboriginal signatories agreed to co-exist peacefully with British settlers, which in turn helped the British and other settlers establish the Atlantic provinces and country we live in today.

To this day, the Peace and Friendship Treaties are the foundation of the relationship between Aboriginal Peoples and federal and provincial governments. These treaties have been included in the Canadian Constitution since 1982. They protect the right of Aboriginal Nations to live on the land and harvest natural resources to support their cultural, social, and economic wellbeing.

Treaties are signed on a nation-to-nation basis and the relationship is between the people of those respective nations. Therefore, we are all Treaty People. Let’s all take our Treaty responsibilities seriously, respect differences in rights, celebrate our shared enjoyment of the lands, waters, and resources, and work as partners in protecting these precious natural resources.
A message from the Minister of Natural Resources and Energy Development

For many of us, this year has been a difficult one as we deal with the effects of a global pandemic. As an avid outdoorsman, I take great solace and comfort spending time in the wide-open spaces that New Brunswick has to offer. We are fortunate to live in a province with rich natural resources, including our forests, waterways and wildlife. Hunting and trapping is a tradition for many, and something we can still enjoy as we all adapt to a “new normal.”

The Department of Natural Resources and Energy Development remains committed to efforts to effectively manage our forests and wildlife in a responsible and sustainable manner. Hunters and trappers are essential participants in wildlife management planning as well. Your feedback and actions provide important information that helps the department monitor wildlife health and populations.

Safety is also paramount, as well as respecting the environment. Thank you to the countless volunteer instructors who teach firearm safety/hunter education, trapper education and bowhunter education.

This guide contains information about the hunting and trapping season dates, bag limits and wildlife management zones. It also includes licensing and land access information and a summary of wildlife regulations. This publication is a valuable resource that will answer many of your hunting or trapping questions.

Best wishes for a safe and successful hunting and trapping season.

Sincerely,

Hon. Mike Holland

Wildlife Management Zones (WMZs)

Booklets outlining exact boundaries are available at your local Natural Resources and Energy Development (DNRED) office, Service New Brunswick centre, or online at www.gnb.ca/naturalresources.

Important
This pamphlet provides a summary of major hunting and fur harvesting regulations and licence information about the 2020-21 season. It is not a legal document. Information is current as of March 31, 2020. It is the responsibility of the licence holder to know the rules and regulations. For additional information, contact your nearest Natural Resources and Energy Development office, www.gnb.ca/naturalresources

**FIREARMS MUST BE CASED AT ALL OTHER TIMES**
Hunting

New for 2020

- The period during which hunting on Sunday is permitted has been changed, and now extends from October 14 to December 31, inclusive.
- Residents now have the option to purchase the Resident Big Game Bundle of hunting licences. The Resident Big Game Bundle includes the Resident Deer and Game Bird licence (at regular price), the Resident Bear licence (25% discount), and the Resident Varmint licence (25% discount). This bundle is available until the last day of varmint season (Sep. 19, 2020).
- The fee for the Resident Minors Bird and Small Game Licence has been eliminated, removing a barrier to youth participation.
- Those wishing to hunt varying hares with the assistance of dogs under the authority of a Deer and Game Bird Licence (Class 3) or a Bird and Small Game Licence (Class 4) are now required to apply for a Hound Hunting Permit from the Fish and Wildlife Branch.
- The requirements to use specific breeds of hounds when hunting varying hare under a Hound Hunting Permit have been removed. Those wishing to hunt varying hare with the assistance of dogs may now use any breed or type of dog they choose.
- Minors 12-15 years of age wishing to hunt varying hares with the assistance of dogs under a Bird and Small Game Licence (Class 4) may now apply for a Hound Hunting Permit.

Definitions

Adult: A person who has attained the age of 19 years.

Cased firearm: A firearm which is in a securely-fastened case, wrapped in a blanket or canvas and securely tied, or in a locked luggage compartment of a vehicle.

Firearm: A rifle, shotgun, pellet gun, air gun, muzzle-loader, bow or crossbow.

Loaded firearm: A firearm carrying shells or cartridges in the breech or magazine or in a clip that is attached to the firearm, or a crossbow that is cocked and charged with a bolt, arrow or similar projectile.

Resident:

(a) A person who has lived in the province for six months immediately prior to making an application for a licence.
(b) A person who has lived in the province for two weeks immediately prior to making an application for a licence, where that person proves to the satisfaction of the Minister that he or she was required to take up residence in the province as a result of being transferred to the province by his or her employer.
(c) A person who is taking educational training of a three-month minimum duration within the province and has been living in the province for a two-week period immediately prior to applying for a licence.
(d) A person who lived in the province for six months immediately prior to taking educational training outside the province and who is continuing such education.
(e) A person who proves to the satisfaction of the Minister that he or she has lived in the province for the purpose of employment for an aggregate period of six months within the 12 months immediately preceding the making of an application.
(f) A person who was born in the province and who owns real property in the province;
(g) A person who was born in the province and who is a member of the Canadian Armed Forces or the RCMP.
(h) A person who has his or her principal place of residence in the Province and is the holder of a valid New Brunswick driver’s licence or a valid photo identification card issued by the Minister of Justice and Public Safety and referred to in the regulations under the Financial Administration Act.

Note: No person shall be eligible to apply for or obtain a Resident Moose Licence unless he or she is a resident whose principal place of residence is within the province. This does not apply to New Brunswick-born serving members of the Canadian Armed Forces or the RCMP who live or serve outside of the province.

Resort of wildlife: Any water or land, including highways or roads, that is frequented by wildlife.

Vehicle: A means of conveyance of any kind used on land, including any attached accessories.
General regulations

Hunter education

- All gun hunters born on or after Jan. 1, 1981, and all first-time gun hunters must complete a Firearm Safety/Hunter Education course.
- Gun hunters who were born before Jan. 1, 1981, and who are not first-time hunters, may show a previous hunting licence as proof of experience.
- All persons younger than 16 must show proof of having taken a Firearm Safety/Hunter Education course or a Bow Hunter Education course. They must be accompanied by an adult while hunting.
- All bow/crossbow hunters born on or after Jan. 1, 1981 or first-time bow/crossbow hunters must complete a recognized stand-alone Bow Hunter Education course meeting the National Bowhunter Education Foundation or Atlantic Canada Bowhunter Education Course standards.
- Bow hunters born before Jan. 1, 1981, and who are not first-time bow hunters, may show a previous hunting licence allowing use of a bow or crossbow.
- Firearm Safety/Hunter Education and Bow Hunter Education certificates from other provinces, territories and the United States are valid in New Brunswick.

Hunter Orange clothing

From Sept. 1 to Dec. 31, the following people must wear a solid fluorescent hunter orange jacket or vest and a hat of solid fluorescent hunter orange:

- hunters
- fur harvesters carrying a firearm
- licensed guides (while guiding hunters)

Jackets, vests and hats must be visible from all directions. This does not apply to waterfowl hunters.

Many manufacturers of hunting clothing place a logo or decal on hats and other articles of clothing. The following items on a hat or other clothing article that is otherwise solid-coloured hunter orange do not disqualify that clothing from meeting the hunter orange requirements.

1) decal or logo;
2) non-orange coloured peak (on hats); or
3) zippers, buckles, straps or buttons.

The use of high-visibility garments is intended to make hunting as safe as possible for participants. Hunters are also reminded that thousands of people participate in other forms of outdoor work and recreation in the province’s forests, marshes and fields. They are not required to wear high-visibility garments; hunters should use caution at all times.

Closed and restricted areas

Camps, parks and historical sites

- Scout, Guide and youth camps, parks and historical sites are closed to hunting, trapping and snaring. Firearms must be cased in these areas.

Wildlife Refuges and Wildlife Management Areas

- All Wildlife Refuges prohibit hunting, trapping and snaring.
- Hunting, trapping and snaring are prohibited in the following Wildlife Management Areas: Burpee, King’s Landing Historical Settlement, MacDonald Farm Provincial Heritage Place, Minister’s Island, Mount Carleton, le Village Historique Acadien and West Collette.
- Hunting prohibited; however, trapping and snaring are permitted in the Mount Ararat (Gagetown Island) Wildlife Management Area.
- Firearms must remain cased when in Wildlife Refuges or Wildlife Management Areas that prohibit hunting, trapping and snaring.
- Refer to the Fish and Wildlife Act for a legal description of the above areas.

Protected Natural Areas (PNAs)

- Hunting, trapping and snaring are prohibited in Class I PNAs. The Class I Protected Natural Areas are: Bull Pasture Bog, Demerchant Brook, Hovey Hill, St. Croix River Islands, Whitehorse Island and Wilson Brook. Contact your local Natural Resources and Energy Development office for information about the location of these sites.
- Entering a Class I PNA to retrieve wounded game is permitted.

Restrictions – Class I PNAs

Hunting, trapping and snaring are permitted in Class II PNAs subject to the following restrictions:

- Bear baiting and placing of bait containers are allowed no earlier than two weeks before the season opens.
- Bait containers must be removed within two weeks after the season closes.
- Cutting vegetation for a shooting lane is prohibited.
• Cutting new trails to retrieve game is not permitted. Hunters should be outfitted with proper equipment to retrieve their game, regardless of the distance of the felled animal to the road.

• Cutting vegetation – such as bushes, shrubs, tree branches and non-woody vegetation – to construct and/or camouflage a hunting blind/stand is permitted, but only in the immediate vicinity of the blind/stand.

• Bringing bushes, shrubs, tree branches and other vegetation into a PNA is prohibited.

Further information is available from any Natural Resources and Energy Development office or www.gnb.ca/naturalresources

Email: fw_pfweb@gnb.ca
Tel.: 506-453-3826

National Wildlife Areas
Within National Wildlife Areas, the possession of lead shot is prohibited. Other restrictions apply to activities including the use of motor vehicles, fires and camping. The National Wildlife Areas in New Brunswick are: Tintamarre, Shepody, Cape Jourimain, Portobello Creek and Portage Island. For information on additional restrictions, hunters should contact Environment and Climate Change Canada, Canadian Wildlife Service: 1-800-668-6767, 506-364-5044, ec.enviroinfo.ec@canada.ca.

Other areas
• Hunting and trapping are not permitted within the boundaries of the Sentier NB Trail or a provincial park under the authority of the Parks Act and regulations of New Brunswick.

• It is unlawful to be in possession of a firearm on board any watercraft on tidal waters, or within 50 metres of tidal waters during the closed season for migratory game birds described under the Migratory Birds Regulations (not including tidal waters of the St. John River upstream of the Reversing Falls Highway Bridge).

Hunting on Sunday
Hunting is prohibited on all Sundays except those that fall between Oct.14 and Dec. 31, inclusive, in any year.

Forest roads on Crown land
On Crown land, it is illegal to:
• barricade a forest road; or,
• leave a vehicle or any equipment unattended on a forest or logging road in such a manner that it prevents the passage of another vehicle.

Posting of land
Landowners may post their property to restrict or prohibit hunting, shooting, snaring or trapping within the posted area in accordance with the Fish and Wildlife Act - Posting of Signs on Land Regulation.

Requirements are as follows:
• Landowners must use either printed word signs or 25-centimetre coloured circular disks or painted 25-centimetre-wide bands around trees.

• Signs, disks or bands must be placed at each corner and access point and at intervals not to exceed 100 metres along the entire boundary of the posted area.

• Yellow disks or yellow painted bands indicate that hunting, shooting, trapping or snaring is allowed by permission only.

• Red disks or red painted bands indicate that hunting, shooting, trapping or snaring is prohibited by any person, including the landowner.

• Landowners posting land with printed word signs will specify “No shooting,” “No hunting,” “No trapping,” “No snaring” or any combination thereof and whether such activity is prohibited or by permission only.

Further information is available at Service New Brunswick and Natural Resources and Energy Development offices and online at www.gnb.ca/naturalresources.

Motor Vehicle Trespass
In accordance with the Trespass Act – Prohibition of Motor Vehicles:
• It is unlawful to trespass with a motor vehicle on lands that are properly posted.

• Blue disks, painted blue bands, or signs indicating “No Trespassing” are used on agricultural lands to prohibit the use of motorized vehicles on those lands.

For more information on motor vehicle trespass, please consult the Trespass Act.

Whether signs, disks, or bands have been posted in relation to hunting, trapping, snaring, or motor vehicle access, it is illegal to tear down, remove, damage, deface, or cover up a sign, disk, or band that has been posted.
Even when private land is not posted, it is proper etiquette for hunters to seek landowner permission before hunting or pursuing wounded wildlife on those private lands.

**Legal distance**

- It is illegal to discharge a rimfire, rifle a centre-fire rifle or shotgun loaded with ball or slug within 400 metres of a dwelling, school, playground, athletic field, solid waste disposal site or place of business.
- It is illegal to discharge any shotgun or muzzle-loading firearm within 200 metres of a dwelling, school, playground, athletic field, solid waste disposal site or place of business.
- It is illegal to discharge any bow or crossbow within 100 metres of a dwelling, school, playground, athletic field, solid waste disposal site or place of business.

*Buckshot* is not considered “ball” or “slug” and can be discharged between 200 metres and 400 metres.

**Firearms**

- It is unlawful to carry a loaded firearm in or upon any vehicle, including all-terrain vehicles and snowmobiles, even when the vehicle is stationary or parked. This also includes any structure attached to a vehicle, such as a trailer, rack or platform.
- It is unlawful to possess in a resort of wildlife:
  - A bow with a draw weight of less than 10 kilograms (22 pounds);
  - Or: A crossbow with a draw weight of less than 68 kilograms (150 pounds).
- Deer, moose and bear hunters using firearms or bows must use:
  - A centre-fire rifle of any calibre;
  - Or: A shotgun with ball, slug or lead shot larger than size BB (including buckshot) or steel shot larger than size F;
  - Or: A bow having a draw weight of not less than 20 kilograms (45 pounds) together with arrows fitted with broadheads no less than 20 millimetres in width;
  - Or: A crossbow with bolts fitted with broadheads no less than 20 millimetres in width;
  - Or: A muzzle-loading firearm.
- Any bow that has an attached mechanical device that holds the bow at full or partial draw is subject to the same regulations as crossbows, with the exception of draw weights. Minimum draw weight specifications for bows equipped with these devices are the same as for bows without these devices: minimum 20 kilograms to hunt deer, moose or bear, and minimum 10 kilograms to hunt other species.
- It is unlawful to use a bow and arrow, or crossbow, for the purpose of killing fish in a resort of wildlife, per regulatory requirements described by the Maritime Provinces Fishery Regulations.
- Once a deer or bear has been legally harvested and the tag associated with that licence affixed to the animal, it is unlawful to use:
  - A rimfire or centre-fire rifle of .23 calibre or greater.
  - Or: A shotgun with lead shot larger than size BB or steel shot larger than size F;
- The holder of a Varmint Licence or a Bird and Small Game Licence shall only hunt with:
  - A rim-fire or centre-fire rifle of less than .23 calibre;
  - Or: A muzzle-loading firearm;
  - Or: A shotgun with lead shot no larger than size BB or steel shot no larger than size F.
  - Or: A bow or crossbow.
- Arrowheads and arrow shafts or bolts and bolt shafts used in hunting cannot be barbed, coated with poison, equipped with rippers or designed to explode.
- Arrows or bolts tipped with small game field points may be used while hunting small game.

**Migratory game bird hunting**

- Migratory bird hunters must hold a valid Class 1, 2, 3, 4 or Minor’s New Brunswick Hunting Licence (see page 17) and a federal Migratory Game Bird Hunting Permit, which may be purchased at a Canada Post office or online at [http://ec.gc.ca/rcom-mbhr/default.asp?lang=En&n=182D8E96-1](http://ec.gc.ca/rcom-mbhr/default.asp?lang=En&n=182D8E96-1).
- Specific areas within the Tabusintac Lagoon and Tracadie Bay are closed to migratory game bird hunting after 1 p.m. each day. Refer to the *Fish and Wildlife Act* for a legal description of these areas. Under federal legislation, an additional area in the Tabusintac River estuary has been closed to migratory bird hunting. Refer to the Migratory Birds Regulations under the *Migratory Birds Convention Act* for additional information about closed areas.
The Mount Ararat Wildlife Management Area, formerly known as the Gagetown Island Wildlife Management Area, is closed to hunting. Refer to the Fish and Wildlife Act for a legal description of this area.

It is unlawful to hunt migratory game birds using a rifle, a shotgun loaded with a single bullet, or a crossbow.

It is an offence to hunt migratory game birds with a shotgun capable of holding more than three shells in total.

The use of lead shot is banned for hunting migratory game birds except woodcock. The ban on possession of lead shot is in effect for all National Wildlife Areas.

**Waterfowler Heritage Day**

On Saturday, Sept. 19, 2020, youth may participate in waterfowl hunting without being required to possess a Migratory Game Bird Hunting Permit and a Minor’s Hunting Licence or Class 4 Hunting Licence. They must comply with the following conditions:

- The youth must be between the ages of 12 and 17.
- A Waterfowler Heritage Day permit must be obtained from any Natural Resources and Energy Development office. See page 28 for a list of Natural Resources and Energy Development offices.
- The permit holder must have completed the Firearm Safety/Hunter Education course.
- The permit holder must be accompanied by an adult mentor 18 or older who is in possession of a current year Migratory Game Bird hunting permit and a valid Class 3 or 4 hunting licence.
- The youth permit holder is subject to all federal and provincial regulations that apply to waterfowl hunting. Exception: federal and provincial hunting licences are not required.

**Licensed guides and guiding requirements**

- All non-resident hunters must hunt with a licensed guide.
- The holder of a Professional Guide Licence (Guide I):
  - (a) May accompany up to three clients at a time;
  - (b) May collect a fee or reward for his or her services;
  - (c) Shall not hunt while acting as a guide.
- The holder of a Licence to Accompany (Guide II) may:
  - (a) Accompany as a guide one person at a time but not for a fee or reward;
  - (b) Hunt while acting as a guide provided he or she has the proper hunting licence.
- Licensed guides are responsible, as far as they are able, for ensuring their clients do not violate any provisions of the Fish and Wildlife Act or any other acts and regulations defined by the Fish and Wildlife Act.
- A guide who fails to immediately report to a Conservation Officer a client whom he or she believes has violated the Fish and Wildlife Act or its regulations commits an offence.
- When a licensed guide has been convicted of a minor offence under the Fish and Wildlife Act, the Crown Lands and Forests Act, the Fisheries Act (Canada) or any of the regulations under these acts, all licences including his or her guide licence will be cancelled for 12 months.

Non-residents who possess a New Brunswick Class I (Professional) Guide Licence must be accompanied by a guide while hunting. Guiding and hunting are different activities and each has its own requirements. By definition, the act of guiding assumes accompaniment of a client by a guide.

**Guide licences**

<table>
<thead>
<tr>
<th>Guide I (Professional Guide Licence)</th>
<th>Guide II (Licence to Accompany)</th>
</tr>
</thead>
<tbody>
<tr>
<td>$25.00</td>
<td>$7.50</td>
</tr>
</tbody>
</table>

- New applications are available at Natural Resources and Energy Development offices;  
- Renewals are available at Natural Resources and Energy Development offices or Service New Brunswick.

**Dogs**

- It is unlawful for a person to allow a dog to run at large in a resort of wildlife.
- Only Conservation Officers have the authority to destroy dogs found in pursuit of wildlife in a resort of wildlife.
Other important regulations

- It is unlawful to harvest any species of wildlife that is not authorized by a licence. See Hunting Licence Information, pages 15-17 for a list of species and seasons authorized by each licence.
- It is illegal to disturb a trap or snare set by a licensed fur harvester or nuisance wildlife control operator.
- Snaring for rabbits (varying hare) may only be done under the authority of the appropriate Fur Harvester’s Licence, Minor Fur Harvester’s Licence, Rabbit Licence or a Minor Rabbit Licence.
- The herding of wildlife by means of a vehicle is illegal.
- Prior to the purchase of any class of hunting or fur harvesting licence, the individual must first meet the minimum age requirements for that class of licence.
- The use of an aircraft, including drones, in connection with hunting, except as a means of transportation, is unlawful.

A major violation and what it may cost you

Major infractions include:

- Hunting wildlife at night.
- Hunting during closed season.
- Possession of illegal deer, moose or bear meat (big game).
- Hunting while impaired.
- Handling or discharging a firearm in a careless and unsafe manner.
- Hunting big game with a snare or trap.
- Killing wildlife with poison.
- Hunting big game without a licence.
- Hunting more than the number of big game authorized by the licence.
- Buying, selling, attempting to buy or sell the carcass of any wildlife or wildlife parts.

All major violations carry a substantial fine and mandatory jail term. A conviction also leads to an automatic five-year cancellation of all licence and permit privileges under the Fish and Wildlife Act. A second major violation conviction within five years leads to a lifetime cancellation. In addition, firearms along with vehicles and other hunting-related equipment could be forfeited.

NOTICE:

Wildlife management and research programs conducted by the Department of Natural Resources and Energy Development, other public agencies or educational institutions occasionally require the administration of pharmaceuticals to wild animals. Many wildlife species cannot be safely restrained, handled or treated without the use of pharmaceuticals. Pharmaceuticals commonly used in wildlife programs include immobilizing agents, antibiotics and vaccines. Although many of these pharmaceuticals have been approved for conditional use on domestic animals that will be eaten by humans, most have not been approved for use on wild animals that may be eaten by humans.

To reduce possible human exposure to pharmaceuticals, the Department of Natural Resources and Energy Development is marking all White-tailed deer, moose and black bears that have been treated with pharmaceuticals with an orange tag in each ear with the following warning printed on the tag:

- DO NOT EAT ANIMAL/NE MANGEZ PAS CET ANIMAL
- NBDNR/MRNNB
- N001 (a letter code followed by a three-digit number)

If you harvest an animal with an ear tag with the above warning, you are advised not to eat any part of the animal. If you do not wish to keep the animal, take the entire carcass, including the ear tag(s), to any Natural Resources and Energy Development office for a possible replacement hunting licence or hunting licence refund. Please contact your local Natural Resources and Energy Development office for details.
Current wildlife research
The University of New Brunswick, Université Laval, and the Department of Natural Resources and Energy Development are conducting research on moose and deer which requires the administration of pharmaceuticals. Any moose or deer with a radio collar and/or ear tags that you may encounter is a subject of a research project. It is preferred that these animals are not harvested so that they can continue to provide valuable information toward improving the management of these species. If you do harvest one of these animals, please contact either the organization contact information listed on the collar, or the UNB Faculty of Forestry & Environmental Management at 506-453-4501, or your local Natural Resources and Energy Development office. Please do not cut the collar. Thank you for your cooperation.

A large variety of wildlife parts, including moose and deer antlers, may not be legally bought or sold. For more information about what wildlife parts or products are prohibited from trade, contact your nearest Natural Resources and Energy Development office or Public Safety office at 506-453-5417.

Help us protect New Brunswick’s natural resources.
The Department of Natural Resources and Energy Development joins Crime Stoppers in reminding the public that it is illegal for anyone to purchase or sell bear, deer, and moose meat as well as wild Atlantic salmon and trout.
Please report any illegal activities by calling your nearest Natural Resources and Energy Development office or Crime Stoppers at 1-800-222-TIPS (8477).
**Big Game**

**Young hunters**

16-and 17-year-old hunters are eligible to purchase:

- Resident/Non-Resident Deer and Game Bird Licence.
- Resident/Non-Resident Bear Licence.

16- and 17-year-olds must show proof of:

- A Firearm Safety/Hunter Education course if hunting with a gun.
- A stand-alone Bow Hunter Education course if hunting with a bow or crossbow.

16- and 17-year-olds must be accompanied* by:

- An adult holder of a Deer or Bear Licence.

* Accompanied is defined as “within visual and/or auditory contact of each other without the aid of artificial devices except medically-prescribed eyeglasses or hearing aids.”

**Transfer of legally harvested wild meat**

**Transfer to other individuals**

- Successful licensed hunters may be eligible to transfer legally harvested wild meat to another individual. Please contact your local Natural Resources and Energy Development office for details (see page 28).
- The registration permit must be presented to obtain a transfer permit.
- For information regarding the legal export of meat from wildlife, please contact your local Natural Resources and Energy Development office.

**White-tailed Deer**

- It is illegal to tag a deer killed by another hunter.
- The annual bag limit is one deer per licensed hunter regardless of the sex or age of the deer or location of kill. (See Antlerless Deer Program and Grand Manan Special Archery Hunt, page 12 for exception.)
- Persons who purchase Resident Deer Licences (Class 3) after the opening of the deer hunting season must wait 48 hours before hunting deer. (See Grand Manan Special Archery Hunt, page 12 for exception.)
- Resident hunters who want to hunt antlerless deer (does and fawns) must enter the Antlerless Deer Draw.
- Non-residents are not eligible to hunt antlerless deer (does and fawns).
- Authorization to hunt antlerless deer is valid only when indicated on a current-year deer licence.
- All licensed hunters (residents and non-residents) may hunt antlered deer (deer with visible antlers) during the deer season in zones open to hunting.
- Resident hunters with the antlerless deer authorization indicated on their deer licence may hunt antlerless deer only in the specific zone that is indicated.
- WMZs 4, 5, and 9 are closed to deer hunting. Consult a WMZ booklet for boundary details.
- Hunters must register deer at the first open deer registration station on their route of travel. It is illegal to pass by an open registration station with an unregistered deer.
- It is illegal to transport an unregistered antlered or antlerless deer into zones closed to deer hunting. Keep copies of registration permits.

**WMZs 1, 2 and 3**

(a) Uncased firearms greater than .23 calibre are NOT permitted in WMZ 1, WMZ 2 or WMZ 3 after Nov. 8, 2020.

(b) All deer harvested in other Wildlife Management Zones after Nov. 8, 2020. MUST BE TAGGED AND REGISTERED PRIOR TO TRANSPORT INTO WMZ 1, WMZ 2 or WMZ 3. For further information, please contact your local Natural Resources and Energy Development office.

- It is illegal to transport an unregistered antlerless deer into any zone that does not have an allocation of antlerless permits.
- Immediately upon harvesting a deer, the hunter must:
  (a) Attach the tag to the deer by inserting the metal wire through the skin of the right foreleg.
  (b) Present the entire carcass, including hide and attached head of the deer, for registration and tagging at the first open deer registration station.
- After skinning is complete, the registration tag must remain attached to the hide. The registration agent will issue two copies of the registration permit to the successful hunter.
- Deer may be left at a cold storage facility or butcher for 15 days if a copy of the registration permit is left with the carcass.
Antlerless Deer Draw

Residents, who wish to hunt antlerless deer in a WMZ open to hunting antlerless deer, must purchase a Class 3 hunting licence and apply through Fish & Wildlife Licensing online or at any authorized vendor or Service New Brunswick location. The fee to apply to the Antlerless Deer Draw is $4 plus HST. Applications can be made through Fish & Wildlife Licensing online or at any authorized vendor or Service New Brunswick location, before the close of regular business hours on Aug. 21, 2020. Residents whose names are not drawn in the Antlerless Deer Draw may still hunt antlered deer in any zone that is open to deer hunting. Non-residents are only eligible to hunt antlered deer (those with visible antlers).

Grand Manan Special Archery Hunt (WMZ 27)

The following measure is intended to increase the opportunity to harvest antlerless deer in WMZ 27 (Grand Manan Island). Archery hunters who harvest and register an antlerless deer in WMZ 27 during the archery-only portion of deer hunting season may purchase a second licence to hunt antlered deer in any zone open for deer hunting. This opportunity is available only to archery hunters who are successful in the 2020 Antlerless Deer Draw for WMZ 27. Archery hunting only season is Oct. 5-25, 2020.

Upon registration of a harvested deer, the hunter is issued a true copy of a Meat Registration Permit. This permit and the licence by which the deer was legally harvested must be presented at a Service New Brunswick office, thus allowing for a second Class 3 licence to be purchased. The successful antlerless deer archery hunter may now hunt antlered deer in any WMZ open to deer hunting. Hunters who wish to hunt with a bow or crossbow are reminded that they must complete a stand-alone Bow Hunter Education course or show proof of a previous bow hunting licence. Hunters who wish to hunt antlerless deer must be holders of an antlerless deer authorization (see above).

For further information, contact your nearest Natural Resources and Energy Development office (see page 28) or visit www.gnb.ca/naturalresources.

Deer population

New Brunswick is at the northern range of White-tailed deer populations in North America. The abundance of deer is controlled primarily by the severity of winters and the amount and quality of deer winter food and shelter. Predators such as coyotes, bobcats, black bears and free-ranging domestic dogs can affect local deer populations. Similarly, poaching and collisions between deer and vehicles can also be major influences on local populations. Management of deer is accomplished principally by controlling the number of deer harvested, protection of deer from illegal harvest and the protection and management of deer winter shelter (yards). Due to biological, social and wildlife disease concerns, the Department of Natural Resources and Energy Development strongly discourages the public from feeding White-tailed deer during any season.
Moose

- The bag limit is one moose.
- Moose hunters are subject to all provisions of the *Fish and Wildlife Act* and regulations respecting the hunting or taking of game animals.
- Resident hunters who wish to hunt moose must enter the Resident Moose Draw. Applications may be made through Fish & Wildlife Licensing online, at any authorized vendor or Service New Brunswick location or through a telephone application system. Applications are accepted annually mid-May to mid-June.
- Applicants to the Resident Moose Draw must be at least 18 years old and must meet all of the regulatory requirements to purchase a moose hunting licence at the time of application.
- Quotas for moose hunting licences are determined annually for each WMZ.
- At the time of licence purchase, successful resident draw applicants may designate another resident hunter to accompany them while moose hunting. The designated hunter must meet all of the regulatory requirements to purchase a moose hunting licence, and must not have been successful in the current year's Resident Moose Draw.

**To become a designated hunter, the hunter must be a resident whose principal place of residence is New Brunswick, or a New Brunswick-born serving member of the Canadian Forces or the RCMP who lives or serve outside of the province. The hunter must also be at least 16 years old at the time of licence purchase.**

- The Designated Moose Licence holder must accompany* the holder of the Moose Licence at all times while hunting.

*Accompany is defined as “within visual contact and/or auditory contact of each other without the aid of artificial devices except medically prescribed eyeglasses or hearing aids.”

- The holder of a valid Moose Licence (not the designated hunter) may hunt alone, even after designating a partner, should the designated hunter be unable to accompany him or her. **The designated hunter shall not hunt alone.**

- The holder of a Moose Licence may transport one firearm two days before the opening of, or two days after the closing of, the moose season. The firearm must be in a case properly fastened or completely wrapped in a blanket or canvas and securely tied or in the locked luggage compartment of a motor vehicle.
- It is illegal to carry or use a firearm designed to fire a rim-fire shell or cartridge while hunting moose.
- A Moose Licence holder or Designated Moose Licence holder shall not have more than one firearm in his or her possession during the moose hunting season.
- Every Moose Licence holder or Designated Moose Licence holder must carry his or her Moose Licence on his or her person while hunting.

- Immediately upon harvesting a moose, the Moose Licence holder (not the Designated Moose Licence holder) must:
  (a) attach the tag to the moose by inserting the metal wire through the skin of the right foreleg;
  (b) accompany the whole moose carcass, including the head, for registration and tagging at the first open tagging station or Natural Resources and Energy Development office, by noon on the Sunday immediately following the moose hunting season.

- The licence is void once the tag has been attached to the harvested moose.
- Contact the department or visit [www.gnb.ca/naturalresources](http://www.gnb.ca/naturalresources) for tagging station locations.
- A moose registration agent may measure or remove the lower jaw, teeth or other tissue of the harvested moose for management and research purposes.
- The registration agent will issue two copies of the registration permit to the successful hunter.

**Attention – non-resident moose hunters**

Non-residents may apply for the opportunity to hunt moose in New Brunswick. Fifty (50) Moose Licences are allocated annually to non-residents by random draw. Applications may be made through Fish & Wildlife Licensing online, at any authorized vendor or Service New Brunswick location. Applications are accepted annually from the beginning of February to the end of April. Another fifty (50) Moose Licences are allocated to qualified New Brunswick outfitters and guides by random draw for the subsequent sale to non-residents.
Remember
• All non-resident moose hunters are required to hunt with a licensed New Brunswick guide.
• Non-resident moose hunters must comply with the Hunter Education requirements stated on page 5.
• Moose Licences are valid for only one WMZ. Non-resident hunters must identify – at the time of licence pickup – the zone in which they will hunt. Outfitters or guides may assist with zone choice.
• A Non-Resident Moose Licence holder is eligible to harvest one moose of either sex or of any age during the five-day season.
• The successful non-resident draw applicant may not designate another hunter to accompany him or her while hunting.

Black bear
• The bag limit is one black bear per licence.
• A person may purchase a maximum of two Black Bear Licences per year. Licences are valid for hunting during the two black bear hunting seasons (spring and fall) in a calendar year.
• Resident Black Bear Licences are valid for all WMZs open for black bear hunting.
• Non-resident hunters may acquire Black Bear Licences in either of the following two methods:
  (a) Through a designated, licensed outfitter or guide who has received an allocation of Black Bear Licences;
  (b) By entering and being successful in the computerized random access draw. Applications may be made through Fish & Wildlife Licensing online, at any authorized vendor or Service New Brunswick location. Applications are accepted annually from the end of January to the end of February.
• Non-resident Black Bear Licences are valid only for the WMZ specified on the licence.
• The holder of a valid Black Bear Licence may transport a firearm two days before the opening of or two days after the closing of the black bear season. The firearm must be unloaded, in a case properly fastened or completely wrapped in a blanket or canvas and securely tied, or in the locked luggage compartment of a motor vehicle.
• Non-residents are required to hunt with a licensed New Brunswick guide.
• Immediately upon harvesting a black bear, the hunter must:
  (a) Attach the tag to the right foreleg of the bear.
  (b) Within 72 hours of killing a bear, present the entire carcass, including the hide, for registration and tagging at the first open bear registration station.
• The licence is void for hunting black bear once the tag has been attached to the harvested bear.
• The licensed hunter who harvests a black bear must accompany the carcass to a bear registration station.
• A bear registration agent will attach a plastic lock-seal tag to the hide of each bear. The registration agent will issue two copies of the registration permit to the successful hunter.
• If the licensed hunter wishes to purchase a second Bear Licence, the bear registration permit for the first bear harvested must be presented.
• Bear or bear parts leaving Canada may require a CITES (Convention on International Trade in Endangered Species) Export Permit. Contact your local Natural Resources and Energy Development office for more information.
Hunting licence and season information

- Licences are available at www.gnb.ca/naturalresources (Fish & Wildlife Licensing), from authorized vendors, and all Service New Brunswick centres.
- Contact your local Natural Resources and Energy Development office or our website to find the location nearest you (page 28).
- Tags are available at vendors, Natural Resources and Energy Development offices, and Service New Brunswick centres at no cost - http://www2.gnb.ca/content/gnb/en/departments/erd/natural_resources/content/e-Licensing/Tags.html
- Licence cost includes conservation fees collected for the New Brunswick Wildlife Trust Fund and tax is not included.
- Attention non-residents: fees are stated in Canadian currency.
- Registration permits for keeping moose, bear or deer meat are only valid until June 30 of the following year.

