

New for the 2015-16 Fur Harvesting Season

Fur harvesters are no longer permitted to use leg-hold traps when trapping weasels. Only traps certified for the trapping of weasels are permitted for use in New Brunswick.

A 2 week marten harvest season is now permitted in Wildlife Management Zone 20 – see below for season dates.

The fisher and skunk harvest season in Wildlife Management Zone 20 has been reduced from 3 weeks to 2 weeks – see below for season dates.

The squirrel trapping season now begins on the last Saturday in October and ends on the last day of February – see below for season dates.

All traps set for squirrels must be enclosed in a wooden or metal box with no opening larger than 3.75 cm in diameter.

The start date for trapping and snaring beaver and otter, and trapping muskrat and mink in Wildlife Management Zones 13-27 has been moved to the first Saturday after the 28th of October – see below for season dates.

The following are certified traps for weasels regulated for use in New Brunswick:
