## Traffic Signals Ahead

**Description:** The *Traffic Signals Ahead* sign indicates that traffic control signals are present in the Work Area.

**Minimum Size:**
- 50 km/h ................. 75 cm x 75 cm (#3031)
- 60 - 90 km/h .......... 90 cm x 90 cm (#3032)
- 100 - 110 km/h .......... 120 cm x 120 cm (#3033)

**Colour / Sheeting:** Red, Yellow, Green & Black on Yellow, High Intensity

## Stop Ahead

**Description:** The *Stop Ahead* sign indicates that a Stop sign is present in the Work Area.

**Minimum Size:**
- 50 km/h ................. 75 cm x 75 cm (#3011)
- 60 - 90 km/h .......... 90 cm x 90 cm (#3012)
- 100 - 110 km/h .......... 120 cm x 120 cm (#3013)

**Colour / Sheeting:** Red & Black on Yellow, High Intensity

## Yield Ahead

**Description:** The *Yield Ahead* sign indicates that a Yield sign is present in the Work Area.

**Minimum Size:**
- 50 km/h ................. 75 cm x 75 cm (#3021)
- 60 - 90 km/h .......... 90 cm x 90 cm (#3022)
- 100 - 110 km/h .......... 120 cm x 120 cm (#3023)

**Colour / Sheeting:** Red, White, & Black on Yellow, High Intensity

## Grooved Pavement

**Description:** The *Grooved Pavement* sign warns bicyclists and motorcyclists of road surface conditions that require extra care and attention. This sign is typically used where milling activities occur.

**Minimum Size:**
- 50 km/h ................. 75 cm x 75 cm (#4550)
- 60 - 110 km/h .......... 90 cm x 90 cm (#4551)

**Colour / Sheeting:** Black on Orange, High Intensity
### Construction Zone Begins

**Description:** The *Construction Zone Begins* sign indicates that road users are now entering the Construction Zone, where double fines for speeding are enforceable.

**Minimum Size:** 120 cm x 90 cm (#4316)

**Colour / Sheeting:** Black on Orange, High Intensity

### Construction Zone Ends

**Description:** The *Construction Zone Ends* sign indicates that road users have reached the end of the Work Area and that roadway conditions have returned to normal. It also marks the end of where double fines for speeding are enforceable.

**Minimum Size:** 120 cm x 90 cm (#4318)

**Colour / Sheeting:** Black on Orange, High Intensity

### Wet Paint

**Description:** The *Wet Paint* sign warns road users that line painting is occurring ahead. It is to be mounted on the Trail Vehicle that follows the paint truck.

**Minimum Size:** 120 cm x 90 cm (#4652)

**Colour / Sheeting:** Black on Orange, High Intensity

### Follow Me

**Description:** The *Follow Me* sign is used to advise road users that a Pilot Vehicle will lead them through a Work Area and that the Pilot Vehicle must be followed.

**Minimum Size:** 120 cm x 90 cm (#4654)

**Colour / Sheeting:** Black on Orange, High Intensity
The mounting height varies depending on the sign size and the type of sign support. Figures 4-1 and 4-2 depict the proper sign position and mounting height for fixed and portable sign supports. Note: tabs are to be installed directly below the sign and shall not be installed on top or in front such that the sign is obscured. Signs should be mounted at a consistent height through the Work Area.

Figure 4-1: Sign Position and Height for Fixed Sign Supports

Figure 4-2: Sign Position and Height for Portable Sign Supports
Sequence

1. Begin at the first advance warning sign on the same side of the road as the Activity Area.
2. Proceed with the flow of traffic, placing all signs on the same side of the road as the Activity Area.
3. Make a legal turn.
4. Sign the opposite approach, beginning at the first advance warning sign and working with the flow of traffic.

Special Instructions

- Sign truck must display either 1) a Flashing Arrow Board set to the caution mode (recommended), or 2) a 360 degree amber light.
- A Trail Vehicle may be used based upon site specific conditions such as restricted sight distances or high traffic volumes.

Figure 4-3: Sign Setup (Two Lane Roads)
Sequence
1. Ensure that all signs and Traffic Control Persons (TCPs) are in place.
2. Begin with the Transition Taper, laying out delineators with the flow of traffic.
3. Continue with the flow of traffic, laying out delineators in the Buffer and Activity Areas.
4. Lay out delineators in the termination taper.
5. Install remaining traffic control devices such as traffic control signals, barricade boards, etc, if applicable.

Special Instructions
- Sign truck must display either 1) a FAB set to the caution mode (recommended), or 2) a 360 degree amber light.

Figure 4-4: Lane Closure Setup (Two Lane Roads)
Sequence
1. Ensure that all work activities are complete and that workers, materials, and equipment have been removed from the Activity Area.
2. Have TCPs regulate flow in both directions, as needed.
3. Pick up the delineators in the terminating taper (or at the furthest delineator if no termination taper exists).
4. Continue against the flow of traffic, picking up delineators in the Activity and Buffer Areas.
5. Have TCP #1 stop traffic in the closed lane.
6. Pick up delineators in the Transition Taper.

Special Instructions
- Sign truck must display either 1) a FAB set to the caution mode (recommended), or 2) a 360 degree amber light.

Figure 4-5: Lane Closure Removal (Two Lane Roads)
Sequence

1. Ensure that the Activity Area is clear of all workers, materials, equipment, and Delineation Devices.

2. Beginning on the same side of the road as the Activity Area, proceed with the flow of traffic, picking up all signs on the shoulder.

3. Make a legal turn.

4. Pick up signs on the opposite approach, beginning at the first advance warning sign and working with the flow of traffic.

5. Make a legal turn.

6. Pick up all remaining signs on the same side of the road as the Activity Area, beginning with the first advance warning sign and following the flow of traffic.

Special Instructions

- Sign truck must display either 1) a FAB set to the caution mode (recommended), or 2) a 360 degree amber light.

- A Trail Vehicle may be used based upon site specific conditions such as restricted sight distances or high traffic volumes.

- **Traffic Control Sign**
- **Delineation Device**
- **Spacing**
- **Continuous Barrier**
- **Flashing Arrow Board**
- **Barricade**
- **Traffic Control Person**
- **Work Vehicle**
- **Trail Vehicle**
- **Buffer Vehicle**

Revised 2010
NOTES:

1. No signs are required for work that occurs outside 15 m from the edge of the travelled lane.

2. No signs are required for work vehicles that are positioned off the shoulder area of the travelled lane onto private driveways for Very Short and Short Duration Work.

3. No signs are required for mowing operations. However, the mower shall be equipped with a 360 degree amber light and a Slow Moving Vehicle Triangle.

4. For mowing operations, the first swath adjacent to the road must be mowed following the direction of traffic.

5. Shoulder must remain clear of all workers, vehicles, and equipment while work is in progress.

<table>

</tr>
</tbody>
</table>

V = Existing Speed Limit (km/h)
S = Minimum Sign Spacing (m)
NOTES:

1. Work Vehicle shall be equipped with a Flashing Arrow Board set to caution mode or a 360 degree amber light.
2. No workers, equipment, or vehicles shall encroach on the travelled lane.
NOTES:
1. Sign opposite approach in the same manner, without the Road Narrows sign.
2. Construction Zone Ends sign to be placed directly across from Construction Zone Begins sign on the opposite approach.
3. Continuous barrier may be replaced by flexible drums or delineator posts if anticipated work duration is 3 days or less.
4. For work on bridge structures, a continuous Barrier is required for all Long Duration Work.

**Shoulder Work**

D – Maximum Delineator Spacing in Taper/Tangent (m)
B – Buffer Area Length (m)

Figure 7-4

Revised 2010
NOTES:

1. Must maintain a minimum 2.5 m usable road width in the lane in which work is taking place.

2. Sign opposite approach in the same manner, without the Road Narrows sign.

3. Construction Zone Ends sign to be placed directly across from Construction Zone Begins sign on the opposite approach.

4. For Very Short Duration Partial Lane Closures on roads with AADT ≤ 300 and Existing Speed Limit ≤ 50 km/h:
   - identified signs may be eliminated,
   - T may be reduced to T/3,
   - Termination Taper may be reduced to two delineation devices.