Wildlife diseases

Wild animals can have many diseases (bacteria, viruses and parasites). Some of these diseases can affect wildlife, people, and domestic pets/animals. It is important when enjoying the outdoors and wildlife to be aware and take the following five precautions to reduce the risk of disease transmission.

1. Thoroughly cook meat.
2. Do not drink from untreated surface water sources.
3. Follow animal handling precautions.
   - Practise good hygiene. Wash hands thoroughly with soap and warm water or use an alcohol gel cleanser after handling animals, especially before handling food.
   - Wear waterproof gloves (rubber, vinyl, latex) and protective clothing (coveralls, boots and glasses) when cleaning and processing wild game and birds.
   - Prevent contact of skin with animal feces, body fluids (urine, blood, saliva) and external parasites.
   - Prevent animal bites and scratches (even from the claws or teeth of dead animals).
4. Use proper field dressing procedures.
   - Eviscerate or gut the carcass as soon as possible.
   - Use a clean knife and wash your knife frequently with warm water or alcohol swabs.
   - Avoid cutting the intestinal tract (gut) and thoroughly clean utensils or hands if contaminated with fecal material.
   - Avoid hand-mouth contact (such as smoking or eating) when handling carcasses.
   - Cut off and discard any meat contaminated with fecal material.
   - Keep the carcass cool in the field and refrigerate or freeze as soon as possible.
5. Be aware of wildlife diseases.

Rabies

Rabies is caused by a virus. Wild animals, including raccoons, skunks, foxes and bats, can be infected. The clinical signs of disease in wildlife are not always present.

Rabies is spread when broken skin or mucous membranes (skin found in the eyes, nose and mouth) come into contact with infected saliva or nerve tissue from a rabid animal. Bites are the most common way rabies is spread.

Everyone who handles wildlife should be aware. Take the following precautions to help prevent transmission of rabies and other diseases:
   - Pre-exposure vaccination against rabies is recommended for persons who work with animals that may have rabies. Medical treatment is still required after an exposure;
   - Be a responsible pet owner. Vaccinate your pets against rabies and keep your pet on a leash or under control at all times;
   - Enjoy wildlife from a distance;
   - Take animal handling precautions. Wear waterproof gloves, wash your hands and prevent skin contact;
   - Go to the hospital if you have been exposed.

If you see an animal exhibiting symptoms of rabies (uncoordinated movements, dragging limbs, behaving aggressively), please report it by calling 811.

Tularemia

Tularemia (rabbit fever) is caused by bacteria. Wild animals, including rabbits (snowshoe hares) and rodents (muskrats and beavers), can be infected. The clinical signs of disease in wildlife are not always present.

Tularemia is spread when broken skin or mucous membranes (skin found in the eyes, nose and mouth) come into contact with blood or muscle tissue from an infected animal. Tularemia is most commonly spread during handling meat (including dressing or skinning) and eating insufficiently cooked meat. Less commonly tularemia can be spread by tick and deer fly bites, inhaling contaminated dust, drinking from contaminated water sources or handling contaminated pelts.

Everyone who handles wildlife should be aware. Take the following precautions to help prevent transmission of tularemia and other diseases:
   - Follow animal-handling precautions. Wear waterproof gloves, wash your hands and prevent skin contact;
   - Thoroughly cook meat (well-done);
• Prevent insect bites;
• Do not drink from untreated water sources such as lakes, streams and rivers.

Lyme disease

Lyme disease is caused by bacteria. Lyme disease is spread through the bite of an infected blacklegged tick. Ticks are usually picked up when brushing against vegetation such as grass and shrubs. When a tick bites you, it becomes attached to your skin by its mouthparts. The risk of contact with ticks begins in early spring when the weather warms up and lasts through to the end of fall.

The best protection is to prevent tick bites.
• Wear protective clothing, including enclosed shoes, long-sleeved shirts that fit tightly around the wrist and are tucked into pants, and long-legged pants tucked into socks or boots.
• Insect repellents containing DEET are safe and can effectively repel ticks. Repellents may be applied to clothing as well as exposed skin but should not be applied to skin underneath clothing (note: DEET may damage some materials). Always read and follow label directions.
• Walk in the middle of trails to avoid tall grass and bushes.
• Check for ticks on clothing and skin after being in tick-infested areas. A daily total-body inspection and prompt removal of attached ticks (within 18 to 24 hours) can reduce the risk of infection. Blacklegged ticks are very small, particularly at the nymph stage, so look carefully. Do not forget to check children and pets as well.
• If you develop symptoms of Lyme disease, see your family doctor. In most cases, the first symptom of Lyme disease is a rash near the tick bite that may look like a bull’s-eye target. The rash appears between three and 30 days from being bitten.

For more information on insect-and animal-related diseases, dial 811 for Tele-Care or visit www.gnb.ca/public health

Fur harvesting

New for 2020

The requirements to use specific breeds of hounds when hunting varying hare under a Hound Hunting Permit have been removed. Those wishing to hunt varying hare with the assistance of dogs may now use any breed or type of dog they choose.

Important information

• It is illegal to disturb any trap or snare without the owner’s consent.
• Trap sets for weasels and squirrels must be entirely enclosed in a wooden or metal box with no opening larger than 3.75 centimetres in diameter.
• Fur harvesters can use snare wire larger than 0.75 millimetres in diameter in WMZs 1 to 26 only on or after Nov. 14 in sets above water.
• Rabbit (varying hare) trappers cannot use snare wire greater than 0.75 millimetres in diameter during fox and coyote snaring season.
• Snares constructed of snare wire larger than 0.75 millimetres in diameter must be equipped with locking devices.
• It is illegal to possess traps or snares in a resort of wildlife more than 48 hours before trapping or snaring season opens and more than 48 hours after the season closes. Traps and snares cannot be placed at set locations in the woods until the season opens.
• Individual fur harvesters are required to check all restraining trap sets at least once every 48 hours.
• Drowning sets must have enough weight to prevent the submerged furbearer from resurfacing.
• Submarine cage traps (funnel traps) should be set in such a way that they remain fully submerged at all times.
• Mink sets must be a water-based set, drowning set, or on the ground within three metres (10 feet) of the water’s edge.
• Fur harvesters must use snares baited with fresh hardwood and placed entirely under water when snaring beaver after Jan. 31 to the last day of the open snaring season for beaver.
• Fur Harvester’s Licences expire on July 31.
• A holder of a Minor Fur Harvester’s Licence may obtain a hound hunting permit provided they have successfully completed the required education courses.

• All individuals purchasing a Rabbit Licence must show proof of completion of a Firearm Safety/Hunter Education course or proof of hunting experience by presenting a previous hunting licence. Conservation Education certificates from other provinces, territories and states are valid in New Brunswick.

It is illegal for fur harvesters to:

• Place a trap or snare (other than a water-based set) within 300 metres of a dwelling not your own, school, playground, athletic field, solid waste disposal site or place of business.

• Set a trap inside a muskrat house.

• Use poisons to catch or kill furbearers.

• Set or place a trap or snare within 30 metres of an active beaver dam, pond or lodge during the closed season for beaver.

• Use leghold traps set as restraining traps to capture marten, fisher, weasel, skunk, squirrel or raccoon.

• Use spring pole sets or running pole sets with leghold traps.

• Use leghold traps having a jaw spread greater than 20 centimetres or use toothed traps or deadfalls.

• Use a killing trap (i.e. body-gripping) for coyote or fox.

• Use a killing trap (i.e. body-gripping) for bobcat after Dec. 31.

• Use killing traps other than those listed on page 23-25 for trapping beaver, bobcat, fisher, marten, muskrat, otter, raccoon and weasel. Leg-hold traps used in a drowning set for beaver, otter, muskrat and mink are still allowed.

• Possess an improperly tagged or untagged bobcat.

