Message from the Minister

I am pleased to share the 2023 edition of the Department of Transportation and Infrastructure's (DTI) 3-Year Capital Investment Plan for New Brunswick.

The updated version of the "The Road Ahead" maintains DTI's goal to provide the best service possible while maintaining fiscal responsibility for our projects.

We have made significant progress on many new and ongoing Capital infrastructure projects since the release of our initial 3-Year Capital Investment Plan in 2022.

In St. Martins, the new Vaughan Creek Covered Bridge was completed in September, becoming the only two lane covered bridge in New Brunswick.

In October, Fredericton's new Brookside Roundabout opened to traffic, a project made possible with the help of funding under our capital highway program.

While many communities celebrated the success of recently completed projects, "The Road Ahead - 2023" also details next steps for the renewal and replacement of many key assets, including some that are underway as part of multi-year construction plans.

This plan not only demonstrates how we manage our current transportation infrastructure, interact with communities, and collaborate with industry partners – it also shows how we will operate into the future with an active plan centered around DTI's existing asset management principles.

We believe this rolling three-year plan will continue to demonstrate our commitment to transparency and accountability in communicating directly with New Brunswickers.

As the Minister responsible for DTI, this second edition of "The Road Ahead" provides the next step in our ongoing progress toward ensuring the travelling public has safe, reliable, and resilient infrastructure for years to come.

A handwritten signature in black ink that reads "Jeff Carr". The signature is written in a cursive, flowing style.

Honourable Jeff Carr

Minister of Transportation
and Infrastructure

Executive Summary

In spring 2022, the Department of Transportation and Infrastructure (DTI) released its first 3-Year Capital Investment Plan, called The Road Ahead. This plan outlined how DTI would build, repair and maintain the province's transportation network. The 3-Year Capital Investment Plan details expected investments in our transportation assets, including highways, bridges, large culverts and ferries. The 2023 edition of The Road Ahead is the second release of a rolling 3-Year plan and identifies planned capital investments for the fiscal years 2023-2025. This edition of The Road Ahead includes an update on completed, new and ongoing projects and programs, including the status of the projects from 2022.

Developing and publishing a rolling 3-Year Capital Investment Plan demonstrates transparency and accountability regarding future projects and has several main benefits, including the following:

- DTI has a defined plan for project implementation over the next three years.
- The public is informed of when and where work is planned.
- Industry has the opportunity to plan for upcoming work. Early identification of projects is a large step in efficiently delivering capital programs.
- The public is informed on the status of ongoing projects and any changes to projects and/or programs.
- Over the next three years, \$ 1.3 Billion is planned to be invested. The plan forms the basis for the multi-year budget submission and provides a level of detail that helps government understand the financial resources required to finance the identified projects and programs.

Introduction

DTI uses a process that relies on asset management principles to plan and prioritize projects for the province's transportation network. Doing the right repair, at the right time, at the right location for the life cycle of the assets is the key to extending their useful life, while minimizing capital investments in the long term. DTI's main focus continues to be preserving existing assets.

On an ongoing basis, the department pursues strategic partnership opportunities, including federal cost-shared funding for capital infrastructure projects. This allows us to leverage our provincial capital budget and enables the department to maximize value for money when addressing infrastructure challenges.

The 2023 edition of the 3-Year Capital Investment Plan is the annual update of the **original release** in spring of 2022. This update includes a new list of projects for 2025-2026 and a status report on the 2022-2023 projects that were published in the previous release.

While all of the projects in this document are planned to be completed, projects may change based on logistics, budgetary matters, and other factors. Any variations to the plan will be described in the following year's status report.

DTI's Transportation 3-Year Capital Budget

2023- 2025

As shown in Figure 1, approximately \$1.3 Billion is planned to be invested over the next three years in transportation projects. This budget breakdown is subject to change annually, depending on yearly budget approvals.

FIGURE 1:
**3-YEAR CAPITAL INVESTMENT PLAN
(\$ MILLIONS) TOTAL OF \$1,341**

In Figure 1, the Bridge Program provides funding for the construction of Bridges, Ferries and Ferry Landings. The Highway Program provides funding for the construction and upgrading of Provincial Highways. The Federal-Provincial Program provides funding for cost-sharing agreements between New Brunswick and the Federal Government for the construction and upgrading of Highways and Bridges. The Provincial-Municipal Highway Partnership (PMHP) is a program between DTI and municipalities, which was formally known as Municipal Designated Highway Program (MDH). The PMHP provides funding to support rehabilitation and repairs to Provincially Designated Highways within municipalities.

To find out about projects in your area and to access the online public viewer, visit gnb.ca/TheRoadAhead

■ Total Highways Program \$788
 ■ Total Federal/Provincial Program \$243
 ■ Total Bridge Program \$250
 ■ PMHP \$60

Status of 2022 - 2023 planned projects

There were many challenges to overcome in 2022. Rising inflation, supply chain delays and a more than 60 per cent fuel price increase meant that adjustments to original project estimates were required. DTI met these challenges by implementing measures that enabled projects to move forward while supporting contractors and industry associations. Below is a status update on the projects planned for 2022-2023.

PAVING ARTERIALS

F85	Gagetown Ferry - Dry Dock Inspection & Refit	Deferred	Tender to be re-issued
F07	Millidgeville Wharf & Landing - Wharf Renewal	Deferred	Supply chain issues
F08	Summerville Wharf & Landing - Wharf Renewal	Complete	

Notable Programs

In consideration of our infrastructure challenges, the department is planning for significant investments over the next three years (fiscal 2023-2024, 2024-2025, and 2025-2026). The items below describe the notable programs that have a provincial spend of \$5 million or greater. The 3-Year Capital Plan is adjusted annually. To view notable programs and projects that have been completed or ongoing from 2022-23, please see the **2022 original release**. Please note that any notable projects of \$5 million or greater are also in bold under the Planned Capital Projects section of this document.

PAVING	3 YEAR ESTIMATE:
PROJECT CATEGORY: PRESERVE/ MAINTAIN	\$290 MILLION
Project summary	Rehabilitate asphalt surface to improve safety and reliability.
Business value	The asphalt program will help improve the condition of the overall network at the lowest cost over the life cycle of that asset.

CHIPSEAL	3 YEAR ESTIMATE:
PROJECT CATEGORY: PRESERVE/MAINTAIN	\$118 MILLION
Project summary	Rehabilitate chipseal surface to improve safety and reliability.
Business value	The chipseal program will help improve safety and improve the condition of the overall network at the lowest cost over the life cycle of the asset.

BRIDGES	3 YEAR ESTIMATE:
PROJECT CATEGORY: PRESERVE/MAINTAIN	\$403 MILLION
Project summary	Replace/Rehabilitate bridges on provincial designated highways that have become structurally deficient and/or functionally obsolete. Design options for the new bridges or rehabilitation options will consider lifespan, maintenance requirements, site suitability and costs, while meeting standards of the Canadian Bridge Code. This group of spending includes all bridge work including specific bridge projects listed below.
Business value	Bridges form the backbone of our highway network and provide for the safe movement of people and goods, in support of our overall economy. Various bridge projects are receiving federal funding.

LARGE CULVERTS	3 YEAR ESTIMATE
PROJECT CATEGORY: PRESERVE/MAINTAIN	\$55 MILLION
Project summary	Replace/Rehabilitate large culverts on provincial designated highways that have become structurally deficient. Design options for a new culvert or rehabilitation options will consider lifespan, maintenance requirements, site suitability, and costs.
Business value	Culverts are a critical component of a highway network, and provide for the movement of people and goods, in support of our overall economy. Various culvert projects are receiving federal funding.

GRADING - GRAVEL ROADS	3 YEAR ESTIMATE
PROJECT CATEGORY: PRESERVE/MAINTAIN	\$15 MILLION
Project summary	The intent of the budget is to provide capital funding to improve the condition of the gravel road network.
Business value	This funding helps ensure roads remain passable to industry, school buses and residents on low volume roads.

PROVINCIAL-MUNICIPAL HIGHWAY PARTNERSHIP	3 YEAR ESTIMATE:
PROJECT CATEGORY: PRESERVE/MAINTAIN	\$60 MILLION
Project summary	Capital improvements to provincially designated highways within municipalities.
Business value	Maintain existing infrastructure and resurfacing existing highways with municipal cost-sharing on various projects.

Planned Capital Projects 2023 – 2024

PAVING ARTERIALS

ROUTE 1 — ROUTE 99

ROAD NAME	DESCRIPTION	LENGTH (KM)
Route 8	Big Eskedelloc River (B438) Area to Northumberland/Gloucester County Line - Minor Rehab	5.8
Route 8	MRDC to Saint John River Bridge (P870) - Eastbound + Westbound - Minor Rehab	9.9
Route 8	Arbour Lane Area to McGivney Junction CNR Overpass (M204) - Reconstruction	4.1
Route 10	Thompson Road to Route 870 - Reconstruction	4.3
Route 10	Immigrant Road Area toward Route 116 - Reconstruction	4.4
Route 10	2021 Contract toward Minto Village Limit - Reconstruction	3.3