• Keep wildlife in captivity.

• Use leghold traps to capture coyote unless the trap has been modified to improve humaneness.

• Use leghold traps to capture bobcat unless the trap is listed on page 23-25.

Trapper Education

• To purchase a Fur Harvester’s Licence, all trappers born on or after Jan. 1, 1981, and all first-time trappers must first complete a Firearm Safety/Hunter Education course and Trapper Education course.

• Minor Fur Harvesters who are 10–11 years old are required to be accompanied by an adult holder of a valid Fur Harvester’s licence.

• Minor fur harvesters are not permitted to carry a firearm unless they are 12 years old or older, have passed the Firearm Safety/Hunter Education course, and are accompanied by an adult.

• Individuals wishing to hunt with a bow or a crossbow under a Fur Harvester’s Licence must have a stand-alone Bow Hunter Education course.

• Bow hunters born before Jan. 1, 1981, and who are not first-time bow hunters, may show a previous hunting licence allowing use of a bow or crossbow.

Firearms and ammunition

Fur harvesters must follow all regulations pertaining to firearms and:

• Fur harvesters must not use a rifle .23 or larger in calibre.

• Fur harvesters must not use lead shot larger than number 2 or steel shot larger than BB in a shotgun.

• Fur harvesters are permitted to carry a .22 calibre rimfire rifle on Sundays to dispatch live-caught non-aquatic furbearers. Firearms must be cased while being transported and carried in the field to trap locations, and must be re-cased immediately after being used to dispatch live-caught non-aquatic furbearers.

• Rabbit Licence and Minor Rabbit Licence holders must not use a rifle .23 or larger in calibre or use lead shot larger than number 2 or steel shot larger than BB in a shotgun.

Dogs and trapping

Do not set traps or snares in areas where pets or farm animals may be caught. Fur harvesters setting traps or snares in areas that are visited by persons walking their dogs should make their best efforts to avoid accidentally capturing any pets. In addition to following existing regulations fur harvesters are encouraged to:

• advise the pet owner that traps and/or snares are placed in the area;

• modify sets so that dogs will not be captured, and;

• place the traps and/or snares away from the trail or road.
Incidents of dogs running at large should be reported to a local Natural Resources and Energy Development office.

Reminder
- Trappers are reminded to wear protective gloves while handling fur-bearing animals. Cook meat thoroughly (well-done) before eating and keep a clean work environment. These precautions will minimize the possibility of parasites and disease transmission.
- Individual fur harvesters are not permitted to keep incidental catches. Fur harvesters must report incidental catches and obtain permission to transport the animals to the nearest Natural Resources and Energy Development office. Incidental catches of furbearers are made available to the NB Trappers and Fur Harvesters Federation for trapper education courses.

Bobcat Tag Draw
- Maximum bobcat harvest levels are determined on an annual basis for each of the WMZs where the harvest of bobcats is permitted. Fur harvesters wishing to trap, snare or hunt bobcat, and houndsmen wishing to hunt bobcat, must apply to a random, computerized draw system. Applicants must purchase a 2020-21 Fur Harvester’s Licence prior to applying to the draw. Applicants must apply for the two WMZs of their choice through Fish & Wildlife Licensing online or at any authorized vendor or Service New Brunswick location, before the close of regular business hours on Sept. 25, 2020.
- The fee to apply to the Bobcat Draw is $9 plus HST.
- Applying to the same WMZ for both choices in the bobcat draw may reduce the applicant’s chances of maximizing the total number of tags allotted to the applicant.
- To ensure that the draw is equitable, the bobcat tag system assigns one tag each time an applicant is successful. The draw selects applicants in each WMZ until the quota is depleted.
- Successful applicants will be notified by mail. They will receive one tag for each time they were drawn as well as a bobcat authorization to be indicated on their Fur Harvester’s Licence.
- Lock-seal tags must be affixed through the lip to the eyehole of the pelt immediately upon taking possession of the bobcat. The locking mechanism must be completely engaged and the tag must remain with the pelt.
- No person shall be in possession of another person’s bobcat tags.
- Lost or stolen tags must be reported and are invalid. No replacements will be issued until previous tags are invalidated. There will be a replacement fee of $5.25 plus HST.
- Only properly tagged pelts are legal for possession or sale. Bobcat carcasses must be submitted to Natural Resources and Energy Development.

Furbearer studies
The Fish and Wildlife Branch collects the carcasses of bobcat, fisher, marten and otter. Carcasses must be turned in to a district office no later than five days after the close of the season for the species trapped. It is an offence not to do so. It is important that trappers provide names and the capture location (WMZ) of each animal when turning in carcasses. (see page 2)

How to avoid birds while trapping and snaring
Some bird species may be attracted to the bait used while trapping or snaring furbearers. To avoid catching scavenging birds and birds of prey while trapping or snaring, please take the following precautions:
- Place bait in a stand of trees that has a closed canopy or in a place not easily seen from the air;
- Do not place snares along the main access trail to the bait;
- Set snares away from the bait (e.g., 15 metres).

How to avoid Canada Lynx while trapping other furbearers
The Canada Lynx is a regionally endangered species in New Brunswick. Often, Canada Lynx can be found in areas where other furbearers live. To avoid catching Canada Lynx while trapping or snaring, please take the following precautions:
- Avoid trapping/snaring in areas where there are lynx tracks;
- Avoid setting traps/snares in thickets with high snowshoe hare densities.
If a Canada Lynx is caught incidentally, please contact your local Natural Resources and Energy Development office. Although incidental capture of lynx must be avoided if at all possible, biological data from any incidental capture will help assess the population status of this species.
**Hound hunting and training**

**NEW:** The requirements to use specific breeds of hounds when hunting varying hare under a Hound Hunting Permit have been removed. Those wishing to hunt varying hare with the assistance of dogs may now use any breed or type of dog they choose.

Permits are available at the Fish and Wildlife Branch, Department of Natural Resources and Energy Development, PO Box 6000, Fredericton, NB E3B 5H1.

- Permits are required to hunt rabbit (varying hare) with dogs or to train dogs to hunt rabbit (varying hare). Restrictions may apply.
- Permits are required to hunt bobcat, fox, and raccoon with hounds or to train hounds to hunt these species. Restrictions may apply.
- Houndsmen require a valid Fur Harvester’s Licence or Minor Fur Harvester’s Licence prior to receiving a Hound Hunting Permit and/or making application to the bobcat tag draw.
- Special regulations apply to hunting raccoon at night.
- Hounds must be approved to hunt raccoon, fox and bobcat.
- Houndsmen are only allowed use a maximum of three hounds to hunt fox or bobcat. A maximum of three hounds may also be used to train hounds to hunt fox or bobcat.
- Hounds running at large can be a detriment to wildlife, and the owner is subject to prosecution. **Use a trained hound.**

**Permits**

- A Wildlife Storage Permit is required if the trapper wishes to keep furs or furbearer parts in his or her possession beyond 15 days after the close of the season.
- A Wildlife Storage Permit and Carcass Receipt for **bobcat, fisher, marten** and **otter** will be issued when the carcasses are submitted to any Natural Resources and Energy Development office no later than five days after the close of the respective season.
- Note that Natural Resources and Energy Development offices may be closed for several days prior to, or following, Christmas. Please contact your local office to determine open hours so that Wildlife Storage Permits may be obtained within the 15-day period.
- An Export Permit is required to export pelts of wild or ranched furs or hides. A copy of the Export Permit must be enclosed with each shipment. Export Permits will not be issued for **bobcat, fisher, marten** and **otter** pelts unless their carcasses have been turned in to the Department of Natural Resources and Energy Development. The department requires proof in the form of the carcass receipt that was issued at the time of carcass collection.

**Bobcat, fisher, marten and otter** pelts delivered to a fur pickup location within New Brunswick require copies of a Wildlife Storage Permit with the Carcass Receipt portion completed (to be given to the fur agent upon delivery).

**Hound Training and Hunting Season Dates**

In 1997, Canada and the European Union (EU) committed to the Agreement on International Humane Trapping Standards (AIHTS). This agreement and the accompanying trap standards set performance thresholds of traps for harvesting specific furbearing animal species. To comply with the AIHTS, the Fur Harvesting Regulations in New Brunswick were changed for the 2007 fall fur harvesting season.

Only certified traps included in the fur harvesting regulations are allowed for the trapping of particular furbearers in New Brunswick. Please see the information below regarding certified traps.

****** IMPORTANT******

- Starting for the 2021–22 fur harvesting season, only traps certified for live-trapping beaver will be regulated and permitted for use in New Brunswick when live-trapping beaver.
- Those trap types listed on pages 23–25 that are currently owned by trappers are considered certified. Homemade body gripping traps (conibear-type) will not be considered certified.
- Trap testing and certification is ongoing for other furbearer species. There is no requirement to use certified killing traps for mink or to use certified restraining traps for species other than bobcat and raccoon. Please consult the Fur Institute of Canada (www.fur.ca) for more information.

Please note: No regulatory changes for:

- snares (on land or underwater);
- submarine cages;
- drowning sets (using leghold traps) for beaver, otter, muskrat and mink;
- body gripping (conibear-type) traps for mink, skunk and squirrel;
- leg hold traps for red fox;
- live traps (cages).

For further information about the AIHTS and certified traps, please contact your local Natural Resources and Energy Development office, Fish and Wildlife Branch, or the Fur Institute of Canada (www.fur.ca).

CITES: The Convention on International Trade in Endangered Species (CITES) has listed bobcat and otter on its appendices. Exporting these species from Canada requires a CITES Export Permit, available at Natural Resources and Energy Development, Fish and Wildlife Branch. This is a federal regulation and will be enforced at Customs at the Canada/United States border. Failure to obtain the appropriate permit will result in confiscation at the border. This does not apply to pelts or hides going to Canadian fur auctions.

Licences

- Licences are available at www.gnb.ca/naturalresources (Fish & Wildlife Licensing), from authorized vendors, and all Service New Brunswick centres.
- Contact your local Natural Resources and Energy Development office or our website to find the location nearest you (see page 28).
- Cost includes conservation fees collected for the New Brunswick Wildlife Trust Fund and tax (when applicable) is excluded.

Fur Harvester’s Licence

- Required to trap, snare or hunt furbearers and to possess or sell pelts.
- Valid from Oct. 1 to July 31 of the following year.
- Not issued to non-residents.
- See page 20 for Trapper Education requirements.

<table>
<thead>
<tr>
<th>Class</th>
<th>Total price</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fur Harvester’s Licence</td>

</tr>
<tr>
<td>Minor Fur Harvester’s Licence (10- to 15-years-old)</td>
<td>$8.00</td>
</tr>
</tbody>
</table>

Rabbit Licence

- Required to hunt, snare or sell harvested rabbits (varying hare) only.
- Valid from Oct. 1 to the last day of February of the following year.
- Not issued to non-residents.
- See page 5 for Hunter education requirements.
- See page 20 for adult accompaniment requirements.
- Minor rabbit licence holders are not permitted to carry a firearm unless they are 12 years old or older, have passed the Firearm Safety/Hunter Education Course and are accompanied by a person 19 years old or older.

Taxidermist Licence

$15.00

All Replacement Licences, Bobcat Tags

$5.25

Fur Trader’s Licences, Hide Dealer’s Licences and Taxidermist’s Licences are available at the Department of Natural Resources and Energy Development, Public Services, Hugh John Flemming Forestry Centre, PO Box 6000, Fredericton, NB E3B 5H1. (Tel: 506-453-3826)

Fur harvester’s code of ethics

1. Have the landowner’s permission before trapping on private land.
2. Do not set traps in areas where pets or farm animals may be caught.
3. Use proper locking devices on snares.
4. Make only drowning sets or quick kill sets for aquatic furbearers. Ensure that water is deep enough to prevent the animal from resurfacing.
5. Do not disturb the traps or snares of other fur harvesters.
6. Check traps regularly, preferably in the early morning.
7. Learn how to make carcasses a useful resource. Do not leave animal carcasses where people may be offended.
8. Cooperate with your provincial wildlife management authority to ensure furbearer resources can be effectively surveyed and managed.
9. Trap in areas where there is an abundance of furbearers.
10. Support and help train new trappers in proper conservation, pelt preparation and harvest methods.
11. Know and follow all fur harvesting regulations.
12. Support enforcement of all regulations.
13. Assist neighbours with nuisance furbearers.
14. Do not offend those who may be sensitive about fur harvesting.
15. Be a polite, knowledgeable spokesperson for fur harvesting.
16. Respect the territory and the trap sets of other fur harvesters.
17. Report violations of fish and wildlife laws to provincial enforcement authorities.
18. Kill all trapped animals in a humane manner.
19. Do not boast about your trapping or the amount of fur that you harvested.
20. Prepare your furs with care.
21. Support your provincial trappers and fur harvesters’ organization and your local trappers group.
22. Use the most humane traps available for the species that you are trapping.
23. Record your trap locations accurately.
24. Always retrieve all set traps and snares at the end of the season.

Become an instructor!

The future of hunting and trapping in New Brunswick is greatly reliant on public education. The Department of Natural Resources and Energy Development is actively seeking volunteers interested in the delivery of its Conservation Education Program. New Brunswick takes pride in offering a comprehensive educational program that ensures hunters and trappers are ethical, legal and safe. For further information about becoming an instructor in any of the Conservation Education courses (Firearm Safety/Hunter Education, Bowhunter and Trapper Education), please see the contact information below.

Youth Dream Hunt 2020

All 12- to 16-year-old New Brunswick Firearm Safety / Hunter Education 2019 course graduates could win a dream hunting experience to take place right here in picturesque New Brunswick! Students are entered automatically, and the winner will be randomly selected by an electronic draw. The winner must be accompanied by an adult.

Our first Youth Dream Hunt was done in 2019. The winner from NB was treated to a fishing trip at The Ledges Inn, a small game and bear hunt with Governor’s Table Camp, and a waterfowl hunt with Delta Waterfowl. The youth also had excursions to the Atlantic Archery Center and the Fredericton Trap & Skeet Club. Lodging and meals were provided to the winner as well as numerous gifts. Special thanks to:

- Bass Pro Shops
- NB Bowhunter Education Association
- Riverside Resort & Conference Centre
- Sovereign Sportsman Solutions (S3)
- Subway ®
- The Gun Dealer

Natural Resources and Energy Development appreciates the support and co-operation from the outfitting and guiding industry in this program.

List of Projects Approved in 2019

Dr. Howard Huynh, Canadian Rivers Institute, UNB
Population and Conservation Genomics of Canada Lynx in New Brunswick.................................................. $15,000.

Dr. Graham Forbes, UNB
Viability of Wild Turkey in New Brunswick.......................................................... $4,350.

Joseph Noceara, UNB
Waterfowl Nest Box Stewardship Program and Cavity Availability Evaluation along the Lower St. John River................................................................. $7,500.

Quality Deer Management Association – Northern NB Branch
Assessment of Deer Winter Habitat in the City of Edmundston................................................................. $1,000.

Delta Waterfowl (Southern NB Chapter)
Restoration of Wood Duck Habitat on Private Lands in Southern NB................................................................ $6,100.

Delta Waterfowl (Southern NB Chapter)
Hen House Installations on Private Lands in Southern New Brunswick........................................................................ $5,000.

Quality Deer Management – Northern NB Chapter
Estimating the Density of the White-tailed Deer within the Territory of the City of Edmundston............................... $3,500.

NB Trappers & Fur Harvesters Federation
Furbearer Track Transnet 2019-20 ........................................................................................................ $3,400.

Ducks Unlimited Canada
DUC Conservation Centre Wetland Education Programming 2019.............................................................................. $12,000.

Nature Conservancy of Canada
Engaging Communities for Conservation.............................................................................................................. $10,000.

Nature NB
Conservation Education in Action.......................................................................................................................... $8,000.

Canadian Parks and Wilderness Society – NB Chapter
Get Outside NB – Empowering and Engaging Young Natural Leaders................................................................. $5,000.

Gespe’geweg Mi’gmag Resource Council
Fostering Fish Friends................................................................................................................................. $3,300.

Miramichi Salmon Museum Inc.
Come Play on our River................................................................................................................................. $11,000.

Miramichi River Environmental Assessment Committee
Last Lead and Line Importing Fish and Fowl – Part 2 ....................................................................................... $4,000.

Pays de Cocagne Sustainable Development Group
Detection of Aquatic Birds in Bodies and Streams Increase the Conservation & Stewardship Capacity of Southern NB Watershed Groups Year 3............................................................................. $6,000.

Pays de Cocagne Sustainable Development Group
Educational Program on Butterflies at the Pays de Cocagne..................................................................................... $3,000.

Vision H20; Groupe du bassin versant du Village de Cap-Pélo
Public Education on Snowfall Population in the Beausommn-East and Village of Cap-Pélo Watershed................. $8,000.

Sackville Rod & Gun Club Inc.
Sackville Rod & Gun Club Inc Youth Fishing Derby.......................................................................................... $1,100.

The Nature Conservancy of Canada
Shorebird Interpreters 2019 – NCC’s Johnson’s Mills Shorebird Reserve................................................................. $10,000.

Nature NB
Prompting Action through Citizen Science: Advancing Environmental Stewardship among New Brunswickers.................................................................................. $8,000.

Kennebecasis Watershed Restoration Committee
Waiting into Conservation Education................................................................................................................. $7,500.

Hammond River Angling Association
Hammond River Nature Camp 2019...................................................................................................................... $18,000.

Hammond River Angling Association
RiverKeepers.......................................................................................................................................................... $6,000.

Conservation Council of New Brunswick
Learning Outside: Teaching New Brunswick Students about Atlantic Salmon.................................................. $10,000.

Nashwauk Watershed Association
Community Outreach in the Nashwauk Watershed.............................................................................................. $10,000.

Maritime College of Forest Technology
Forest Ranger Camps.............................................................................................................................................. $15,000.

The Nature Trust of New Brunswick Inc.
Citizen Science and Distributed Leadership in Nature Preserve Stewardship.................................................. $12,000.

Forêt expérimentale – École de foresterie – Université de Moncton, campus d’Edmundston
Trail for Interpretation of Importance of Wildlife of Riparian Zones................................................................. $7,000.

Salon de la forêt
Salon de la forêt 2019.............................................................................................................................................. $1,450.

Association Quality Deer Management – Section Nord du Nouveau-Brunswick
Creation of Committee on Artificial Feeding of White-tailed Deer within the Territory of the City of Edmundston.................................................................................................................. $1,000.

La Société du Jardin botanique du Nouveau-Brunswick
Hands-On Summer Camp........................................................................................................................................ $2,600.

Société d’aménagement de la rivière Modawaska inc.
Raising Awareness about Wildlife Species in Wetlands of the Upper Modawaska.................................................. $11,000.

Canadian Parks and Wilderness Society, NB Chapter
Watch Your Paws – Motivating Students for Nature Conservation Action.................................................................... $5,000.

Nature NB
NatureKids NB - Meeting the Need to Connect with Nature and Wildlife in New Brunswick Communities.......................... $12,750.

Nature NB
Workshops for Wildlife............................................................................................................................................. $7,000.

New Brunswick Environmental Network (NBEN)
Collaborating on Biodiversity Action................................................................................................................ $7,000.

New Brunswick Salmon Council Inc.
Fish Friends................................................................................................................................................................. $6,000.

Canadian Council on Invasive Species
Protecting New Brunswick’s Freshwater System from Invasive Species through Public Education and Engagement................................................................. $12,750.

Nature NB

Nature NB
Birding Trail Guide – East Coast Hotspots........................................................................................................ $9,000.

Groupe de développement durable du Pays de Cocagne
Young Stewards for Sustainability – Year 2......................................................................................................... $5,800.

Groupe du bassin versant de la région de Cap-Pélo Inc.
Educating the Public to the Importance of the Various Ecosystems in the Cormier-Village Écocap......................................................................................................................... $5,000.

Tantramar Wetlands Centre
The Key to Sustainability is Education – Discovering Wetlands in Fall and Winter.................................................. $8,500.

S NB Forest Products Marketing Board
Managing your Woodlot for Multiple Values, Wildlife and Forest Management Workshop........................................... $3,000.

Kennebecasis Watershed Restoration Committee
Pitching Watershed Stewardship to Campers......................................................................................................... $5,000.

Hammond River Angling Association
Invasive Eurasian Water Milfoil............................................................................................................................... $2,800.

Fundy Shooting Sports Inc.
Social Appreciation Day 2019............................................................................................................................... $1,300.

NB Trappers & Fur Harvesters Federation
Trapper Workshop 2020......................................................................................................................................... $4,400.

Nashwauk Watershed Association Inc.
“Upstream-Downstream” Youth Education Program............................................................................................ $2,800.

New Brunswick Sport Fishing Association
Oromocto Kids Fishing Event............................................................................................................................... $1,100.

New Brunswick Sport Fishing Association
Woodstock Kids Fishing Event............................................................................................................................. $1,300.

Quality Deer Management – Northern NB Chapter
A Day of introduction to Hunting........................................................................................................................ $1,800.

École de foresterie – Université de Moncton, campus Edmundston
Creation of a Collection of Naturalized Animals for the Education of Pupils, Students, and Citizens in Northwestern New Brunswick.................................................................................................................. $7,000.
Class II PNAs
PNAs have been established to protect examples of the province’s biological diversity while providing a wilderness experience to outdoor enthusiasts. Users are asked to respect the environment and to minimize disturbances. A “carry in, carry out” principle applies. Camping is permitted only if a tent, rather than a trailer, is used. To ensure that PNAs maintain their wilderness characteristics, hunters are also encouraged to respect the following practices:
• use portable hunting stands if possible; otherwise use the same tree stand from year to year;
• remove all manufactured material when the blind or stand will no longer be used.
PNAs are a precious heritage for the people of New Brunswick. Please help us ensure their integrity for future generations.
Information may be obtained at any Natural Resources and Energy Development office, at www.gnb.ca/naturalresources, at fw_pfweb@gnb.ca, or by calling 506-453-3826.

Help us protect New Brunswick’s natural resources.
Please report any illegal activities by calling the nearest Natural Resources and Energy Development office or Crime Stoppers at 1-800-222-TIPS (8477).

Forest Roads on Crown Land
Not all forest roads on Crown land are maintained for vehicle use. Users must use caution and be aware that travel is at their own risk.
Generally the main access routes are passable by car or light truck and other branch roads are maintained when required.
For personal safety, and to protect property and the environment, hunters and trappers are encouraged to use the following practices;
• When possible, avoid access roads used for industrial activities
• Follow all warning signs and drive defensively
• Avoid travel during seasonal times when certain roads are at risk for damage from vehicles
• Use all-terrain vehicles on managed trails (signage by the New Brunswick All-Terrain Vehicle Federation) or on roads without high vehicle usage
• Report road issues to the nearest DNRED District Office or contact the department at 506-453-3826 or dnr_mrnweb@gnb.ca.
Authorization to upgrade or repair forest roads on Crown land (including tree cutting) may be obtained by applying to the Land Use Application Service Centre at 1-888-312-5600 or www.gnb.ca/naturalresources.
Protecting our Forests

Spruce budworm populations are high in Quebec and causing defoliation. The outbreak has been growing and moving towards New Brunswick.

The Healthy Forest Partnership is a research initiative dedicated to keeping our forests green and healthy by protecting them against spruce budworm.

Treatment Areas

Our goal is to slow the outbreak. Beginning in 2014, hotspots of spruce budworm in northern New Brunswick have been treated using aircraft working at low altitudes.

Treatments have included Tebufenozide, Btk and pheromones; all are approved by Health Canada and pose minimal environmental risk and are not harmful to humans or other mammals, bees, birds, or fish when used according to label conditions.

Features including water bodies, residential areas, and public water supplies are identified in advance of treatment and excluded. Additionally, we work to notify residents within 500 metres of treatment areas. We test samples of water collected near municipal intakes following treatment and make the results available.

Spruce budworm treatments typically occur in the early mornings and evenings in late-May and June. While low flying aircraft can be disruptive if passing or turning near homes, roads or waterways, they are not actively spraying during this time. We work hard to minimize disruption to hunters, trappers and others as much as possible.

To view a map of the current treatment area and to see status updates of the treatment blocks, visit HealthyForestPartnership.ca, email info@healthyforestpartnership.ca, or leave a message at 1-844-216-3040.
Ours to protect.
Ours to explore.

New Brunswick’s Pathway to Target 1
Visit www.gnb.ca to learn more.

This project was undertaken with the financial support of the Government of Canada. Ce projet a été réalisé avec l’appui financier du gouvernement du Canada.
DON’T GIVE INVASIVE PESTS A FREE RIDE

- Buy it where you burn it – Excellent
- Move it less than 10 km – Great
- Move it less than 80 km – Okay
- Move it more than 80 km – STOP!

Invasive insects and diseases kill thousands of trees every day.

Don’t move firewood.
Moving firewood more than 80 km puts our trees at risk.

INVASIVE INSECTS

Emerald ash borer
- Native to Asia
- Found in Canada in 2002
- Destroys ash trees

Asian longhorned beetle
- Native to Asia
- Found in Canada in 2003
- Eats birch, elm, maple, poplar

Courtesy of the Province of Nova Scotia
Be a responsible pet owner

Crime Stoppers and the Department of Natural Resources and Energy Development remind pet owners to keep their dogs under control at all times while walking in areas where wildlife is found.

It is illegal to allow dogs to run at large. Maintaining control of your dogs and other pets will help protect them from hunting and trapping activities. Please help support the conservation of wildlife in New Brunswick. If you see any illegal activity, call the nearest Energy and Resource Development office or Crime Stoppers at 1-800-222-8477.

For information on hunting and trapping season dates, see pages 15-17, 22 and 26.

For more detailed information, visit the Be a Responsible Pet Owner brochure at www.gnb.ca/naturalresources.
